ACCOUNTS AND PAPERS:

TWENTY-ONE VOLUMES.

—(3.)—

ARMY; NAVY; ORDNANCE.

Session

30 *April* — 28 *August* 1857.

VOL. XXVII.

1857—Sess. 2.

ACCOUNTS AND PAPERS:

1857—Sess. 2.

TWENTY-ONE VOLUMES:—CONTENTS OF THE THIRD VOLUME.

N. B.—*THE* Figures at the beginning of the line, correspond with the N^o at the foot of each Paper; and the Figures at the end of the line, refer to the MS. Paging of the Volumes arranged for *The House of Commons*.

ARMY:

Army, Commissariat and Militia Services:

- ✓ 275. Account of the Receipt and Expenditure for Army, Commissariat and Militia Services, for the Year ended 31st March 1856 - - - - - p. 1

Army, Navy and Ordnance:

- ✓ 300. Detailed Accounts of the Receipt and Expenditure for Navy, for Army, including Commissariat, and for Ordnance Services, for the Year to the 31st day of March 1856 - - - - - 17

Army, Navy, &c.:

- ✓ 79. Returns of the Number of Men of all Ranks of the Army, from 1828 to 1856-57, both inclusive, stating the Numbers in *India*, for Service in the Colonies, and at Home, and the Total Number voted, with the Gross Amount voted in each Year for the Army Estimates, irrespective of Credits in Aid:—Of the Number of Men voted in the same Years for Ordnance Services, together with the Gross Sums voted in each Year:—Of the Gross Sums voted in each Year for the Commissariat, and the Totals of the Men voted for the Army and Ordnance Services; also the Total of the Sums voted as above in each Year for Army, Ordnance and Commissariat:—And, similar Return of Men, Boys and Marines voted for the Navy, and Gross Sum voted, irrespective of Credits in Aid, deducting the Vote for Packets, from the Year 1842 - - - - - 123

Barracks:

- ✓ 165. Return of the several Barracks and Encampments occupied by Troops on the 1st day of January 1857, with the Number of Rank and File they are each calculated to contain, &c. - - - - - 127

Major-General Beatson:

- ✓ 232. Return of the Expenses of the Court of Inquiry in the case of Major-General *Beatson*, including the Cost of procuring Evidence, the Travelling Expenses of Officers summoned as Witnesses, and the Employment of Government Steamers for such purposes - - - - - 137

Enfield Factory:

- ✓ 62. Account of the Total Sum expended at *Enfield* Factory, from the 1st day of January 1854 to the 31st day of March 1857; the Amounts under the following Heads to be separately specified; viz., Building, Machinery, Miscellaneous Stores, Salaries and Wages - - - - - 139

Foreign Corps:

- ✓ 127. Return of the Names and Places of Abode of Officers of Disbanded Foreign Corps who are in Receipt of Half-pay and Reduced Allowances for Service in the War which ended in 1815; of the Annual Payment made to each Officer; and of the Date when such Payment commenced:—Like Return of Pensions for Wounds:—And, like Return of Allowances for Widows and Children - - - - - 141

Foreign Legions :

- ✓ 158. Returns of the Number of Officers, Non-commissioned Officers and Men, p. 151

Huts :

- ✓ 267. Returns of the Number of Huts supplied to the Ordnance or War Departments during the Years 1854-5 and 1855-6 ; the Appropriation of the same, together with the Stations, and Quantities sent to each :—And, of the Names of the several Contractors ; Amount of each Contract and Price per Hut, with Dimensions ; the present Extent of Hut Accommodation in *England* and *Ireland* ; and the Number of Troops huttred on the 1st day of April 1857 - - - 155

Prize Money :

- ✓ 244. Account of Unclaimed Army Prize Money from 18th January 1809 to 31st December 1856 ; directed to be Annually laid before the Houses of Parliament by the Act 2 Will. 4, c. 53 - - - 167

Medical Expenses :

- ✓ 189. Returns of the Amount paid by Her Majesty's Government for Medical Attendance on the Permanent Staff of the Militia Regiments of the United Kingdom, and Medical Examination of Volunteers for same, from the Disembodiment of the respective Regiments to the 31st day of March 1857 :—And, of the Amount paid for the Medical Examination of Recruits for the Line, Royal Artillery, and Royal Marines, and Deserters, during the Six Months ending on the 31st day of March 1857 - - - 169

Militia :

- ✓ 189. Return of the Expenditure of the 3,813,383*l.* voted for 136,323 Embodied Militia in 1855-56, stating the average Number of Officers and Men embodied in that Year ; the Amount expended on the Militia, and a Statement in detail of how the Amount remaining was disposed of - - - 169

Military Education :

- ✓ 223. First Report of the Council of Military Education - - - 175

Netley Hospital :

- ✓ 174. Return respecting *Netley* Hospital, showing by whom the Site was selected, whether any Reports were made on its Salubrity and general Eligibility for its purpose, previous to Selection, and by whom ; by whom the Original Plans were prepared, whether they were submitted to any Medical Authority for Approval, by whom they were officially sanctioned, and whether any Report was made upon them, and by whom, previous to their being sanctioned :—Statement of the Alterations of or Additions to the Original Plans which have been determined on, by whom they were recommended, to whom they were referred for Approval :—And, Copy of Correspondence or Reports relating thereto, which have led to the adoption of the amended Plan - - - 179

Order of the Bath :

- ✓ 302. Return of the Names of the Persons upon whom Her Majesty has been pleased to confer the Dignity of Knight Grand Cross of the Most Honourable Order of the Bath, from the Year 1847 to the present time ; stating the Amount of Fees actually paid by each Individual, and, in Cases where Fees have not been paid, the Causes of such Non-payment - - - 199

Relatives of Officers :

- ✓ 78. Return of Sums paid to the Relatives of Officers in lieu of Pensions, &c., in pursuance of the Provisions of the 10th Clause of the Royal Warrant of the 1st March 1856 - - - 203

Promotions :

- ✓ 188. Return of the Names of all Non-commissioned Officers of the Army who were promoted to Commissions while serving in the Field with the Army of the East, between the 1st day of May 1854 and the 1st day of August 1856, stating the Regiment to which they belonged, and the Regiment or Corps to which they were promoted ; and specifying if they received Appointments as Adjutants or Quartermasters, and if now serving on Full or Half-Pay - - - 205

Reviews at Spithead and Aldershot :

- ✓ 27. Return showing, in Detail, the Total Expense incurred in providing Conveyance by Special Trains, Accommodation in Steamers or Sailing Vessels, and Refreshments, for Members of the Two Houses of Parliament, on the Day of the late Naval Review at *Spithead*; stating also the Number of Tickets issued for Members of each House:—And, of the Total Expense incurred in providing Conveyance by Special Trains, Omnibuses at the *Farnborough* Station, and Luncheon on the occasion of the Review at *Aldershot* on the 16th day of July 1856 - - - - - p. 213

Sardinian War Medals :

- ✓ [2259.] List of Officers, Non-commissioned Officers and Men selected to receive the Four Hundred War Medals for Military Valour; presented by His Majesty the King of *Sardinia* to the *British* Army engaged in the late War in the East - - - - - 215

N A V Y :

Breakwaters, &c. :

- ✓ 203. Return of the Names of Places on the Coast of *Great Britain* and *Ireland* which have been surveyed or reported on by Order of the Admiralty with a view to the Formation of Breakwaters, Piers or Harbours of Refuge, the Works of which have not been commenced, and where the Recommendations have not been adopted; and, of the Nature of the Works recommended, the Period required for Completion, the Estimate of Total Cost, and the Outlay recommended per Annum - - - - - 245

China Surveys :

- ✓ 149. Return of the respective Dates of Transmission to the Admiralty of any Official Surveys that may have been made in the *Chinese* Waters, between *Macao* and *Hong Kong*, since the Cession of that Island to Her Majesty:—And, similar Return as to Official Surveys of all other Portions of the *Chinese* Coast - 249

Coast Guard :

- ✓ 216. Return of the Names, Age, Date of Appointment, and Gross Pay and Allowances of all Persons now employed as Chief Officers of Coast Guard; showing their previous Services, whether Naval or Civil, with Date of Appointment to and Discharge therefrom - - - - - 253

Dover Mail Packet Contract :

- ✓ 67. Return of the Number and Names of the Vessels employed in the Mail Contract Service from *Dover*; their Steam Power, Tonnage, and Names of Commanders, and whether manned by *British* Seamen, and how often and when last officially surveyed; such Return being made up Year by Year, since the Commencement of the Contract, stating whether, during the same Period, any Government Vessels have been lent to the Contractors, and if so, how often, and for what time, and on what Terms - - - - - 263
- ✓ 67-I. Amended Return of the Number and Names of the Vessels employed in the Mail Contract Service from *Dover*; their Steam Power, Tonnage, and Names of Commanders; and whether manned by *British* Seamen; and how often, and when last officially surveyed; such Return being made up Year by Year since the Commencement of the Contract; stating whether during the same Period any Government Vessels have been lent to the Contractors, and if so, how often, and for what Time, and on what Terms - - - - - 265

Freight Money (Greenwich Hospital):

- ✓ 221. Return of the several Sums of Freight Money received by the Treasurer of *Greenwich* Hospital, since the 11th day of May 1855, with the Date of such Payments, and whether on Public or Private Account; and of the Name of the Ship or Vessel in which the Treasure was conveyed, and of the Captain or Officer commanding the same (in continuation of Parliamentary Paper, No. 238, of Session 1855) - - - - - 267

Grant's Apparatus for Ships and Vessels :

- ✓ 254. Return showing the Names of Her Majesty's Ships and Vessels which have been Fitted with *Grant's* Apparatus for obtaining Fresh Water Distilled from the Sea :
—And, Copies of any Reports made on the same - - - - p. 271

Naval Prize Money :

- ✓ 150. Account showing the Receipt and Expenditure of Naval Prize, Bounty, Salvage and other Monies, between the 1st April 1856 and 31st March 1857 - 283

Riff Pirates :

- ✓ 66. Return of the Number of Ships belonging to *English* Owners captured by Riff Pirates off the Coast of *Morocco*, since the 1st day of January 1850 ; distinguishing the Name and Tonnage of each Vessel ; Captain's Name, and Number of each Crew ; Date of Capture of each Ship ; how many of each Crew Killed, and subsequent Fate of others ; and, what Captured Ships have been Recovered, stating the Names of Ships and Commanders engaged in the Re-capture - 291

Slave Trade (Cuba) :

- ✓ 91. Return of Her Majesty's Ships and Vessels employed on the Coast of *Cuba* for the Suppression of the Slave Trade, from the 1st day of January 1854, stating the Dates of their Arrival on, and their Departure from, their respective Cruising Stations, with the Names of their several Captains and Commanders, and distinguishing Steam from Sailing Vessels - - - - - 293

ORDNANCE :

Receipt and Expenditure :

- ✓ 276. Account of the Ordnance Receipt and Expenditure, for the Year ended 31st March 1856 - - - - - 295

Survey of Great Britain :

- ✓ 154. Copy of recent Correspondence between the War Department and the Treasury in respect of the Scale on which the Survey of *Great Britain* is to be drawn in future - - - - - 305

Ordnance Survey :

- ✓ 147. Report on the Ordnance Survey of the United Kingdom for 1855-56 - - 309
- ✓ 179-II. Detailed Report of the State of the Ordnance Survey in *England* and *Scotland* on the 30th June 1857 - - - - - 399

Survey (Cumberland and Westmoreland) :

- ✓ 179-I. Return of the Names of the Parishes and Places in *Cumberland* and *Westmoreland* which have been surveyed upon the Twenty-five Inch Scale ; distinguishing such Portions of the Survey, if any, which have been already Published from those which remain Unpublished - - - - - 407

Survey (Durham and Northumberland) :

- ✓ 179. Return of the Names of the Parishes and Places in *Durham* and *Northumberland* which have been surveyed upon the Twenty-five Inch Scale ; distinguishing those Portions of the Survey which have been already Published from those which yet remain Unpublished - - - - - 409

Ordnance Survey (Ireland) :

- ✓ 268. Return, in a Tabular Form, of the Sums received by the Sale of Maps of the Ordnance Survey of *Ireland* on Scale of One Inch and of Six Inches to the Mile, for each County in *Ireland* ; and of the Number and Value of Maps supplied to Government Departments, and to Literary and Scientific Institutions gratuitously - - - - - 411

Ordnance Survey (Scotland):

- ✓
63. Return with regard to the Ordnance Survey in each County of *Scotland*, showing,
—1. The Scale or Scales of such Surveys, and, where different Scales have been adopted, the Date when such Scales were severally commenced ; 2. The present State of such Surveys, and the Estimated Time for their Completion upon each different Scale adopted ; 3. The Expense incurred in each Survey from the Commencement to April 1854, and subsequently in the several Years ending April 1855, 1856 and 1857 ; 4. The Estimated Cost of Completion ; 5. Where no Survey has yet been commenced, the Scale or Scales on which it is intended to make the Survey, with the Estimated Cost and Time of Completion, p. 413

Volunteers, Naval Cadets, &c.:

325. Returns of First Class Volunteer Naval Cadets, Midshipmen and Naval Instructors, for each Year, from 1836 to 1856, inclusive :—Of Mates for each Year, from 1836 to 1856, inclusive :—Similar Return of Lieutenants :—And, similar Return of Commanders - - - - - 419

AN ACCOUNT OF THE RECEIPT AND EXPENDITURE

FOR

ARMY, COMMISSARIAT, AND MILITIA SERVICES,

For the Year ended 31st March 1856.

(Pursuant to Act 9 & 10 Vict. c. 92, s. 2.)

Ordered, by The House of Commons, to be Printed,
15 August 1857.

ARMY COMMISSARIAT, AND MILITIA SERVICES,

1855-56.

(No. 474.)

My Lords,

Audit Office, 10 August 1857.

We beg leave to lay before your Lordships the accompanying copy of an Account of the Receipt and Expenditure for Army, Militia, and Commissariat Services, for the year ended 31st March 1856. This Account, transmitted to us in pursuance of the 2d section of the Act 9 & 10 Vict. c. 92, was received on the 17th ultimo, and has been duly examined by Officers under our direction.

The Commissariat Vote for the year 1855-56 having been taken by the Secretary of State for War, and the amount thereof, viz. 4,961,654 *l.*, being included in the gross sum of 18,789,532 *l.* appropriated by the Act 18 & 19 Vict. c. 129, for Army Services, the Account has this year been prepared by your Lordships' directions in a consolidated form.

The aggregate amount of the Ordinary Grants for Army, Militia, and Commissariat Services in 1855-56 was 18,789,532 *l.*; the appropriation in aid, viz., the contribution from the Revenues of the Australian Colonies in aid of Military Expenditure, was 37,948 *l.* 8 *s.* 11 *d.*, making together 18,827,480 *l.* 8 *s.* 11 *d.*, and the total expenditure as shown by the account now laid before your Lordships is 20,350,580 *l.* 11 *s.* 11 *d.*

The differences between the sums voted and those expended are as follows:—

	* Deduct the saving on Embodied Militia, which has not been applied to cover the deficiency on other Votes. - - - - -	882,498	19	6			
					79,298	17	10
	Net Deficiency as shown on Debit side of Account - - -	£.			2,405,599	2	6

The above deficiency of 2,484,898 *l.* 0*s.* 4*d.* having been reduced to 2,405,599 *l.* 2*s.* 6*d.*, by the application in aid of the surplus upon certain votes (exclusive of that for embodied Militia) under the authority of your Lordships' Warrant signifying Her Majesty's pleasure to that effect, the net deficiency of 2,405,599 *l.* 2*s.* 6*d.* has been met by the transfer of a like sum, by your Lordships' directions, from the special Votes of 3,000,000 *l.* each, appropriated by the Acts 17 & 18 Vict. c. 121, s. 15, and 18 & 19 Vict. c. 129, s. 17, to provide for any additional expense arising out of the war with Russia, as shown on the debit side of the account, leaving 882,498 *l.* 19*s.* 6*d.*, the amount unexpended on the Vote for the Embodied Militia to be surrendered to the Exchequer.

We would, however, observe, that the sum of 1,600,000 *l.*, part of 2,405,599 *l.* 2*s.* 6*d.*, as shown on the debit side of the Account, was transferred by your Lordships' directions from the Vote of Credit in aid of the war to cover the anticipated deficiency on Commissariat Services; but, as this deficiency has amounted only to 731,422 *l.* 7*s.* 10*d.*, the difference between this sum and 1,600,000 *l.*, viz., 868,577 *l.* 12*s.* 2*d.*, has merged into the amount required to cover the deficiency upon Army Services generally.

The Treasury Warrant directing the transfer to the Army of 761,750 *l.* (the amount of the Supplementary Commissariat Vote for Land and Inland Water Transport) having been cancelled, that amount is now shown in the Account as originally voted. The saving under this head amounts to 917,644 *l.* 10*s.* 8*d.*, which arises from the expenditure of the Land Transport Corps having been included under Vote No. 2 of the Army, on which head of Land Transport Corps there is an excess of 766,886 *l.* 9*s.* 5*d.*

In conformity with the 6th section of the 9 & 10 Vict. c. 92, we have, as usual, "given under each head the explanations with which we have been furnished of the causes of the (several) excesses;" but, inasmuch as our power under that clause is—so far as such excesses are concerned—limited to "recapitulating the several heads of the Account under which the sums expended shall have exceeded the sums voted," and to "certifying that such excesses have been sanctioned," &c., we abstain from expressing any opinion as to the sufficiency or otherwise of the explanations in question.

A sum of 22,161 *l.* 19*s.* 10*d.* is included under Vote No. 2, in respect of payments by Majors Rhodes and Foord for the purpose of recruiting for the Turkish Contingent. The accounts of this expenditure have not been produced to us, having been lost, as it appears,

in their transmission to this country, and the accountants having stated their inability to furnish duplicates. The accounts had, however, already been submitted to a Board in Turkey for examination, who reported that all the charges were properly vouched, and we do not see that any other course was open than that which has been adopted, of including the amount under the Vote in question.

Sundry small payments, amounting to 379 *l.* 10*s.* 6*d.*, though included in the accompanying Account, will form the subject of future adjustment in the Account of the Paymaster-general to which they relate.

We have ascertained that the Army Extra Receipts, as shown in the Memorandum attached to the Account, have been paid into the Exchequer, as follows :

									£.	s.	d.
August 1855	-	-	-	-	-	-	-	-	8,424	10	6
November 1855	-	-	-	-	-	-	-	-	14,044	4	-
January 1856	-	-	-	-	-	-	-	-	664	2	5
June 1856	-	-	-	-	-	-	-	-	66,193	8	8
January 1857	-	-	-	-	-	-	-	-	6	3	-
Part of 57,432 <i>l.</i> 9 <i>s.</i> 1 <i>d.</i>									£.	89,332	8 7

Before concluding our Report we think it right to advert to certain modes adopted by the War Office of recording expenditure, inasmuch as the performance of the duties with which we are entrusted is thereby materially affected.

We have, first, again to call your Lordships' attention to the circumstance of the Army Accounts being passed by the War Office, subject to objections which may ultimately become disallowances. It is, in our opinion, of great importance, with a view to the efficiency of the Parliamentary check, that the Army Accounts of the War Office should be placed on the same footing as those of the Navy, Ordnance, and Commissariat, in which finally allowed expenditure is alone passed to account. But irrespective of all considerations of principle, it is obvious that under the consolidation of the Army, Ordnance, and Commissariat Accounts, this inconvenience cannot but be more felt, inasmuch as similar transactions are recorded in the Accounts of one and the same Department on opposite principles.

The next point to which we are desirous of directing your Lordships' attention is, that, in order apparently to obviate the difficulty arising from the great arrear which existed in the examination of the Accounts of Paymasters and others, the Accounts were abstracted prior to examination, and they were passed in the Books to Accounts of "Unaudited Expenditure;" the practice of the War Office being, as before observed, to pass the Accounts subject to disallowances. Nevertheless, as the sums in question could not be passed by us as debits against the Votes, except upon allowed expenditure, the consequences of the delay in examination (which this system was calculated to counteract, so far as the Bookkeeping Branch of the War Office was concerned) fell most heavily on our Office, since the Accounts could not be checked into the Abstract Books until their examination and allowance were complete. Accordingly, the record of expenditure against the Votes for the year 1855-56 (being a record extending over 23 months) amounted only, up to the end of February 1857—eleven months after the close of the year—to 2,284,735 *l.* 19*s.* 3*d.*, while the record for the month of March 1857, irrespective of 5,685,151 *l.* 11*s.* 7*d.* for Commissariat Services, amounted to no less a sum than 12,380,693 *l.* 1*s.* 1*d.* In this latter month the whole of the expense of the Embodied Militia, with the trifling exception of 1,775 *l.* 5*s.* 8*d.*, was brought to Account, and the amounts charged against Vote No. 2 for Land Forces, and Vote No. 3 for Staff, exceeded the amount voted for the whole year.

Again, Entries in the War Office Journal are, in numerous instances, for gross sums under the head of "Sundry Services," for which no corresponding entry is to be found posted in the Ledgers, either Principal or Auxiliary. These gross sums are made up from

Auxiliary

Auxiliary Abstracts, which, with respect to some items, have again to be supported by subsidiary Papers. No such system is to be found at the Admiralty. In that Department every one of the Postings in the Principal and Auxiliary Ledgers can readily be traced in the Journals; and from these Journals, which are deposited at the Record Office, a complete set of Ledgers could be at any time reproduced, if necessary.

Another practice to which it may be proper to advert, is that of recording against Accountants and Votes net sums. Accountants are in many instances debited or credited with the difference between their receipts and payments and the Votes debited or credited, with the difference between the receipts and payments under like heads; the Journal, therefore, does not record the entire transaction, and the Ledger affords but an imperfect record of the Account.

We have deemed it incumbent upon us to draw your Lordships' attention to the above circumstances, because not only is an unnecessary degree of labour already thrown thereby upon our Examiners in the performance of their duties, but because we have reason to anticipate that, under the continuance of the present system, the time cannot be far distant when our examination of these Accounts will not only be delayed beyond the time prescribed, but when it will not be in our power to comply with the provisions of the Legislature, as laid down in the 9 & 10 Vict. c. 92. We ought to add, that the consolidation of the Army, Ordnance, and Commissariat Services under one and the same Department has brought more prominently before us the inconveniences to which we have adverted.

We have, &c.

(signed) *Edward Romilly.*
Charles Ross.
W. L. Maberly.
R. Vaughan Davis.

The Lords Commissioners of
 Her Majesty's Treasury,
 &c. &c. &c.

TREASURY MINUTE, dated 13 August 1857.

MY LORDS read the Report of the Commissioners of Audit, dated the 10th instant, on the account of Receipt and Expenditure for Army Services for the year ended 31st March 1856.

In this Report the Commissioners call the attention of this Board to several defects in the practice of the War Department in preparing the account, which impair the efficiency of the Parliamentary check upon the accounts of the Army Expenditure, and impede the duties of their Examiners.

My Lords desire that a copy of the Report of the Commissioners of Audit be transmitted to the Secretary of State for War, and that he be requested to favour this Board with any explanations which he may have to offer on the several points adverted to in the Report.

As the approaching termination of the Session renders it necessary that no further delay should take place in the presentation of the Account to Parliament, my Lords desire that it may be forthwith laid on the Table of the House of Commons, together with the Reports and Minutes relating to it, in accordance with the provisions of the Act 9 & 10 Vict. c. 92, and they will reserve any directions which they may have to give upon the several points brought under their notice by the Commissioners of Audit until the receipt of the explanations of the Secretary of State for War called for by this Minute.

EXPLANATORY NOTES referred to in the preceding Account.

VOTE 2.—LAND FORCES.

	Expenditure.	Estimate.	EXPENDITURE					
			Less than Estimate.			More than Estimate.		
	£. s. d.	£. s. d.	£. s. d.	£. s. d.	£. s. d.	£. s. d.	£. s. d.	£. s. d.
Services provided or partly provided for -	8,616,965 10 2	7,383,803 17 3	1,512,828 18 1			2,745,990 11 -		
Services wholly unprovided for, but chargeable against the Vote of Credit -	386,808 11 2	- - - -	- - - -			386,808 11 2		
	9,003,774 1 4	7,383,803 17 3	1,512,828 18 1			3,132,799 2 2		
Add amount received from the Australian Colonies beyond the sum abated upon the Army Estimates - - - - 7,948 8 11	- - - -	7,948 11 8	7,948 11 8			-		
Fractions - - - - - 2 9								
£.	9,003,774 1 4	7,391,752 8 11	1,520,777 9 9			3,132,799 2 2		

Net Excess, £. 1,612,021. 12s. 5d.

The excess (1,612,021*l.* 12*s.* 5*d.*) on this Vote is caused by the Expenditure on Account of Foreign Corps exceeding the Amount voted under that head, and by the Expenditure of other Services intended to be provided for out of the Vote of Credit for the extra expenses of the late War.

VOTE 3.—STAFF.

	Expenditure.	Estimate.	EXPENDITURE					
			Less than Estimate.			More than Estimate.		
	£. s. d.	£. s. d.	£. s. d.	£. s. d.	£. s. d.	£. s. d.	£. s. d.	£. s. d.
Staff, Home - - - - -	96,171 2 7	63,845 13 2	- - - -			32,325 9 5		
Staff, Abroad - - - - -	285,597 11 7	251,138 8 4	- - - -			34,459 3 3		
	381,768 14 2	314,984 1 6	- - - -			66,784 12 8		
Fractions not voted - - - - -	- - - -	- 1 6	- - - -			- 1 6		
£.	381,768 14 2	314,984 - -	- - - -			66,784 14 2		

Excess, £. 66,784. 14s. 2d.

The excess (66,784*l.* 14*s.* 2*d.*) on this Vote is caused entirely by the increased charges occasioned by the Russian War, and is equally defrayable out of the Vote of Credit.

VOTE 6.—ROYAL MILITARY ASYLUM, &c. - - - - - Excess, £. 239. 15s. 3d.

The excess (239*l.* 15*s.* 3*d.*) on this Vote arises from the Expenditure for Clothing, House Linnen and Utensils, Fuel and Light, and Sundry Expenses of the Royal Military Asylum and Normal Schools.

EXPLANATORY NOTES—*continued.*

VOTE 15.—COMPASIONATE LIST - - - - - Excess, £.32,799. 13s. 4d.

The unforeseen Expenditure under the heads of Allowances to deceased Officers, and Gratuities to Wounded Soldiers, consequent upon the War, is the cause of the Excess (£.32,799 13s. 4d.) on this Vote.

VOTE 17.—OUT PENSIONS.

	Expenditure.		Estimate.		EXPENDITURE			
					Less than Estimate.		More than Estimate.	
	£.	s. d.	£.	s. d.	£.	s. d.	£.	s. d.

£.	1,226,881	12 5	1,188,589	- -	17,285	3 11	55,577	16 4

Excess, £.55,577. 16s. 4d.

The excess (£.55,577. 16s. 4d.) on this Vote is caused by the number of men placed on the Pension List, from wounds and disabilities caused by the late War, exceeding the number of vacancies on the list during the same period.

The following Amounts have been written off as irrecoverable, viz. :—

	£.	s.	d.	£.	s.	d.
Balance due by W. A. Kirk, late Paymaster, 16th Foot - - - -	49	11	1			
Money stolen from Accountant of the Land Transport Corps in the East	1,070	18	4			
	£.			1,120	9	5

COMMISSARIAT, VOTE 1.—EFFECTIVE SERVICES.

	Expenditure.		Estimate.		EXPENDITURE			
					Less than Estimate.		More than Estimate.	
	£.	s. d.	£.	s. d.	£.	s. d.	£.	s. d.
Commissariat Effective Services - -	5,650,956	7 10	4,919,534	- -	-	-	731,422	7 10

The excess (£.731,422. 7s. 10d.) on this Vote is caused entirely by the increased charges occasioned by the Russian War, and is defrayable out of the Vote of Credit.

Note.—The Surplus on Votes 4, 5, 9, 10, 11, 12, 13, 14, 16, 18, Commissariat Vote 2, and Disembodied Militia, has been applied in aid of the differences on the Grants for the Services above-mentioned, as sanctioned with reference to the provisions of the 27th Clause of the Act 17 & 18 Vict. c. 121.

MEMORANDUM.

The following Extra Receipts of the Year 1855-56, amounting to £.89,332. 8s. 7 d., have been paid over to Her Majesty's Exchequer, in conformity with the Treasury Minute of the 2d May 1848, instead of being appropriated on the Estimates.

War Office, Pall Mall,
24 April 1857.

Sir,

WITH reference to the letter from this Department of the 26th of April last, and to the Act 9 & 10 Vict. c. 92, which prescribes the date on which the Annual Accounts of Receipt and Expenditure should be rendered to the Commissioners for Auditing the Public Accounts, I am directed by the Secretary of State for War to acquaint you, for the information of the Lords Commissioners of Her Majesty's Treasury, that, owing to the extraordinary pressure of business during the past year, the vast increase in the number of accounts as shown in the statement herewith, and the complicated character thereof, in consequence of the employment of Foreign Legions and their untrained accountants, and numerous irregularities occasioned by the late War, the Accounts of Audited Receipt and Expenditure for Army, Ordnance, and Commissariat Services for the year 1855-56, required by Parliament to be prepared for the first time in one Department, cannot be forwarded at the period prescribed by the Act referred to.

No. 1.

Their Lordships may be assured that this failure is entirely attributable to circumstances beyond the control of the officers and clerks of this Department, inasmuch as the examining branches have used every exertion to complete the audit of the pay lists and vouchers for the year, with a view to their being placed upon record within 13 months subsequent to the 1st April 1856, according to the Treasury Minute; and the gentlemen engaged in keeping the books have devoted an amount of extra time which is almost beyond all precedent, such extra attendance being the more requisite, as a limited number only could be employed at one time upon the books; and of these a few only could be considered as accountants, at a time when professional and official experience combined were most necessary.

Every exertion will continue to be employed to complete these accounts as early as possible, and it is fully expected that they will not be delayed beyond the 30th of June next.

I am to transmit also a Memorandum, stating the amount of extra time given by the members of the Bookkeeping Branch during 1856-57.

No. 2.

To the Assistant-Secretary }
of the Treasury.

I have, &c.
(signed) B. Hawes.

MEMORANDUM showing the Amount of EXTRA TIME given by the CLERKS of the WAR OFFICE employed in Recording Army Expenditure 1855-56.

8 Established Clerks:		HOURS.
Total Attendance between the 1st April 1856 and 31st March 1857		19,005
Total Office hours required - - - - -		13,452
Extra - - -		5,553
7 Temporary Clerks:		
Total Attendance between the 1st April 1856 and 31st March 1857		15,947
Total Office hours required - - - - -		11,628
Extra - - -		4,319
Total Extra Attendance - - - - -		9,872 hours.

It is also to be observed, that six of the above gentlemen were employed during a portion only of the year, and that of 371 days which were allowed by regulation for leave of absence, 246 days only were taken.

(No. 251.)

Audit Office, Somerset House, London, w.c.
1 May 1857.

My Lords,
We have the honour to report, that the Accounts of Receipt and Expenditure for Army, Commissariat, and Ordnance Services for the year ended 31st March 1856, required by the Act 9 & 10 Vict. c. 92, s. 2, to be transmitted to us on or before the 30th April, have not yet reached this office.

We have addressed a letter on the subject to the Secretary of State for War, a copy of which we beg leave to enclose.

We have, &c.

Secretary.

To the Secretary of State for War,
&c. &c. &c.
War Office.

(No. 324.)

Audit Office, Somerset House, London, w. c.,
29 May 1857.

My Lords,

WE beg leave to represent to your Lordships that the Army, Ordnance, and Commissariat Accounts for the year 1855-6, which were not delivered to this office within the time prescribed by the Act 9 & 10 Vict. c. 92, s. 2, as reported by us to your Lordships on the 1st instant, have not up to the present time been received, and that in consequence it will not be in our power to transmit the account in question to your Lordships, so as to enable your Lordships to comply with the 7th Section of the before-mentioned Act.

We have, &c,
(signed) *Edward Romilly.*
Henry Arbuthnot.

The Lords Commissioners of
Her Majesty's Treasury.

TREASURY MINUTE, dated 11th June 1857.

(7283. 9001. 6904.)

MY LORDS have under consideration two Reports from the Commissioners of Audit, dated the 1st and 29th May 1857, in which they represent to this Board that the Army, Commissariat, and Ordnance Accounts for the year 1855-56 have not been rendered to them by the Secretary of State for War, in obedience to the provisions of the Act 9 & 10 Vict. c. 92, under which the said Accounts should have been delivered to them on or before the 30th April 1857.

My Lords have also before them a letter on the same subject from Sir Benjamin Hawes, dated the 24th April last, in which he explains that owing to the extraordinary pressure of business during the past year, the vast increase in the number of Accounts (more than 50 per cent. in excess of the year 1853), and more especially owing to the complicated character of those Accounts, the inexperience of the Accounting officers, and the numerous irregularities occasioned by the late war, it has been found impossible to complete the general Account of *finally audited* expenditure for the year within the time prescribed by the Act of Parliament referred to. To these causes of delay may be added the unavoidable difficulties arising out of the consolidation of the Civil Departments of the Army during the year.

My Lords are aware that the difficulties to which Sir Benjamin Hawes has referred have been very great, and they are satisfied that this failure in complying with the provisions of the Act of Parliament is attributable to circumstances beyond the control of the officers and clerks of the Department, whose extra attendance, according to the statement annexed to Sir Benjamin Hawes' letter, appears to have been exemplary; and they have full confidence in the assurance given that the completion of the Accounts will not be delayed beyond the end of the present month.

While my Lords admit that a sufficient justification exists for the delay which has arisen in the preparation of the Accounts for the year 1855-56, which was one of special pressure and difficulty, they feel it incumbent upon them to impress upon the Secretary of State for War the necessity of causing these annual Accounts to be rendered, in future, to the Commissioners of Audit so that they may be laid before the House of Commons at the earliest possible date after the commencement of the Session.

The period allowed for closing the Account of Naval Receipt and Expenditure, and for rendering the same to the Commissioners of Audit, is only eight months after the termination of the year to which the Account relates; and although a longer period has been allowed for the completion of the Army Accounts, my Lords are of opinion that the time has now arrived when they may reasonably expect that the period for the completion of those Accounts may be shortened. Since the year 1846, when the period of 13 months was fixed, the communication with the most distant colonies has been greatly accelerated, and the same justification for delay in completing the examination and record of the Accounts does not now exist.

Moreover, the inconvenience experienced from the tardy presentation of these Accounts to Parliament has, at different times been complained of by the House of Commons, and strong opinions on the subject have been expressed in the Select Committee on Public Moneys of last Session.

My Lords trust, therefore, that Lord Panmure will take the necessary steps for expediting the completion of the Accounts, so that they may be presented in future years on the 1st March, or earlier, if possible.

Transmit copies of this Minute to Lord Panmure and to the Commissioners of Audit.

A R M Y.

1855-56.

ACCOUNT of the RECEIPT and EXPENDITURE
for ARMY, COMMISSARIAT, and MILITIA SER-
VICES, for the Year ended 31 March 1856.

(Pursuant to Act 9 & 10 Vict. c. 92, s. 2.)

Ordered, by The House of Commons, to be Printed,
15 August 1857.

Examined,
Charles Vine,
Inspector in Charge of Naval and Military Accounts.

By Order of the Board,
C. Macaulay, Secretary.

EXPLANATIONS of the CAUSES of the EXCESSES on the preceding Account.

VOTE No. 2.—VICTUALS FOR SEAMEN, &c. - - - - £.10,932. 7. 1.

This Excess, which is less than one per cent. on the amount voted, arises probably from the value of some of the supplies made for other departments not having been yet claimed, in consequence of the absence of Victualling Accounts or Vouchers; and also, from expenses incurred for Victualling Sardinian and Turkish Troops, which are not to be claimed from the respective Governments.

VOTE No. 3.—ADMIRALTY OFFICE - - - - £. 8,098. 19. 1.

The Excess under this Vote is caused by its having been found necessary still further to increase the Temporary Clerical Force of the Admiralty Departments, as well as the Superintending Staff, in order to meet the pressure of business consequent upon the War, and by the employment of additional Temporary Messengers to meet the increased requirements of the Office; from an increased expenditure for Contract Stamps; from more Travelling Charges having been incurred by the inspection of the progress in the building of Mortar Vessels and Gun Boats; from an increased consumption of Fuel and Lights consequent upon the late hours of attendance; and from increased Law Charges arising out of the purchase of Lund.

VOTE No. 5.—SCIENTIFIC BRANCH - - - - £. 3,579. 8. 6.

This Excess has been occasioned by an extra expenditure for Charts beyond the Vote to meet the requirements of the Baltic and Black Sea Allied Fleets, including the cost of the supplies of Charts for 120 Gun Boats.

VOTE No. 6.—HER MAJESTY'S ESTABLISHMENTS AT HOME - £. 6,553. 19. 6.

This Excess arises from payments on account of Travelling Charges and Subsistence Money to Shipwright Officers, detached from their respective yards, superintending the building of Mortar Vessels and Gun Boats by private contract; from its having been found necessary to increase the number of Temporary Clerks at the several Victualling Establishments to meet the additional duties consequent upon fitting out the Baltic Fleet; from the appointment of two Acting Victualling Store Receivers; and from Lodging Allowances paid to additional Surgeons employed in Haslar and Plymouth Hospitals not provided for.

VOTE No. 7.—HER MAJESTY'S ESTABLISHMENTS ABROAD - £. 5,612. 17. -.

The Excess under this Vote arises chiefly from the demands for War Service at Constantinople having exceeded the provision made upon the very limited data which existed when the Estimates were framed; from an increase to the Establishments at Gibraltar and Malta to meet the requirements of the Fleet in the Black Sea; and from the expenditure on account of the Establishment at Therapia Hospital, for which no provision had been made under this Vote.

VOTE No. 8.—WAGES, HER MAJESTY'S ESTABLISHMENTS AT HOME, £. 22,252. 14. 5.

The Excess under this Vote arises from an additional number of Workmen having been entered and employed extra hours in the several Dock and Victualling Yards, to expedite the fitting out of the Baltic Fleet, and to meet the exigencies of the Service connected with the War in the East.

VOTE No. 9.—WAGES, HER MAJESTY'S ESTABLISHMENTS ABROAD, £. 30,463. 2. 5.

This Excess is caused by more Workmen having been employed than was contemplated, at Gibraltar, Malta, and Constantinople Establishments, in consequence of the requirements of the Black Sea Fleet, the data in office at the time of the Estimate for Labour at Constantinople was framed being insufficient; from the expenditure at Therapia Hospital for Attendants not having been provided for; and from large payments for Extra Pay to Artificers and Seamen of the Fleet repairing Ships, and for the performance of Extra Duties in the Harbour of Balaklava.

VOTE No. 10.—NAVAL STORES, &c. - - - - - £.691,874. 10. 8.

The Excess under this Vote has arisen from its having been found necessary to expedite the building and equipment by private contract of Gun Boats and Floating Batteries for the purpose of meeting the requirements of the Baltic Spring operations, and for which the Lords of the Treasury authorised an additional expenditure beyond the Grant of 500,000 *l*.

The causes of the Excess of expenditure for Naval Stores were the large supplies of Copper required for the numerous Gun Boats built in the private yards; the purchase of Stores at the seat of War in the East; the labour in Coaling the Fleet in the Black Sea; the Repairs of Ships at other than Her Majesty's Dockyards; and the receipts of larger quantities of ship-building Timber than were anticipated when the Parliamentary Estimate was prepared.

VOTE No. 12.—MEDICINES, &c. - - - - - £.4,392. 1. 2.

This Excess arises from the great advance in the price of provisions for all the Naval Hospitals, and from larger supplies being required than were contemplated when the Estimates were framed.

VOTE No. 13.—MISCELLANEOUS SERVICES - - - - - £.32,344. 15. 2.

The Excess on this Vote has been occasioned by more having been paid than voted for Pilotage; the Passages of Naval Officers and Seamen; the Expenses of Telegraphic Communications; Purchase of Books for Seamen; Compensation for Losses by Shipwreck, &c., and for Damage done by Her Majesty's Ships, including 3,413 *l*. paid to the Owners of the "Agnes Blackie," as compensation for her loss by Collision with the "Medina" off Balaklava; Raising Men, and other miscellaneous payments, including damages and costs in connexion with the Blockade in the Baltic, and illegal detention of Russian Prizes (6,078 *l*.); Award for the Seizure in this country of certain Vessels, Engines and Stores intended for the Russian Government, subsequently made available for Naval purposes (1,000 *l*.); Gratuities to Officers for Wounds received during the War (729 *l*.); Wages to Interpreters employed on board the Baltic and Black Sea Fleets (3,000 *l*.); and also for supplies of Provisions and Clothing for the Arctic Searching Expedition, by the Hudson's Bay Company, in excess of the Grant.

VOTE No. 14.—HALF-PAY - - - - - £.12,450. 3. 2.

The Excess under this Vote arises from a larger number of Officers of the higher grades having, through promotions, been placed on the Half-pay Active List in the course of the Year; and from higher rates of Pay, through promotions and deaths, having been paid to Officers on the Reserved Half-pay List, than were provided for; also from the improved Scale of Retirement to the Officers of the Royal Marine Corps, under Order in Council 13th September 1854, having come into operation since the Estimates were framed.

BALANCES IRRECOVERABLE - - - - - £.79. 4. 11.

Balances remaining in the hands of the late Mr. C. Richards, Paymaster of Her Majesty's Ship "Nerbudda," when that Ship was lost at Sea in June 1855 (65 *l*. 16 *s*. 5 *d*.); also in the hands of the Master of the "Dart" Tender, when he was accidentally drowned (13 *l*. 8 *s*. 6 *d*.), have been written off to the above head.

N. B.—The application of the Surpluses under Votes 1, 4, 11, 15, 16, and those for the Transport Service and Prisoners of War, and the Post Office Department (Packet Service), in aid of the Deficiencies on the Grants for the Services above mentioned, has been sanctioned with reference to the provisions of the 29th clause of the Act 18 & 19 Vict. cap. 129.

(signed) R. M. Bromley,
Accountant-General of the Navy.

(Examined) Charles Vine.

Accountant-General of the Navy.

BALANCE SHEET, showing the LEDGER BALANCES on the 31st October 1856; the Date on which the preceding Account of RECEIPT and EXPENDITURE was closed;—also, the Proportion of the AVAILABLE BALANCE remaining on that Day applicable to the still open Account of 1856-57; and the Amount of EXCESS of EXPENDITURE on the Grants for 1855-56, as stated in the preceding Account.

N.B.—To obviate the necessity of introducing into the following Statement the separate results of all the Accounts, the Balances in the Ledger are shown in *Classes*, except in those instances in which it has been deemed advisable to add special explanations, with the view of illustrating the principle upon which the Account has been prepared, and the final Balance struck. The Account of Receipt and Expenditure is one of Receipts and Payments within the Year, and has been kept open for Seven Months after the expiration of the Year to which it refers, that all Payments posted within that period relating to the service of the past Year might be included in it, and the whole Expenditure on Imprest be finally audited before declaring the Balance. The postings of the Receipts and Payments comprised in that Account being therefore spread over a period of Nineteen Months, the proof of the correctness of the Amount of the Excess of Expenditure on the Grants for 1855-56, may be shown either by the Balances which remained on the Books at the Date to which the Account of Receipt and Expenditure extends (viz. 31st March 1856), or by those which remained at the Date when it was definitively closed (viz. 31st October 1856). The Balance Sheet of the latter Date is given, as it exhibits a more complete statement of the Accounts.

Number of Accounts.	DESCRIPTION OF ACCOUNTS.	Drs.			Crs.		
		£.	s.	d.	£.	s.	d.
1	HER MAJESTY'S EXCHEQUER: For Balance of Grants for the Naval Service, unissued on the 31st October 1856 - - - - -	7,658,614	-	-	—

Net Excess - - -			£. 1,612,021 12 5.			

The Excess (£. 1,612,021 12 5) on this Vote is caused by the Expenditure on account of "Foreign Corps" exceeding the amount voted under that head, and by the Expenditure for other services intended to be provided for out of the Vote of Credit for the extra expenses of the late war.

VOTE 3.—STAFF.

	EXPENDITURE.	ESTIMATE.	EXPENDITURE			
			Less than Estimate.		More than Estimate.	
	£. s. d.	£. s. d.	£. s. d.	£. s. d.	£. s. d.	£. s. d.

£.	381,768 14 2	314,984 - -	- - -	66,784 14 2	-	-
Excess - - -			£. 66,784 14 2.			

The Excess (£. 66,784. 14. 2.) on this Vote is caused entirely by the increased charges occasioned by the Russian War, and is equally defrayable out of the Vote of Credit.

VOTE 6.

ROYAL MILITARY ASYLUM, &c. - - - - - Excess £. 239. 15. 3.

The Excess (£. 239. 15. 3.) on this Vote arises from the Expenditure for Clothing, House Linen, and Utensils, Fuel and Light, and Laundry Expenses of the Royal Military Asylum and Normal Schools.

VOTE 15.

COMPASSIONATE LIST - - - - - Excess £. 32,799. 13. 4.

The unforeseen Expenditure under the heads of Allowances to deceased Officers and Gratuities to Wounded Soldiers consequent upon the War, is the cause of the Excess (£. 32,799. 13. 4.) on this Vote.

EXPLANATORY NOTES referred to in the preceding Account—*continued*.

VOTE 17.—OUT-PENSIONS.

	EXPENDITURE.		ESTIMATE.		EXPENDITURE			
					Less than Estimate.		More than Estimate.	
	£.	s. d.	£.	s. d.	£.	s. d.	£.	s. d.

Excess - - - - - £. 55,577. 16. 4.								

The Excess (£. 55,577. 16. 4.) on this Vote is caused by the number of Men placed on the Pension List from Wounds and Disabilities caused by the late War, exceeding the number of Vacancies on the List during the same period.

The following Amounts have been written off as Irrecoverable, viz.:—

Balance due by W. A. Kirk, late Paymaster 16th Foot - -	£. 49 11 1
Money stolen from Accountants of the Land Transport Corps in } the East - - - - - }	1,070 18 4
	£. 1,120 9 5

COMMISSARIAT.

VOTE 1.—EFFECTIVE SERVICES.

	EXPENDITURE.		ESTIMATE.		EXPENDITURE			
					Less than Estimate.		More than Estimate.	
	£.	s. d.	£.	s. d.	£.	s. d.	£.	s. d.
Commissariat Effective Services - - -	£.	5,650,956	7 10	4,919,534	- -	-	731,422	7 10

The Excess (£. 731,422. 7. 10.) on this Vote is caused entirely by the increased Charges occasioned by the Russian War, and is defrayable out of the Vote of Credit.

Note.—The Surplus on Votes 4, 5, 9, 10, 11, 12, 13, 14, 16, 18, Commissariat Vote 2, and Disembodied Militia, has been applied in aid of the differences on the Grants for the Services above mentioned, as sanctioned with reference to the Provisions of the 27th Clause of the Act 17 & 18 Vict. c. 121.

M E M O R A N D U M.

THE following EXTRA RECEIPTS for the Year 1855-56, amounting to £. 89,332. 8. 7., have been paid over to Her Majesty's Exchequer, in conformity with the Treasury Minute of the 2d May 1848, instead of being appropriated on the Estimates.

BALANCE SHEET, showing the LEDGER BALANCES on the 31st March 1857, the Date on which the foregoing Account of RECEIPT and EXPENDITURE was closed.

N. E.—To obviate the necessity of introducing into the following Statement the separate results of all the Accounts, the Balances on the Ledger are shown in *Classes*, except in those instances in which it has been deemed advisable to add special explanations, with the view of illustrating the principle upon which the Account has been prepared, and the final Balance struck. The Account is one of Receipt and Expenditure within the Year, and has been kept open for Twelve Months after the expiration of the Year to which it refers, in order that all Payments posted within that period, relating to the said Year, might be included in it, and the whole expenditure on Imprests be audited before declaring the Balance. The postings of the Receipts and Payments comprised in that Account being therefore spread over a period of two complete Years, the proof of the correctness thereof may be shown either by the Balances which remained in the Books at the Date to which the Account of Receipt and Expenditure extends (*viz.* 31 March 1856), or by those which remained at the Date when it was definitively closed (*viz.* 31 March 1857). The Balance Sheet at the latter Date is given, as it exhibits a more complete Statement of the Accounts.

For explanation of excess, see next page.

(signed)

PANMURE.

By Order of the Board,

C. Macaulay, Secretary.

(Examined)

Charles Vine,
Inspector in Charge of Naval and Military Accounts.

VOTE No. 1.—PAY, ALLOWANCES, and CONTINGENCIES, ORDNANCE MILITARY CORPS, £. 329,386. 2. 3.

This excess arises from an addition of 6,000 Men to the Royal Artillery and Engineers, the extra expense occasioned by the introduction of the Tunic Pattern, the same being at least 6 s. per Man dearer than the Coatee, and the Gratuitous Issue of an extra suit of Clothing to each Man in the Winter of 1855-56.

VOTE No. 2.—COMMISSARIAT and BARRACK SUPPLIES - - - - £. 651,180. 13. 6.

The excess on this Vote is occasioned by the Supplies of Barrack Stores and Hospital Bedding for the Crimea and Scutari, having been issued upon a much larger scale than was contemplated when the Estimates were prepared.

VOTE No. 3.—ORDNANCE OFFICE - - - - £. 5,053. 3. 4.

This excess is caused by the appointment of Captain Caffin as Naval Director of Artillery, at a Salary of 900 £. per annum subsequent to the preparation of the Estimate, an augmentation to the Establishment in consequence of the War, and an increased Expenditure on account of Law Charges.

VOTE No. 4.—ESTABLISHMENTS at HOME and ABROAD - - - - £. 64,589. 5. 3.

This excess arises from the entirely new or greatly Augmented Establishment at Balaklava, the Bosphorus, Malta, &c., and an increased Expenditure under various items of Barrack Expenditure consequent upon the War.

VOTE No. 5.—WAGES of ARTIFICERS and LABOURERS at HOME and ABROAD - £. 28,222. 10. 4.

The excess on this Vote arises from the necessity of increasing the number of Artificers and Labourers at the Seat of War and Stations contiguous to it, as well as at the Manufacturing Departments at Woolwich, to meet the pressing demand for Warlike Stores of all descriptions.

VOTE No. 6.—ORDNANCE STORES for LAND and SEA SERVICE - - - £. 707,266. 17. 3.

This excess is occasioned by the vastly increased demand for Iron Ordnance, Shot, Shells, &c., Waggon, Harness, &c., for the Land Transport Corps, Huts for the Crimea, and Stores of various descriptions required in the prosecution of the War.

VOTE No. 7.—WORKS, BUILDINGS, and REPAIRS - - - - £. 231,650. 16. 7.

This excess is solely attributable to the extensive Engineer Works carried on at the Seat of War under the direction of the Commander of the Forces, the nature and extent of which were not known when the Estimates were framed.

BALANCES due by the following ACCOUNTANTS which have been written off as irrecoverable - £. 1,688. 3. 7.

	£.	s.	d.
E. Black, Storekeeper, Dominica - - - - -	246	17	1

FOREIGN CORPS.

RETURN of the Names and Places of Abode
of OFFICERS of DISBANDED FOREIGN CORPS
who are in receipt of HALF-PAY and REDUCED
ALLOWANCES for Service in the War which
ended in 1815: Like RETURN of PENSIONS
for WOUNDS: And, like RETURN of ALLOW-
ANCES for WIDOWS and CHILDREN.

(*Mr. Locke King.*)

*Ordered, by The House of Commons, to be Printed,
24 June 1857.*

FOREIGN LEGIONS.

RETURN to an Address of the Honourable The House of Commons,
dated 16 June 1857 ;—for,

- “ RETURNS of the Number of OFFICERS, NON-COMMISSIONED OFFICERS, and MEN Enlisted in each of the FOREIGN LEGIONS during the late War ; stating in Detail all Expenses incurred for Recruiting, Embodying and Concentration of each Corps ; Arming, Equipping, and Clothing ; Bounty, Pay, and Cost of Subsistence while serving ; any Gratuities on Discharge, and Allowance for Conveyance to their Homes ; the Number of each employed on active Service during the War, and the Stations at which the Remainder were quartered :”
- “ Of the Date of Embodiment and of the Disbanding of each :”
- “ Of the Quantity of LAND granted to each Officer, Non-Commissioned Officer, and Soldier of any Foreign Legion, either at the *Cape of Good Hope* or elsewhere :”
- “ Of the Amount of any GRATUITY given to each, either for the Erection of Houses in lieu of them, or other purpose :”
- “ Of the Amount of any PAY or ALLOWANCE granted to each, and the Services they are expected to perform :”
- “ And, of the ANNUAL EXPENSE of Arming, Clothing, and Subsisting these SOLDIERS ; together with the Numbers of each Rank who have been thus located.”

War Office, }
June 1857.

JOHN WILLIAM RAMSDEN.

£.	687,800	235,486	195,655

Note.—The arms were lent by Her Majesty’s Government, and returned into store, repairs having been paid for by the men.

STATIONS, &c.

GERMAN LEGION.

FOUR regiments, 4,250 strong, were sent to the seat of war; they were stationed at Kulilee, on the Bosphorus, when peace was proclaimed.

The other stations were, the depôts at Heligoland and Shorncliffe, at Haslar Barracks, and in camp at Aldershot, Colchester, Hythe, Terlingham, and Browndown.

SWISS LEGION.

A BRIGADE, 2,200 strong, was sent to the seat of war; it was stationed at Smyrna when peace was proclaimed.

The other stations were, the depôts at Schlestadt and Dover, and in camp at Aldershot and Shorncliffe.

ITALIAN LEGION.

IN Italy, Novara, Suza, Chivasso; subsequently at Malta. Emigrants at York, Burnley, and Ashton.

No men were sent to the seat of war.

RECRUITING Commenced—

For the German Legion, in May 1855, and continued until 31 March 1856.

For the Swiss Legion, in May 1855, and continued until 28 February 1856.

For the Italian Legion, in October 1855.

DISBANDMENT finally Completed—

German Legion	-	-	-	-	-	-	November 1856.
Swiss Legion	-	-	-	-	-	-	October 1856.
Italian Legion	-	-	-	-	-	-	December 1856.

GERMAN MILITARY SETTLERS at the *Cape of Good Hope*.

Land granted to each non-commissioned officer and private, if located in a town already inhabited by an European population - - - - - } A building lot on which to erect his house.

Ditto, if located in a village or new settlement - - - - - } Ditto, and an acre of garden ground.

Ditto, to each officer - - - - - { Building and garden lot of at least double the extent of that of a non-commissioned officer or private.

The public lands in the colony being disposed of only by sale, officers will be allowed in the purchase of such lands a remission of the purchase money, according to the following scale :—

TOTAL - - - £.	1,420,349	17	-½

Memorandum.—Although the Balance of this Account appears to be as above, yet there is in the Three per Cent. Consols 57,102*l.* 19*s.* 10*d.* Stock invested on account of Army Prize Money, and in the Bank of England 6,357*l.* 0*s.* 2*d.* Cash. The existence of this amount of Stock and Cash, notwithstanding the Balance is upon the Debit side, arises from the Investments in the Stock having been made when the Funds were very low, and from the sales thereof, as occasion required, having been from time to time effected when the prices were considerably higher.

Royal Hospital, Chelsea, }
August 1857.

A. J. Moorhead,
Secretary and Registrar.

ARMY PRIZE MONEY.

THE ACCOUNT of UNCLAIMED ARMY PRIZE
MONEY, from 18 January 1809 to 31 Decem-
ber 1856; directed to be Annually laid before
the Houses of Parliament by the Act 2 Will. 4,
c. 58.

PANMURE.

REPORT OF THE COUNCIL OF MILITARY EDUCATION.

PART I.

ON EXAMINATIONS FOR DIRECT APPOINTMENTS.

1. THE Council recommends, that the system of examinations to be presently described shall commence in January 1858.

2. That the examinations be held quarterly in London, and conducted under the direction of the Council, by examiners to be appointed annually by the Commander-in-Chief, with the concurrence of the Secretary of State for War. The examiners to be wholly unconnected with any schools or places of instruction furnishing candidates for examination.

3. That in order to allow sufficient time for the completion of a liberal education, the age of candidates examined for direct appointments be from the 1st January 1858, not under 17 years, and after the 1st January 1859, not under 18 years, the latest limit being in each case 21 years.

4. The candidate to produce a certificate of baptism, or other satisfactory proof of his age.

The candidate to be examined by a medical board, to ascertain that he is in every point of view, as regards his physical constitution, fit for military service.

He will produce a certificate from a minister of the church, or of the denomination to which he belongs, that he has been duly instructed in the principles of religion.

The candidate further to produce a certificate from the master or tutor under whom he has been educated, of his general moral conduct for at least the two preceding years.

He will also forward, when reporting himself prepared for examination, a statement of the subjects in which he wishes to be examined, including the names of the classical authors, and, in the case of history, the course he has been reading.

5. The following to be the subjects of examination ; viz. :

The Classics.

Mathematics.

English Language.

French Language.

Other Modern Languages.

History, Ancient and Modern, with Geography.

Natural Sciences ; *i. e.* Mineralogy and Geology.

Experimental Sciences ; *i. e.* Chemistry, Heat, Electricity, including Magnetism.

Drawing.

2 FIRST REPORT OF THE COUNCIL OF MILITARY EDUCATION.

Of the above, a thorough knowledge of the following portions of subjects will be deemed indispensable, and the want of it considered a ground of disqualification; viz.:

In mathematics: arithmetic, including vulgar and decimal fractions; proportion; extraction of the square and cube root, and interest; algebra, including fractions, simple equations and questions producing them; and the use of logarithmic tables.

Euclid, the first four books.

2. In the English language the candidate will be required to write correctly, and in a good legible hand, from dictation.

To compose grammatically.

3. In the French language, to read, translate, and parse a prose author, and to write from dictation.

4. In history, that of England and its dependencies (with geography) will be required.

5. In drawing, the candidate will be required to show that he has a fair use of the pencil.

6. To each of the subjects enumerated in paragraph 5, it is proposed to allot marks as follows; viz.,—

Classics	-	-	-	{Latin - 2,000}	-	-	-	3,600
				{Greek - 1,600}	-			
Mathematics, pure and mixed	-	-	-	-	-	-	-	3,600
English language	-	-	-	-	-	-	-	1,200
French language	-	-	-	-	-	-	-	1,200
Any other modern language	-	-	-	-	-	-	-	800
History, with geography, ancient and modern	-	-	-	-	-	-	-	1,200
Natural sciences, mineralogy and geology	-	-	-	-	-	-	-	600
Experimental sciences, chemistry, heat, &c.	-	-	-	-	-	-	-	600
Drawing	-	-	-	-	-	-	-	500

Out of the above, there will be allotted to the portions of subjects noted in paragraph 5 as indispensable, marks as follows:

Mathematics	-	-	-	-	-	-	-	1,200
English	-	-	-	-	-	-	-	400
French	-	-	-	-	-	-	-	400
History, &c.	-	-	-	-	-	-	-	400
								2,400

And of these, at least three-fourths in each subject will be required from all candidates, making in all 1,800 marks as a minimum in the subjects deemed indispensable.

In respect to the other subjects, or portions of subjects, left as voluntary for examination, it will be required that in these such a number of marks shall be obtained as shall raise the total number necessary for qualification to 3,000.

The system of marks above recommended is hereto annexed for the sake of clearness, in a tabular form.

7. In estimating the marks attained at the quarterly examinations, no subjects left voluntary will be allowed to count, unless one-fifth of the number allotted to them be gained.

With regard to the classics, the Council is of opinion that no particular authors, or portions of authors, should be announced as those in which candidates are to be examined, but that a sufficient number of printed questions should be prepared, of different degrees of difficulty, and as varied as possible, in the books usually read at schools, so as to place candidates from different educational establishments on an equal footing.

Passages will be set for translation from the classical and modern languages into English, and also from English into those languages.

No candidate to be allowed more than two trials, but the second may take place at any interval after the first, provided the limit of age be not exceeded. In the second examination, no credit to be given for any subjects in which the candidates

candidates may have passed in the first, but all his subjects to be taken up afresh.

8. It is recommended that the result of each quarterly examination should be reported to the Commander-in-Chief, and that the names of any candidates who distinguish themselves should be specially brought to his notice.

9. In this Report, the Council has confined its attention to the question of examinations for direct appointments; and in order to facilitate the consideration of the plan now submitted, the Council has not mixed up with it any matters of mere detail, not absolutely necessary for the estimation of the value of the principles it desires to establish.

The Council, however, thinks it right to state, that the proposed arrangements, being based upon the leading principle that nothing should be required from candidates but those studies which may be considered nearly equally valuable in every walk of life, so that the time devoted to their acquisition should not have been thrown away, even by those unsuccessful at the military examination, it has not been thought expedient to require from candidates any knowledge of strictly professional subjects, as, for example, of fortification, military drawing, &c.

It therefore becomes necessary to facilitate the acquisition of such knowledge by a subsequent course of military instruction, on which the Council will report hereafter.

Lastly, the Council strongly recommends that commissions should at first be only considered provisional, and not be finally confirmed until the candidate shall have passed through a course of regimental and general professional instruction, which will be defined in a subsequent report.

MILITARY EDUCATION.

FIRST REPORT

OF THE

COUNCIL OF MILITARY EDUCATION.

(*Presented by Command of Her Majesty.*)

*Ordered, by The House of Commons, to be Printed,
31 July 1857.*

223—Sess. 2.

Under 1 oz.

NETLEY HOSPITAL.

RETURN to an Address of the Honourable The House of Commons,
dated 9 June 1857;—for,

“ RETURNS respecting NETLEY HOSPITAL, showing by whom the Site was selected, whether any Reports were made on its Salubrity and general eligibility for its purpose, previous to Selection, and by whom :”

“ By whom the Original Plans were prepared, whether they were submitted to any Medical Authority for Approval, by whom they were officially sanctioned, and whether any Report was made upon them, and by whom, previous to their being sanctioned :”

“ STATEMENT of the Alterations of or Additions to the Original Plans which have been determined on, by whom they were recommended, to whom they were referred for Approval :”

“ And, COPY of CORRESPONDENCE or REPORTS relating thereto which have led to the adoption of the amended Plan.”

War Office, }
13 July 1857. }

JOHN WILLIAM RAMSDEN.

LETTER from Captain *R. M. Laffan*, Deputy Inspector-general of Fortifications,
to the Right Hon. Lord *Panmure*, K.T., G.C.B.

My Lord,

War Office, Whitehall Gardens,
11 July 1857.

HAVING been directed by your Lordship to prepare the returns respecting the Royal Victoria Hospital at Netley called for by the Address of the House of Commons of the 9th ultimo, and the plans called for by the Address of the House of Commons of the 19th ultimo, I have the honour to lay before your Lordship returns and plans which I think afford all the information called for by those addresses.

But as those returns and plans, drawn up expressly to meet the terms of the addresses, do not afford all the information which I think it would be desirable to furnish to the House of Commons on the subject, I would suggest to your Lordship whether it might not be expedient to cause them to be accompanied by a brief history of the several steps taken by your Lordship's orders—first, with a view to the selection of a proper site for the hospital; and next, for the purpose of obtaining a good design for the buildings.

The first step was taken in March 1855, when your Lordship requested Sir John Burgoyne, G.C.B., Inspector-general of Fortifications, to appoint an officer of engineers to assist you in the selection of a site for a great military hospital.

Sir John Burgoyne appointed me for that duty; and on my waiting upon your Lordship, you told me that the Government proposed to erect a military hospital capable of receiving 1,000 patients, and that in your opinion such an establishment should be so situated as to be easy of access from the sea, in order that invalids returning from foreign service, and sick and wounded soldiers sent home from the seat of any foreign war, might be transferred from the ships to the hospital with the least possible amount of land carriage.

You added, that the south coast appeared to you to possess advantages for this purpose over any other, and that it would be for the advantage of the public service if the hospital could be placed within a moderate distance of either of the great naval stations at Portsmouth or at Plymouth.

You directed me, therefore, to examine, in the first instance, the neighbourhood of Portsmouth Harbour, and to report to you whether any site could be found in that vicinity possessing those advantages in respect of general salubrity, the nature of the soil, the supply of water, the facilities for drainage, and the readiness of access from the sea, or from the inlets of the harbour, which were required for the purpose the Government had in view.

You directed me to call upon the Director-general of the Army Medical Department, Dr. Andrew Smith, to inform him of your Lordship's views, and to request him to appoint a medical officer in whose judgment on such a question he felt confidence, to accompany me to Portsmouth, and to report in conjunction with me upon any site we might select.

On repeating to Dr. Andrew Smith all that your Lordship had told me, he informed me that he would appoint Dr. Mapleton, staff surgeon, who had been Lord Raglan's personal medical attendant in the East, to report with me upon the subject your Lordship had referred to us.

On 12th March 1855, Dr. Mapleton and I proceeded to Portsmouth, and after having examined the ground about that place, and about Gosport, we reported to your Lordship that the best site in that neighbourhood appeared to us to be an open space facing the sea, between Fort Monckton and Haslar, on the Gosport side of the harbour.

A few days afterwards, however, your Lordship having been informed that Porchester Castle and the ground about it presented a better site for the intended buildings, Dr. Andrew Smith sent Dr. Mapleton to meet Major-general Sir Frederick Smith, R.E., to report with him on that locality. The report of those officers was unfavourable.

Subsequently, in May 1855, in consequence of some communication between your Lordship and Sir James Clark, Bart., M.D., you sent for me, and informed me that Sir James had urged some grave objections to the site at Haslar, and had pointed out to you that a much better site might be found on the eastern shore of the Southampton Water.

You directed me to call upon Sir James, and to examine and report to you upon the locality which he would point out to me. You told me to communicate first with the Director-general of the Army Medical Department, and request him to appoint a medical officer in whom he had confidence, to examine the proposed site with me, and to report with me as to its eligibility. On leaving your Lordship, I went at once to Dr. Andrew Smith's office, and he appointed Dr. Mapleton for that duty.

I then called upon Sir James Clark, who informed me that there were, in his opinion, numerous objections to be urged against the site at Haslar; amongst others, that the circumstance of there being two very large hospitals so near each other would be disadvantageous, and that the climate was not favourable to the restoration of health in cases of convalescents or invalids returning from warm climates.

Sir James told me that he had frequently been struck with the numerous advantages, as a site for a great military hospital, presented by the sloping ground on the eastern shore of Southampton Water, a little below Netley Abbey; that the ground there seemed to be gravelly, and to slope upwards from the water, while there was a high ridge behind it, which sheltered it from the cold northern and eastern winds.

Sir James handed me a letter he had received from Professor Ramsay, Director of the Geological Survey of Great Britain, in which Professor Ramsay informed him that he had just returned from Southampton; that the ground on the eastern bank of the river was deep dry sand and gravel; that it sloped well up; and that he had no doubt a good spot could be selected, sheltered from the east winds. The letter added, that the greater part of the country, on both sides of the river, was gravelly.

Finally, Sir James handed me a strip cut from the Ordnance Survey of Hampshire, upon which he had marked the place he wished Dr. Mapleton and myself more particularly to examine; and he added, that he thought we should there find a site possessing advantages superior to those presented by the site at Haslar.

On

On 18th May, Dr. Mapleton and I examined the whole of the ground about Netley, and at the place marked by Sir James on the map, about a mile below Netley Abbey, we found a space of ground of about 100 acres, presenting a gravelly bank or cliff from 10 to 25 feet in height to the water, and rising from thence upwards at a gentle slope till it joined a higher ridge behind it. The soil consisted, as described by Professor Ramsay, of deep dry sand and gravel, resting in some places on beds of brick earth. The facilities of drainage were very great. The water in a small well in one of the fields was of excellent quality; and there were several streams in the vicinity from which water for baths and other such purposes could be led to the buildings; the means of landing could be provided by carrying out a jetty into Southampton Water; and the concurrent testimony of all the people living near the spot declared the neighbourhood to be eminently healthy.

There was one circumstance connected with the proposed site which attracted our particular attention; the existence of a wide extent of sand, intermixed with mud, which was left uncovered at low water, and the exhalations from which we at first thought might be a source of unpleasantness, if not actually prejudicial to health. At the time of year we examined the place we could not perceive any offensive smell; but we asked all the people we could find in the neighbourhood whether, during the hot summer months, such offensive smells were not perceived. We were told that some miles higher up the river, where a good deal of vegetable matter was deposited with the mud, offensive effluvia might at times be perceived, but that, at the place where we stood, no such inconvenience had ever been felt.

There was then, as there still is, on the beach a small vessel, the Partridge brig, permanently fixed and embedded in the mud and sand, just opposite to the centre of the proposed site, forming a dwelling for a party of the Preventive Service, with their wives and children. This vessel, at low water, is entirely surrounded by the wide expanse of mud and sand; and we thought, therefore, that the men and women and children living on board would be good witnesses to examine as to the healthiness of the place, and as to any inconvenience which might arise from the vicinity of the mud.

We found them all unanimous in declaring that their dwelling was healthy; that at times, at low water, a slight smell might be perceived from the mud, but that it was not at all offensive, or injurious to health. Their statements were borne out by their appearance; all looked healthy, particularly the children.

On returning to town, Dr. Mapleton and I reported to your Lordship that the place pointed out by Sir James Clark appeared to us to possess many advantages over the site at Haslar, and that we considered it peculiarly eligible. We gave a detailed description of the place, mentioning the existence of the mud; but stating at the same time that from all we had been able to observe, and from what we had learnt from the people on the spot, we were of opinion that its vicinity would not be prejudicial.

I then called upon Sir James Clark and informed him of the result of our inspection, and Dr. Mapleton waited upon the head of his branch of the service, Dr. Andrew Smith, and informed him of the favourable opinion he had formed of the newly proposed site, offering at the same time to supply him with a copy of our joint report. Dr. Mapleton informed me that Dr. Smith had declined to have a copy of the report; and that he had told him it was he himself (Dr. Smith) who had first pointed out to Sir James Clark the advantages of Netley as a site for a great military hospital.

It appears that the Director-general of the Army Medical Department had also pointed out the same locality to your Lordship; for in a letter addressed to your Lordship, on 5th January 1856, pointing out the deficiencies in every respect of the general hospital at Chatham, he says, "In my opinion, the general hospital for the purpose for which that at Fort Pitt is employed should be on the coast, or in some large inlet of the sea, so that the invalids from abroad could be landed immediately and marched into their barracks, while the sick could without injury be placed in hospital. In conversation, last year, I more than once pointed out what I considered the proper locality, viz., a district close to Netley Abbey, below Southampton."

Dr. Mapleton also informed me, that before leaving the Director-general he had pointed out to him the existence of the wide extent of sand and mud left uncovered at low water, stating that he was not inclined to attach any weight to it;

it; but that on a question of such great importance, it would be satisfactory to him if Dr. Smith would himself visit the place, in order to form an opinion.

The Director-general did not examine the place at the time; but on 14th March 1856, he reported to your Lordship that he had carefully examined the locality, and conversed on the subject with various medical practitioners, and other persons resident in the neighbourhood, and that he had no reason to believe that there was anything in the nature of the locality itself, or in that of its vicinity, calculated to generate disease, or to operate unfavourably to the restoration of health.

On receiving the joint report of Dr. Mapleton and myself, in May 1855, your Lordship did not immediately make up your mind to purchase the site at Netley. In June 1855, you caused two other proposed sites to be examined, Herstmonceaux, in Sussex, and Appuldercombe, in the Isle of Wight. Dr. Mapleton was sent by the Director-general of the Army Medical Department to report upon both places, in conjunction with Captain Ross, of the Royal Engineers. Both reports were unfavourable.

On 21st August 1855, negotiations were, by your Lordship's instructions, entered into for the purchase of the ground at Netley, and on 3d January 1856, you authorised an expenditure of 15,000 *l.* for the purchase of 109 acres, 1 rood and 32 perches of land.

This concludes the history of the several steps taken by your Lordship's orders for the purpose of obtaining a site for the new Hospital.

On 27th January 1856, your Lordship appointed a committee, consisting of Colonel O'Brien, Assistant Quartermaster-general, Horse Guards, of Dr. Mapleton, M.D., and of myself, to prepare an outline plan of the new Hospital, and to report to you on the nature of the accommodation it was desirable to provide. You instructed the committee to place themselves in communication with the Director-general of the Army Medical Department, and to receive any suggestions that officer might make; and at the request of the Director-general, you sent an engineer officer to Rotterdam, to procure for the committee the details of the internal arrangements of a great civil hospital in that city, which Dr. Smith had been informed was one of the best planned on the Continent.

While that officer was absent on his mission, Dr. Mapleton examined all the great civil hospitals of London, and consulted with many of the medical men attached to them as to the internal arrangements it would be desirable to adopt in the new building; and during the whole time the plans were being prepared by the committee Dr. Mapleton was in daily communication with the Director-general of the Army Medical Department, and the committee adopted every suggestion that was made by that officer.

In a conversation I had with your Lordship on the subject, you told me that in your opinion it would be desirable that a hospital on such a large scale as Netley should be divided into a number of detached blocks, separated from one another by intervals, as wide as the nature of the site and the convenience of the inmates would admit, but connected by a covered gallery for general communication.

At the first meeting of the committee, the question discussed was, whether to recommend that the new Hospital should thus be divided into a number of separate blocks, or that the wards should be grouped together in larger masses of buildings.

The division of a large hospital into a number of separate blocks is attended with an increase of expense. Within moderate limits, that increase is more than compensated by the advantages accruing to the patients; but if the division be carried too far, the additional cost becomes enormous, and the numbers of the nurses, orderlies, and other attendants, must be greatly increased, in order to provide efficiently for the service of an establishment so widely scattered.

It would have been practicable, for instance, to have divided the buildings of the Hospital at Netley into as many as 10 blocks. To that extent the division need not have entailed an increase in the cost disproportioned to the advantages to be gained, or have necessitated the employment of a much larger number of attendants.

The views of the committee were at first favourable to such an arrangement, but when they came to study the details they found it impossible to carry those views into effect.

The great object which is sought in the division of a hospital into separate blocks,

blocks, is to have wards communicating directly with the outer air by windows on opposite sides, so as to get the greatest amount of light and sunshine, and to have in the opposite rows of windows the means of ensuring the most perfect natural ventilation.

In order to attain that end, it is necessary that each floor of each detached block should form one large ward, having the staircase, and, if desired, a small room for two patients, at the end next the covered gallery of communication, having then a row of windows on each side of the great ward, and having at the other end a nurse's room, the bath room, water-closet, and other necessary appendages. This is the system of construction usually followed in France.

The addition of a second ward on the same floor would greatly impair the value of the separate block system; for if the two wards were placed side by side, they would both be deprived of the advantage of having opposite rows of windows, and if they were placed end to end, it would be necessary to pass through one ward in order to reach another, an arrangement always considered most objectionable.

It appeared, therefore, to the committee, that if the French system of detached blocks were to be adopted, it would be necessary also to propose to have wards of large size, capable, as in France, of receiving from 30 to 40 patients; for as the buildings could not be carried with advantage higher than three stories, each detached block would only supply three large wards, with three smaller rooms, each holding two patients.

If, therefore, the building at Netley were to be divided into ten blocks, it would be necessary that each large ward should be capable of containing 32 patients; and as few military hospitals in this country had hitherto been constructed with rooms on so large a scale, the committee referred for instructions to the Army Medical Department, as to whether they might propose to place so many patients in one ward.

The committee was informed that the Director-general of the Army Medical Department was decidedly opposed to the adoption of such large wards in a military hospital. The committee found that the opinions of the Director-general on this question were shared in by all the military surgeons they consulted, and that the officers of the army also considered that it would be difficult, if not impossible, to maintain proper discipline in a ward containing so many sick soldiers.

The general opinion of the medical men, and of the military officers who had had experience in the management or superintendence of military hospitals, was, that the average number in a ward should not exceed 10.

With that number, the system of detached blocks, as adopted in France, was obviously impracticable at Netley; for at least 30 of those blocks would be required for the 1,000 patients for whom provision was to be made, and the covered gallery connecting the blocks would be more than a mile in length.

The committee, therefore, though somewhat reluctantly, gave up their original idea of separating the buildings into detached blocks, and proposed the system of construction shown upon the plans, and in the report which they had the honour to submit to your Lordship.

Before submitting those plans to your Lordship, the committee laid them before a medical committee appointed by the Director-general of the Army Medical Department, and presided over by that officer himself.

The medical committee consisted of—

Dr. Andrew Smith, M.D., Director-general of the Army Medical Department.

Dr. Cumming, M.D., Inspector-general of Hospitals.

Dr. Dumbreck, M.D., C.B., Deputy Inspector-general of Hospitals.

Dr. Forrest, M.D., C.B., Deputy Inspector-general of Hospitals.

And after all the external and internal arrangements had been fully explained and discussed, the medical committee unanimously approved of the plans.

The plans were next submitted to your Lordship, and after you had examined and approved of them, you submitted them to Her Majesty, who was graciously pleased to approve of them also.

On 2d March last, Mr. Gregson, M.P., forwarded to your Lordship a memorial, signed by the medical men connected with the Middlesex Hospital, urging some objections against the plans of the new Hospital, and suggesting that your Lordship should put a stop to any further progress in the building till those

plans should have been referred to a few medical men connected with some of the best constructed civil hospitals of London, who might confer with the committee by whom the plans had been prepared, and submit to your Lordship the result of their joint deliberations.

Your Lordship complied with the suggestion of the memorialists; you ordered the committee by whom the plans had been prepared to re-assemble, adding to their number Dr. Sutherland, who had acquired most valuable experience in the management of military hospitals in the East; and you instructed the committee to reconsider the plans of the new Hospital, to confer with the principal medical men of the Middlesex Hospital, and of the other great civil hospitals of London, and to report to your Lordship the opinion of the medical men, as well as their own.

The committee re-assembled in compliance with your Lordship's instructions. Dr. Sutherland joined them; and after having carefully reconsidered the plans, and conferred with the medical men deputed to represent the opinions of the medical staff of the Middlesex Hospital, and with medical men connected with six other great civil hospitals in London, they addressed to your Lordship a report, stating the opinions of the committee, and those of the medical men with whom they had conferred, and recommending some modifications in the original plans.

In order to show more clearly the nature of those modifications, a fresh set of plans were prepared, and after having been examined and approved by the Director-general of the Army Medical Department, they were submitted to your Lordship on the 7th instant. You approved of them, and submitted them to Her Majesty, who, on the 9th instant, was graciously pleased to approve of them also.

I have now completed the history of all the circumstances connected with the selection of the site; the preparation of the original plans; and the modifications subsequently made in them. In conclusion, I wish to add a few observations.

The memorial of the medical men connected with the Middlesex Hospital informed your Lordship that the great principle upon which all good hospitals are constructed, is, that the wards should open into the external air, on at least two sides, and have windows which are placed opposite to one another. It stated that this principle was carried out in all the plans now adopted for military hospitals on the Continent, and especially in France; and it enclosed as an example a ground plan of a great military hospital at Bordeaux, where the buildings are divided into detached blocks, and the whole of each floor of each block forms a single ward of large size, intended to hold 40 patients.

The memorial pointed out that this style of construction was diametrically opposed to that shown on the plans of the Hospital at Netley, and it expressed a strong opinion that the wards of the new Hospital were too small, as experience had shown, that in wards which are very high in proportion to their breadth, there occurs a stagnation of air which it is almost impossible to overcome.

In all these statements and opinions I am inclined to agree with the memorialists. I prefer the French system of construction, that of detached blocks and large wards, to the system shown on the plans of the new Hospital; but I have already explained that the detached block system can only be followed when wards of large size are allowed; and that the Director-general of the Army Medical Department, and the great majority of the medical men attached to the army, and most military officers, think large wards objectionable in a military hospital.

The Hospital at Netley is intended for the reception of military men, who are to be attended by military doctors; and it seems to me, therefore, that it would have been unreasonable to have passed over the opinions of the military branch of the medical profession, in order to follow those of an engineer officer, and of the medical men connected with a civil hospital.

The memorialists objected to the corridor or closed gallery, which extends along the front of the building, that it would shut out the sun, intercept the currents of air, which might otherwise be directed through the wards, and form instead a permanent receptacle for the contaminated effluvia which escaped from them.

As first planned, the corridor in question was open; that is to say, it was simply a colonnade, the columns connected together on each floor by a series of arches. It was intended that the colonnades should be left open in fine weather, and that in winter the openings should be wholly or partially closed by means of glazed sashes. In deference to the opinion of a medical officer, who thought that a corridor so open would be liable to great and sudden vicissitudes of temperature, and that the admission of so much sunlight would cause an excess of glare, an ordinary wall, with windows corresponding to the doors and windows of the wards, was substituted for the columns and arches; but on reconsidering the subject, seeing the strong objections which were urged against the closed corridor, the committee recommended to your Lordship to revert to the original design.

The memorialists appear to think that the corridor should, if it were adopted at all, have been placed on the north-east, instead of the south-west side of the building.

The corridor has been adopted as the most convenient means of communication between the different parts of so vast a building, and as forming at all times an agreeable promenade for those patients who may be sufficiently recovered to render a little exercise desirable, but whom it would be imprudent to permit to venture into the open air. It has been placed on the south-west side, because it will then command a fine view over a beautiful country, whereas had it been placed on the north-east side it would have overlooked nothing but kitchens and out-offices.

By its position on the south-west side also, the corridor helps most materially to preserve the wards from that great evil, dampness; for the south-west is the rainy quarter; and the storms of rain which are brought up by the south-west winds beat with great violence against all the buildings erected along Southampton Water, and render it very difficult to keep the rooms on that side dry.

The memorialists object entirely to the adoption of any system of artificial ventilation, as they are satisfied, by experience already obtained, of the uncertain efficacy of all such systems. On this subject I am unable to agree with them; for though their experience may appear to justify such a conclusion, it does not follow that, because the systems they have seen in action have been failures, all other systems should be condemned.

In the French hospitals, which they quote as models, artificial ventilation is always adopted in aid of the natural means afforded in the doors and windows, and the medical men connected with the French hospitals attribute much of the success of their treatment to the increased supply of pure air introduced by artificial means.

At Netley the means of ensuring the most perfect natural ventilation are afforded to an extent rarely, if ever, seen in any existing hospital. Each room, meant for only nine patients, contains 13,000 cubic feet of air, and has three lofty windows opening to the outer air; two more very large windows and a door opening to the open corridor; and an open fire-place, one of the best agents of ventilation.

But in the cold winter season it is most probable that all these windows and doors will be kept closed, and that even if some of them were partially opened by the attendants, they would be closed again by the patients; for the dislike of soldiers to the admission of cold air into any room occupied by them is a fact too well known to all who have had any experience in the military service.

I think it desirable, therefore, that the means of ensuring what is called artificial ventilation should be provided; and I would propose to provide them in the simplest way, by introducing under the floors air channels or pipes, by which the pure air from the outside of the building could be conveyed to hollow columns rising from the floor to a height of some six feet, and terminated at the top by a grating. A free communication would thus be established between the atmosphere of the room and the fresh air outside, and the fresh air would enter the room somewhere near the centre, and at a height from the floor sufficient to guard the inmates from a cold draught; and, for the purpose of removing the foul or vitiated air, I propose to have, in addition to the chimney, five air flues rising through the side walls of each ward, and carried up into the roof.

From the papers annexed to the return, your Lordship will perceive, that while the medical gentlemen connected with the Middlesex Hospital still condemn

the revised plans, and think the whole design radically faulty, the medical gentlemen deputed to confer with the committee on the subject, by the authorities of the University College Hospital, St. Thomas's Hospital, King's College Hospital, St. Bartholomew's Hospital, and St. George's Hospital, approve of the revised plans, and think the whole design extremely good.

It is singular, indeed, to observe that the main feature in the design—the general corridor—should be selected by the medical gentlemen of the Middlesex Hospital for special reprobation, while the medical gentlemen of the other five great hospitals highly approve of it.

I have, &c.

(signed) *R. M. Laffan,*

Deputy Inspector-general of Fortifications.

The Right Hon.
Lord Panmure, K.T., G.C.B.,
&c. &c. &c.,
Pall Mall.

RETURNS respecting the ROYAL VICTORIA HOSPITAL at *Netley*.

By whom the site was selected.

The site was originally pointed out by Sir James Clark, Bart., M.D.

Whether any reports were made on its salubrity and general eligibility for its purpose previous to selection, and by whom.

It was reported on by Captain Laffan, R.E., Deputy Inspector-general of Fortifications, appointed by Lord Panmure to examine it, also by Dr. Mapleton, sent for the same purpose by the Director-general of the Army Medical Department.

It was finally selected by Lord Panmure, after a careful comparison with four other sites, which had been examined and reported on.

By whom the original plans were prepared.

The original plans were prepared by a committee appointed for that purpose by Lord Panmure, and in communication with the Director-general of the Army Medical Department.

The committee consisted of Colonel O'Brien, Assistant Quartermaster-general, Horse Guards; Captain Laffan, R.E., Deputy Inspector-general of Fortifications; Dr. Mapleton, M.D., Staff Surgeon.

Whether they were submitted to any medical authority for approval.

The original plans were submitted to and approved by a medical committee appointed by the Director-general of the Army Medical Department, and presided over by that officer himself. The committee consisted of Dr. Andrew Smith, M.D., Director-general of the Army Medical Department; Dr. Cumming, M.D., Inspector-general of Hospitals; Dr. Dumbreck, M.D., C.B., Deputy Inspector-general of Hospitals; Dr. Forrest, M.D., C.B., Deputy Inspector-general of Hospitals.

By whom they were officially sanctioned.

The plans were officially sanctioned, first, by Lieutenant-general Sir John Burgoyne, G.C.B., Inspector-general of Fortifications, next by Lord Panmure, and finally by Her Majesty.

And whether any report was made upon them, and by whom, previous to their being sanctioned.

A detailed report upon the plans was submitted to Lord Panmure by the committee, by whom the plans had been prepared, before his Lordship sanctioned them.

Statement

Statement of the alterations of or additions to the original plans which have been determined on; by whom they were recommended.

The alterations and additions are as follows:—

1. The closed corridor, which ran along the south-west front of the buildings, has been converted into an open colonnade.

This was recommended by Dr. Sutherland and by Miss Nightingale.

2. Tripartite windows have been substituted for ordinary windows on the north-east side of the buildings, at the suggestion of the medical men connected with the Middlesex Hospital; and all the windows are increased in size, at the suggestion of Miss Nightingale.

3. Some of the front wards have been increased in size, by diminishing the number of water-closets, ablution places, and bath-rooms, at the suggestion of Dr. Sutherland.

4. An alteration has been made in the disposition of some of the end wards, to ensure a better ventilation, at the suggestion of Dr. Sutherland.

5. The water-closets have been made to project further from the line of buildings, and a lobby has been placed between them and the ablution places. This improvement had been proposed in the War Department, and was under consideration before any suggestion on the subject had been made by other parties. An improvement in the construction of the partitions was, however, adopted, at the suggestion of Dr. Sutherland.

6. The accommodation set apart for the treatment of contagious diseases has been increased, at the suggestion of the Director-general of the Army Medical Department.

7. Another floor has been added to the centre building, in order to provide good accommodation for female nurses, at the suggestion of Miss Nightingale.

8. A second floor has been added to the extreme back range of out-buildings, at the suggestion of Captain Laffan, R. E., to provide better accommodation for orderlies and other attendants; while the back buildings on each side of the inner squares are left of one story, in order not to interfere with the circulation of air.

To whom they were referred for approval.

All these alterations or additions were referred for the approval of Lieutenant-general Sir John Burgoyne, G.C.B., Inspector-general of Fortifications, and to Dr. Andrew Smith, Director-general of the Army Medical Department; they were next approved by Lord Panmure; and finally, on the 9th July 1857, by Her Majesty.

And copy of correspondence and reports relating thereto, which have led to the adoption of the amended plans.

Copies of correspondence annexed.

MEMORIAL to Lord *Panmure*, respecting the ROYAL VICTORIA HOSPITAL, at *Netley*.

THE undersigned desire to bring the following observations respecting this building under the notice of Lord Panmure.

They have no personal interest whatever in the matter, but having paid much attention to the construction and ventilation of hospitals, they are desirous of preventing, if possible, the disappointment and disastrous results which will, as

they believe, inevitably follow the carrying out of the present plans in their integrity.

Passing by several minor, though by no means unimportant faults in the proposed internal arrangements of the Royal Victoria Hospital, they would simply test its general plan by principles which have been abundantly established by experience in civil hospitals.

Principles of construction.

1. A building sufficiently well adapted for the dwelling of persons in good health, may, and generally will, be very inadequate to the requirements of the sick. Hospitals, in which patients may lie for weeks or months, demand a different construction, and a more perfect ventilation, than any other class of buildings.

2. In a new hospital, where there is a choice of construction, the ventilation should be entirely natural, and everything like artificial ventilation, which is always imperfect and precarious in its operation, should be avoided.

3. The great principle on which all good hospitals are constructed is, that the wards open into the external air, on at least two sides, and have windows which are placed opposite to one another. By this means, a free and perfect current of air is obtained; and highly infectious diseases may be placed amongst the general patients without danger of their being communicated.

To apply these maxims to the Royal Victoria Hospital,

Plan of the Royal Victoria Hospital.

The principle feature in the plan is a vast corridor or closed gallery, which extends the whole length of the building, and is interposed between the wards and the south-west front. The wards, with a few trifling exceptions, are placed behind it, and open by doors and windows into the corridor, into one another, or into a yard on the north-eastern aspect of the hospital. Nothing could be more obstructive of ventilation and comfort. The corridor, 12 feet in breadth, shuts out the sun, intercepts the current of fresh air which might be directed through the wards, and forms instead a permanent receptacle for the contaminated effluvia which escape from them.

The lateral ventilation of the wards is still more objectionable, since they communicate only with one another, or with sculleries and latrines. The few windows which open upon really fresh air, face the north-east, and expose the wards to that wind which is notoriously the least beneficial to the sick. Moreover, the current of air, even on this face, is in part impeded by a block of buildings and a covered way, which extend across the whole yard on the north-east side of the wards.

By this seclusion of the wards from the fresh air there will be generated throughout the building what is called a "hospital atmosphere," and experience has shown that in such an atmosphere it is impossible for the attendants on the sick to maintain their health, and for the sick themselves to escape from fever, hospital gangrene, and other similar diseases.

The undersigned are aware that it is proposed to make up for these disastrous defects in the plan of the hospital by a system of artificial ventilation, but they are so satisfied by experience already obtained of the uncertain efficacy of that system, and of the positive danger of drawing cold air into the floors of the wards, which is a part of it, that they are most decided in their convictions of the necessity of its being abandoned.

Lord Panmure should be informed that hospitals which have been recently constructed in this country on somewhat similar principles to the Royal Victoria Hospital have proved failures, and are continually subject to visitations of erysipelas and hospital gangrene.

The plan now adopted in the military hospitals of the Continent, and especially in France, is diametrically opposed to that under consideration. In the military hospital at Bordeaux, for example, a ground plan of which accompanies this paper, every ward occupies the whole superficial area of the building in which it situated, and opens on all four sides into gardens, or other spaces of air.

The authors of this paper do not speak without ample experience in their own hospital. Built in the form of the letter H, the Middlesex Hospital is freely ventilated by currents across and along it, whilst its wards have been made to extend the whole length and breadth of each compartment of its wings.

Until

Until the hospital was reconstructed, about 10 years ago, it was subject to outbreaks of all the diseases to which reference has been made; but since the present system of thorough ventilation has been adopted, they have all but entirely disappeared, and the nurses and resident officers enjoy a degree of health hitherto unknown, and beyond that in most hospitals.

There are other points of great importance to the comfort of the sick, to which objection might be made.

The wards are too small, for experience has well shown that in a ward which is very high in proportion to the breadth there occurs a stagnation of air, which it is almost impossible to overcome.

The position of the orderlies' rooms is bad, as they form, in fact, parts of the wards. The injury to the health of the attendants on the sick from constantly breathing the vitiated air of wards is too obvious to need more than mention.

The position of the water-closets, the proposal to admit steam into them, and other matters, might be referred to, but as the object is not to point out every error, but merely to show the desirability of reconsidering the present plans, enough has now been said.

The undersigned are aware that the plans in question have resulted from the labours of a committee especially appointed to investigate the subject of hospitals.

But it is no disrespect to the medical gentlemen composing it to affirm, that the entire absence of good military hospitals in this country renders the opinion of military medical officers less valuable than it would otherwise be. And the existence of the serious mistakes pointed out in the proposed Victoria Hospital furnishes convincing proof that further consideration is required, before the country is finally involved in so large and unprofitable an expenditure.

There is, indeed, reason to fear that the plans have been so far matured, and the foundations so far proceeded with, that no amount of alteration will convert it into what a great military hospital should be. Still, certain alterations might be yet made, which would materially improve the present plans. Amendments proposed.

Alterations might be made in the corridor, the open gratings in the floors might be removed, there might be a change in the size of the wards, and in the situation of the apartments of the orderlies and resident medical officers, tripartite windows might be adopted, and perforated zinc gratings inserted in the walls, &c., &c.

Considering these circumstances, the undersigned can only suggest that Lord Panmure should put a peremptory stop upon any further progress being made in the buildings until the plans have been referred to a few medical men connected with some of the best constructed civil hospitals, who might confer with the previously appointed committee, and submit to his Lordship the result of their joint deliberations.

28 February 1857.

THE ROYAL VICTORIA HOSPITAL.

My Lord,

Middlesex Hospital, 4 May 1857.

WE have the honour to inform your Lordship that, in compliance with the request contained in Colonel O'Brien's letter of 24th of April, a deputation from our body attended, on Tuesday the 28th, at the War Office on the subject of the proposed Royal Victoria Hospital. We beg, in the first place, to be permitted to express, through your Lordship, our sense of the courtesy with which we were received by the gentlemen whom we had the pleasure of meeting. Captain Laffan explained to us the nature of certain alterations which the military authorities had decided upon making in the internal arrangements of the building, and especially in the position of the latrines; and he also entered at considerable length into the system of artificial ventilation, which he stated would probably ultimately be adopted.

We regret that we cannot assure your Lordship that the result of our interview has been to change the opinion expressed by us in our memorial of the 28th February; on the contrary, whilst we admit that the adoption of some of the suggestions made therein is likely to be productive of a certain amount of benefit, we are yet unanimously of opinion that the whole plan of the Hospital is radically faulty, and we are persuaded that the contemplated scheme of artificial ventilation, as explained to us by Captain Laffan, will, in all probability, aggravate the very evils which it is intended to remedy.

We were informed that the plan of the building had received the approval of several of the medical officers connected with other of the metropolitan hospitals; but we have reason to believe that there may be some misconception in the minds of the committee at the War Office as to the extent to which this is the case. In this statement we refer especially to the size of the wards, to the construction of the corridor, and to the proposed, but highly objectionable, method of artificial ventilation, which, we may be allowed to mention, are the three most important points connected with the sanitary economy of the Hospital. We think it a matter of regret that the medical gentlemen whose opinions were desired had not the opportunity afforded them of meeting together and investigating the plans as well as the proposed alterations, as such a course would have insured a more satisfactory result than is likely to be arrived at by merely asking the opinions of individuals who had had no previous intercommunication upon isolated points unconnected with the general arrangements of the building.

In conclusion, we have only to express our earnest hope that your Lordship will not sanction the present plans, which may, and in our opinion will, simply convert a large and costly building into a hotbed of erysipelas and hospital gangrene. It was mentioned to us that the Royal Victoria Hospital would probably form only the commencement of extensive military buildings in the neighbourhood of Netley; and if this be the case, your Lordship may perhaps think it well to consider whether it would not be a more prudent, as well as, eventually, a more economical course, to abandon the intention of completing the present buildings as a hospital, for which they are so ill adapted, and to convert them into barracks, or other military structures requiring less peculiar sanitary arrangement.

We have, &c.

The Right Hon. Lord Panmure, K.T., G.C.B.,
&c. &c. &c.

My Lord,

War Office, Whitehall, 25 May 1857.

THE Committee appointed by your Lordship to consider the objections which have been urged against the plans of the Royal Victoria Hospital at Netley have concluded their inquiries, and I have the honour to transmit herewith, for your Lordship's consideration, a Report setting forth the opinions to which we have unanimously agreed.

(signed)

I have, &c.

Terence O'Brien, Colonel,

Assistant Quartermaster-General.

To the Right Honourable

The Secretary of State for War.

REPORT to the Right Honourable the SECRETARY OF STATE FOR WAR.

My Lord,

War Office, 25 May 1857.

THE Committee appointed by your Lordship to consider and report upon the objections made to the general design, and to some of the internal arrangements of the Royal Victoria Hospital, in a memorial addressed to your Lordship by the medical officers of the Middlesex Hospital, London, having concluded their inquiries, have the honour to lay before your Lordship the following Report:—

“ The memorialists object to the general plan of the new building, that it is opposed to the principles which have been established by experience in civil hospitals ;

“ That the windows of the wards do not open into the external space on at least two sides ;

“ That the corridor, which affords the means of communication between the different parts of the building, is highly objectionable, as it forms a permanent receptacle for the contaminated effluvia, which will escape from the wards into it, and which will thus pass from one ward to another ;

“ That the wards, with few trifling exceptions, are placed behind this corridor, open by doors and windows into it, into one another, or into a yard on the north-east aspect of the Hospital ;

“ That the lateral ventilation of the wards is still more objectionable, since they communicate only with one another, or with sculleries and latrines ;

“ That the few windows which really open upon fresh air face the north-east, and expose the wards to that wind which is notoriously the least beneficial to the sick ; moreover, that the current of air, even on that face, is in part impeded by a block of buildings and a covered way, which extend across the whole yard on the north-east side of the Hospital ;

“ The memorialists state that they are aware that it is proposed to make up for these disastrous defects in the plan of the Hospital by a system of artificial ventilation, but that they are so satisfied, by experience already obtained of the uncertain efficacy of that system, and of the positive danger of drawing cold air into the floors of the wards, which is a part of it, that they are most decided in their convictions of the necessity of its being abandoned.”

In order to aid them in arriving at a correct conclusion on the questions submitted to them—questions involving considerations of medical science and practice, of architectural construction, of ventilation, of the discipline and of the requirements of a Military Hospital—

The Committee have sought and obtained the opinions and advice of the medical officers of the Middlesex Hospital, and of a medical officer from each of the following great London hospitals—viz., Guy's, St. Thomas's, St. George's, London University, King's College, and St. Bartholomew's ; of the professional officers of the Architectural Branch of the War Department ; of Dr. Arnott, who has given so much attention to all matters relating to warming and ventilating buildings ; and of Dr. Dumbreck, c.b., Deputy Inspector-general of Military Hospitals ; and have referred to the Report of the Official Committee on Barrack Accommodation for the Army, for the opinions of military and other officers as to what internal arrangements are likely to be most conducive to the comfort and well-being of the sick in a military hospital.

The Committee also requested two of their number, Drs. Sutherland and Mapleton, to visit the works at Netley, and to consider, on the spot, the objections contained in the memorial.

The original plans of the Hospital were prepared by a Committee appointed by your Lordship for that purpose last year, whose report, dated War Department, 15th May 1856, sets forth the reasons which guided them in recommending the various arrangements. These plans show a range of wards placed side by side, on each story, with a corridor for the convenience of communication and exercise for convalescents. Each of the larger wards has two windows opening into the outer air on the north-east side, and two windows and a door opening into the corridor on the south-western side. The corridor itself communicates with the external air by windows of the usual construction and apertures in other parts of it, with open fire-places to assist in its ventilation.

Between each of the larger wards there is a smaller ward to accommodate two patients, supplied with light from the corridor, and a projection on the north-east side contains the water-closets, &c.

The Committee find that, previous to the communication from the medical officers of the Middlesex Hospital, the original plans had received from the Director-general of the Army Medical Department, and the officers of the War Department, a careful reconsideration and revision, as to the structural arrangement of the corridor, the projections containing the water-closets, &c.

On examining the original plans, it appears to the Committee that the means of affording light and air, both to the wards and corridor, might be increased with advantage; and the Committee recommend that along the whole front of the buildings the windows in the corridors be replaced by wide-arched openings, capable of being kept entirely open in fine weather, but provided with sashes that can be closed when necessary.

The Committee further recommend that the number of windows opening from each ward, on the north-east side into the external air, be three instead of two, thereby increasing the window space by about one-third. With respect to the remarks of the memorialists, as to the side ventilation of the wards, the Committee beg to observe that, as shown on the plans of the Royal Victoria Hospital, no one ward communicates directly with another.

The position of the water-closets, in relation to the wards, had, as already stated, previously received the attention of the officers of the War Department, and it had been arranged that the projections containing them should be carried out three feet further than shown in the original plans, in order to admit of the construction of a small lobby intervening between them and the wards.

Another structural objection raised against the plan is, that the kitchens and dining-rooms are so arranged as to impede the current of air at the back of the building.

These buildings are situated 80 feet from the hospital, and extend on one story only 150 feet across the yard, and not along the whole extent of it. The two upper flats, 60 feet in length, are intended for separate dining and day-rooms, to enable those patients, who can, to dine away from their wards.

The sanitary advantages of such an arrangement are most obvious, and as a reduction of the height of the building would necessitate the use of the wards or corridors for dining accommodation, the advantage of having separate dining and day-rooms will more than counterbalance any possible disadvantage from their position.

Between the kitchens and the hospital is a one-storied building, containing the engine-room and a large store-room, both of which the Committee find can with advantage be placed below the level of the ground, and this they recommend.

The only other buildings behind the Hospital likely to interfere with the free circulation of air, are those of two stories which run round the yard, and the Committee recommend that these be reduced on the sides to one story.

In the event of its being decided that female nurses shall be employed in the Royal Victoria Hospital, the Committee find that accommodation can be provided for them, and that a sufficient number of day-rooms, extra diet kitchens, and store-rooms, can be obtained in the small rooms formerly proposed to be used as wards for two patients, and that bed-rooms can be provided in the central building, by raising that building one story, and making a communication between it and the wings on each floor.

With

With respect to the observations of the memorialists as to the superiority of natural over artificial ventilation, the Committee beg leave to point out to your Lordship, that with the alterations proposed, viz., opening the corridor, and increasing the number and size of the windows in the wards, the means of providing natural ventilation in the new Hospital will be amply sufficient, but inasmuch as natural ventilation (as understood by doors, windows, and fire-places) cannot always be depended upon, the Committee are of opinion that the best system of artificial ventilation should also be provided, capable of ensuring a supply of fresh air, and of effecting the removal of foul air at all times and seasons.

The Committee having now reported to your Lordship on the several objections urged by the Memorialists, are unanimously of opinion that the few modifications which they recommend in the arrangements of the Royal Victoria Hospital, and which may be seen in the plans accompanying this Report, are all that is required to render that building well adapted to the purposes of a Military Hospital; and although they are aware that the medical officers of the Middlesex Hospital still retain their unfavourable opinion, notwithstanding the improvements that have been made in the plans, the Committee feel strengthened in arriving at the opposite conclusion, by the concurrent approval of all the medical officers of the other great London hospitals, whose written opinions on the subject your Lordship will find appended to this Report. To these gentlemen, and to those who represented the opinions of the medical authorities of Middlesex Hospital, as well as to Dr. Arnott, the Committee are under great obligation for the readiness and courtesy with which they afforded their assistance and advice.

(signed) *Terence O'Brien*, Colonel,

EVIDENCE.

Dr. Parkes, Physician to University College Hospital.

Q. Do you consider large or small wards to be preferable?

A. Large. (From 30 to 50 patients.)

Q. As large wards admit of being arranged, as in France, in separate blocks, whereas small wards evidently cannot be so disposed, what is your opinion of the system shown in the plan of the Victoria Hospital, of causing small wards to open from a general corridor?

A. Small wards being adopted, I approve of the corridor.

Q. What is your opinion of the comparative merits of plans of the Victoria and Bordeaux Hospitals, now submitted to you?

A. Preferring, as a principle, the separate blocks, I believe the plan of the Victoria Hospital to be an extremely good one.

Q. What is your opinion as to the arrangement of the water-closets, baths, &c., for which provision is made in the plan of the Victoria Hospital?

A. I consider them extremely good.

Q. Do you think the patients in these wards will be free from the foul air from the water-closets?

A. Most assuredly.

Dr. Barker, Physician, St. Thomas's Hospital.

Q. Whether do you consider large or small wards preferable?

A. I see no objection to wards containing from 20 to 25 men, or to having them for 10. I object to a very large number in one ward, if labouring under serious disease.

Q. As large wards admit of being arranged, as in France, in separate blocks, whereas small wards evidently cannot be so disposed, what is your opinion of the system shown in the plan of the Victoria Hospital, of causing the small wards to open from a general corridor; and what is your opinion of the comparative merits of the two plans now submitted to you.

A. I very greatly prefer the plan of the Victoria Hospital to that of Bordeaux, and concur entirely with Dr. Burrowes in opinion as to the reasons for such preference.

Q. What is your opinion as to the arrangements of the water-closets, baths, &c., for which provision is made in the plan of the Victoria Hospital?

A. I think the arrangement a good one, and safe as regards contaminating the atmosphere of the wards.

On being asked his opinion as to ventilation generally, Dr. Barker stated that he never finds, if the wards are not too crowded, that artificial ventilation is necessary, nor does he wish to have it.

Dr. Page, Physician to St. George's Hospital.

Q. Whether do you consider large or small wards preferable?

A. I consider small wards much better than large ones, as a large number of serious cases would create a contaminating atmosphere.

The same questions having been put to Dr. Page as were put to Dr. Barker, Dr. Page stated, that he concurred in opinion with Dr. Barker, as regarded the arrangements of the water-closets, and the advantages of the corridors, and considers the plan of the Victoria Hospital altogether a remarkably good one.

I have further to add, that the atmosphere in the corridors should be constantly changed by free introduction of the external air, and the temperature by this means, and the stoves, adapted to the season.

Dr. Guy; Physician to King's College Hospital, Dean of the Medical Department, King's College.

Q. Do you consider large or small wards should be preferred?

A. Small (*i. e.* about 12 beds).

Q. As large wards admit of being arranged, as in France, in separate blocks, whereas small wards evidently cannot be so disposed, what is your opinion of the system shown in the plan of the Victoria Hospital of causing the small wards to open from a general corridor?

A. I approve of the corridor, especially as the cubic space allotted to patients in the wards is such as, in my opinion, to prevent any danger of contagion spreading through it from ward to ward, provided that the air is subject to continual change.

Q. What is your opinion of the comparative merits of the plans of the Victoria and Bordeaux hospitals now submitted to you?

A. Considering the nature of the English climate, I think the plan of Victoria Hospital is better suited to this country than that of the Bordeaux Hospital.

Q. What is your opinion of the arrangements of the water-closets, baths, &c., for which provision is made in the plan of the Victoria Hospital?

A. I entirely approve of them.

Dr. Guy added, that he was desirous of expressing an opinion, that double panes of glass, or single panes of plate glass, should be employed throughout the building, in conjunction with open fire places, in substitution for artificial heating, and that with the space provided in the wards, no ventilation is required beyond that obtainable by opening the windows.

Dr. Guy considers that the floors of the building should be of wood.

The foregoing statement is intended to convey a condemnation of any attempt at warming or ventilating from a single centre, on the ground both of efficiency and economy.

Dr. *Burrowes*, Fellow of the Royal Society, Physician to St. Bartholomew's Hospital.

Q. Whether do you consider large or small wards preferable?

A. I think great inconvenience and discomfort would arise, in having wards for so large a number of patients as 40; the noise would be objectionable. I therefore consider that wards should not be for more than from 10 to 20 patients.

Q. As large wards admit of being arranged, as in France, in separate blocks, whereas small wards evidently cannot be so disposed, what is your opinion of the system shown in the plan at the Victoria Hospital of causing all the wards to open from a general corridor?

A. I think the plan is good, judicious certainly; I think, also, that great advantages will result to convalescents from the use of this corridor, provided it be not in the power of the attendants to close it, and that it is naturally ventilated at all times, day and night.

Q. What is your opinion as regards the comparative merits of the plans of the Bordeaux and Victoria Hospitals now submitted to you?

A. I consider the plan of the Victoria Hospital in a northern climate, such as we have in England, a very superior one to that of Bordeaux, because by the latter plan, where buildings of considerable height are only separated by narrow intervals, the lower floors of those buildings must, to a great extent, be deprived of sun light, and the fog and moisture of the air in the winter months will not be dispersed by the sun's warmth, and hence the air in the intervening spaces will be unhealthy.

Q. What is your opinion as to the arrangements of the water-closets, baths, &c., and for which provision is made in the plan of the Victoria Hospital?

A. It is the best I ever saw.

Q. Do you think that the patients in these wards will be free from the effects of the foul air from these water-closets?

A. Quite so.

Dr. *Rees*, Fellow of the Royal Society, Physician to Guy's Hospital.

The same questions as those proposed to Dr. Burrowes, having, in his presence, been asked to Dr. Rees, that gentleman quite concurred in the several replies given by Dr. Burrowes, as recorded on this paper.

Dr. *Dumbreck*, C.B., Deputy Inspector-general of Hospitals.

Q. Whether do you think large or small wards preferable?

A. I like wards of various sizes; but in my opinion, the maximum number of sick in any ward should never be beyond twenty.

Q. As large wards admit of being arranged, as in France, in separate blocks, whereas small wards evidently cannot be so disposed, what is your opinion of the system shown in the plan at the Victoria Hospital, of causing the small wards to open from a general corridor?

A. I like the plan; and a large, spacious, well ventilated, roomy corridor, as an ante-chamber to the wards, I consider an excellent feature in the plan of the Victoria Hospital; it will form a cheerful airy promenade in all weathers, and will be a good intermediate spot between the sick chamber and open air.

Q. What is your opinion as regards the comparative merits of the plan of the Bordeaux and Victoria Hospitals now submitted to you?

A. The excellence of the principle of the non-congregation of large masses of sick together must be admitted; but it is doubtful, for many reasons, if it could have been rendered applicable to an establishment so vast as that contemplated at Netley, the inmates of which need never suffer from hospital-generated miasms, as the means (almost even without artificial ventilation) for the admissions of fresh air are ample.

Q. What is your opinion as to the arrangement of the water-closets, baths, &c., for which provision is made in the plan of the Victoria Hospital?

A. As shown in the modified plan, nothing can be better.

Q. Do you think the patients in these wards will be free from the effects of the foul air from these water-closets?

A. I believe the patients will neither suffer inconvenience nor injury from the water-closets, certainly not from their proximity, if they are, which they doubtless will be, properly constructed with good wide pipes, plenty of water, and other modern improvements.

Dr. Neil Arnott.

Q. Whether do you consider large or small wards preferable?

A. As regards warming and ventilation only, with the means now known, the size of the wards is of little importance. For small wards the best means are exceedingly simple, although quite effectual, differing little in appearance from the ordinary fire-places to which all are accustomed, and with which, in this climate, all have the most pleasing associations.

Q. As large wards admit of being arranged, as in France, in separate masses, whereas small wards evidently cannot be so disposed, what is your opinion of the system shown in the plans of the Victoria Hospital, of causing the small wards to open on a general corridor?

A. The advantage of having the power to admit pure air and light with complete freedom to a long ward, which has windows only at the ends, as proposed in the Netley Hospital, cannot be questioned. The proposed corridor, into which the windows at one end of all the wards are to open, will somewhat restrict this desirable freedom in both respects. In London, dining-rooms, of which the windows are shaded by the projecting verandah, three or four feet broad, of the drawing-room above, are deemed gloomy; and the colonnade in the Regent's Quadrant, which thus darkened the low rooms, was ultimately removed, because many of the houses remained untenanted. The corridor of the Hospital will be 12 feet broad instead of the verandah of 4 feet, and instead of an open colonnade there will be an external wall opened only by windows, so that the internal windows will have only a borrowed light; still the windows at the other end will be large and free, but directed towards the north-east. There will be the advantages of convenient approach to all the wards, and of comfort to the invalid and convalescent, who may take exercise in fitly tempered air away from the sick ward. To maintain moderate temperature in the corridor during the cold of winter by fires, and during the heat of summer with the direct sunshine of long days, by Venetian or other shades, and free openings above and below, will require skilful management.

Q. What is your opinion of the comparative merits of the plan of the Netley Hospital and that of La Riboinere, or Bordeaux?

A. That question is partly answered by what has been said in answer to the preceding. In a town the concentration of the buildings of a large establishment is often unavoidable, and therefore hospitals with a smaller number of large wards may be more befitting, giving also perhaps greater ease of supervision to the officials in charge; but in the country where the space is not limited, and where all the windows may command cheering views of the open landscape, almost as much as those of a detached country residence, the long line of building of the proposed Netley Hospital is anywhere the more appropriate.

Q. What is your opinion of the arrangement of the water-closets?

A. It would be difficult to overrate the importance of having the water-closets as much detached as possible from the dwelling rooms, although in cold weather they should be maintained for sick people at a temperate heat; I approve, therefore, of the plan to have a lobby, or part of the passage, open to the atmosphere between them and the body of the hospital. There are various ways in which the two objects of separation and tempered ventilation may be attained, and the particular plan to be chosen will depend on the general plan adopted in the hospital.

Q. What system of ventilation do you recommend for the Netley Hospital?

A. I believe the best plan will be the open English fire-place, arranged for ventilation, as I have described in my late publication, "On the Smokeless Fire, &c." It will be seen that the arrangement produces a much more powerful and complete ventilation than had been obtained before, except by mechanical means, such as pumps, or fan wheels driven by steam-engines, or by steam jets. This fire-place, although now generally known by name, and because for it and other devices connected with the arts of warming and ventilating, the Council of the Royal Society awarded their Romford medal, and the authorities at the late

Paris

Paris Exhibition gave their highest medal, is still little understood by people generally. I shall be happy to exhibit and explain it and its modifications as now used in all the apartments of my own house, to the Members of the Committee, and to prove to any scientific and competent judges that it possesses the following qualities—of being smokeless, of saving nearly all the trouble of fire management to attendants, of giving singular power of ventilation and distributing the warmth more than common fires, of tempering the fresh air which enters the room, and of saving much fuel. But, further, to leave no uncertainty as to all desirable results being secured, I advise that the windows be made to open for through and through ventilation, if ever wanted, and that the simple ventilating pump described in my book, at page 162, be established with branching channels, so that pure air, and warmed air if wished for in any desired quantity, may be forced into all or any of the wards. A commission appointed by the General Board of Health is now engaged in investigations with regard to the working of the smokeless fire and others, and will be able to speak with authority on the subject. The members of the General Board of Health, with their engineers and other officers, examined the workings of the ventilating pump spoken of, and reported upon it as set forth in my book, at page 167. Further details respecting these matters I shall have pleasure in giving to the members of the Committee if desired. I had noted other observations on the proposed and possible plans; but I am prevented from writing more by the arrival of the time when I had undertaken to send my answer.

I send a copy of my book and of my report made to the Board of Trade on the Paris Exhibition.

NETLEY HOSPITAL.

ORDER OF THE BATH.

RETURN to an Address of the Honourable The House of Commons,
dated 16 July 1857;—for,

A “RETURN of the Names of the Persons upon whom Her Majesty has been pleased to confer the Dignity of KNIGHT GRAND CROSS of the Most Honourable ORDER of the BATH, from the Year 1847 to the present Time; stating the Amount of FEES actually paid by each Individual, and, in Cases where Fees have not been paid, the Causes of such Non-payment.”

War Office, }
August 1857. }

JOHN WILLIAM RAMSDEN.

(*Sir William Fraser.*)

Ordered, by The House of Commons, to be Printed,
25 August 1857.

A RETURN of the Names of the Persons upon whom Her Majesty has been pleased to confer the Dignity of KNIGHT GRAND CROSS of the Most Honourable ORDER of the BATH, from the Year 1847 to the present Time; stating the Amount of FEES actually paid by each Individual, and, in Cases where Fees have not been Paid, the Causes of such Non-payment.

THE following Fees, amounting to 164*l.* 6*s.* 8*d.*, are payable under the Statutes of the Order of the Bath, on the appointment of every Knight Grand Cross, and have been paid on the undermentioned appointments (except in the cases of the Earl of Dundonald, Sir Charles Bullen, Sir Edmund Lyons (now Lord Lyons), the Earl of St. Germans, and Sir James Outram).

£.	164	6	8

Since the 1st January 1847, the following Knights Grand Cross have been appointed :

1847.	1850.
Sir George Hamilton Seymour.	— Nil. —
* Admiral the Earl of Dundonald.	
Lieut.-General Lord Fitzroy Somerset (afterwards Field Marshal Lord Raglan).	1851.
Lieut.-General Sir John Macdonald.	Right Hon. Sir Henry Lytton Bulwer.
The Marquess of Normanby.	
General Sir Colin Halkett.	1852.
1848.	Right Hon. Sir John C. Hobhouse, Bart. (now Lord Broughton).
Lieut.-General Sir John Hunter Littler.	Admiral Sir Charles Ekins.
General Sir James Lillyman Caldwell.	General Sir Peregrine Maitland.
1849.	Admiral the Hon. Sir Thomas Bladen Capel.
Right Hon. Sir George Grey, Bart.	General Sir Alexander Woodford.
General Right Hon. Sir Edward Blakeney.	Lieut.-General Sir Henry Frederick Bouverie.
Lieut.-General Sir Joseph Thackwell.	† Admiral Sir Charles Bullen.
Lieut.-General Sir Walter Raleigh Gilbert, Bart.	General Sir John Fox Burgoyne, Bart.

* The Earl of Dundonald, then Lord Cochrane, was on the 26th April 1809 appointed a Knight of the Order; in 1814 he was removed from the Order, and on the 22d May 1847 re-appointed. The fees having been paid on the first appointment, the officers of the Order did not make application for fees on the last nomination.

† Sir Charles Bullen; this officer was appointed 7th April 1852, and died 2d July 1853. After his death his executors acknowledged the validity of the claim of the officers of the order upon the Admiral's estate, but at the same time represented that the very small residue of the property left by him would be divisible among near relations in far from affluent circumstances; in consideration of which the officers agreed to forego their claim.

1853.	General Sir Hew Dalrymple Ross.
Lord Cowley (now Earl Cowley).	Vice-Admiral Sir James Whitley Dean ^s Dundas.
1854.	* Vice-Admiral Sir Edmund Lyons (now Lord Lyons).
Right Hon. Sir James Robert George Gra- ham, Bart.	Admiral Sir Graham Eden Hamond, Bart. Admiral Sir James Alexander Gordon. General Sir James Simpson. Lord Panmure.
1855.	
General Sir George Brown.	
General his Royal Highness the Duke of Cambridge.	1856.
Lieut.-General Sir De Lacy Evans.	Right Hon. Sir Charles Wood, Bart.
Lieut.-General Sir Richard England.	
Lieut.-General Sir Colin Campbell.	1857.
General Sir James Macdonell.	† The Earl of St. Germans. ‡ Lieut-General Sir James Outram.

During the same period the following have been appointed Honorary Knights Grand Cross of the said Order, viz. :—

The Hereditary Grand Duke of Mecklen- burg Strelitz.	Marshal Pelissier (now Duc de Malakoff).
The Prince of Hohenlohe Langenburg.	Marshal Bosquet.
Field Marshal Omar Pasha.	General de Salles.
General The Prince Napoleon.	General de Mac Mahon.
Marshal Canrobert.	General de St. Jean d'Angély.
Marshal Count Valliant.	General Morris.
General La Marmora.	The Prince of Prussia. Admiral Hamelin.

Note.—Since the year 1847 it has not been usual to require the payment of fees from persons appointed Honorary Knights Grand Cross of the Order of the Bath.

* Sir Edmund Lyons, now Lord Lyons, was appointed a Civil Knight Grand Cross on the 10th July 1844, and on that occasion he paid the fees. On the 5th July 1855, he was nominated to the military division of the same class of the order. The fees were not demanded a second time.

† The Earl of St. Germans was only appointed the early part of this year. Application has not yet been made for payment of the fees.

‡ Sir James Outram has been appointed since this return was called for. Application has not yet been made for payment of the fees.

ORDER OF THE BATH.

RETURN of the Names of the Persons upon whom Her Majesty has been pleased to confer the Dignity of KNIGHT GRAND CROSS of the Most Honourable ORDER of the BATH, from the Year 1847 to the present Time, stating the Amount of Fees actually paid by each Individual, and, in Cases where Fees have not been paid, the Causes of such Non-payment.

(Sir William Fraser.)

LIST

OF

Officers, Non-commissioned Officers, and Men selected to receive the 400 War Medals for Military Valour presented by His Majesty the King of Sardinia to the British Army engaged in the late War in the East.

Rank, Name, and Regiment.	SERVICES.
GENERAL OFFICERS.	
1. General Sir George Brown, G.C.B. -	Commanded the Light Division at the Battles of Alma and Inkermann, and was severely wounded on the last named occasion. Commanded the Expedition to Kertch; was in command of the Light Division, except while absent on account of his wound, and while in command of the Expedition to Kertch; served also during the Siege of Sebastopol up to 27th June 1855, when he was compelled to return to England by severe illness.
2. Lieut.-General Sir Richard England, G.C.B.	Commanded the Third Division at the Battles of Alma and Inkermann, and the Siege of Sebastopol, till August 1855, when he was compelled to return to England by severe illness.
3. Major-General Sir Henry John William Bentinck, K.C.B.	Commanded the Brigade of Guards at the Battles of Alma and Inkermann, and was severely wounded on the last-named occasion. On his return to the army he commanded the Fourth Division during the remainder of the Siege of Sebastopol.
4. Major-General Lord Rokeby, K.C.B.	Commanded the Brigade of Guards from February 1855 till the end of the Siege of Sebastopol; for part of the time also was in command of the First Division.
5. Major-General the Hon. Sir James Yorke Scarlett, K.C.B.	Commanded the Heavy Cavalry Brigade at Alma, Balacava, and Inkermann; subsequently, in 1855, the Cavalry Division.
6. Major-General Sir Harry David Jones, K.C.B., Royal Engineers.	Commanded the Royal Engineers during the Siege of Sebastopol from March 1855.
7. Major-General Sir William Eyre, K.C.B.	Commanded a Brigade at the Battles of Alma, Balacava, and Inkermann, and the Siege of Sebastopol.
8. Major-General John Edward Dupuis, C.B., Royal Artillery.	Served the Eastern Campaign of 1854-5, including the Battles of Alma, Balacava, and Inkermann, and Siege of Sebastopol.
STAFF.	
9. Brevet Lieut.-Colonel George Wynell Mayow, Unattached.	Served as a Staff Officer attached to the Cavalry in the Campaign of 1854-5, and was present at the Battles of Alma, Balacava, and Inkermann, and Siege of Sebastopol.
10. Lieut.-Colonel Hon. Adrian Hope, h. p., 93d Regiment.	Served on the Staff of the Third Division at Alma, Inkermann, and Siege of Sebastopol till April 1855, when he was ordered to join his regiment at home in consequence of regimental promotion.
11. Brevet Lieut.-Colonel Hon. Leicester Curzon, Rifle Brigade.	Served the Eastern Campaign of 1854-5 as Assistant Military Secretary to the late Field Marshal Lord Raglan; and afterwards in the same capacity to General Sir James Simpson, G.C.B. Was present at the Battles of Alma, Balacava, and Inkermann, and the Siege of Sebastopol.
12. Brevet Lieut.-Colonel Kenneth Douglas Mackenzie, 92d Regiment.	Served the Eastern Campaign of 1854-5. Served at the Battles of Alma and Inkermann, as a Brigade Major attached to the Light Division. Afterwards as an Assistant Quartermaster General at Balacava.
13. Brevet Lieut.-Colonel Hugh Smith, 3d Regiment (late).	Served the Eastern Campaign of 1854-5; at the Alma, Balacava, and Inkermann as a Deputy Assistant Quartermaster General attached to the Fourth Division; afterwards, during the Siege of Sebastopol, as Assistant Adjutant General to that Division; and in the same capacity with the Expedition to Kinburn.

Rank, Name, and Regiment.	SERVICES.
STAFF— <i>continued.</i>	
14. Brevet Lieut.-Colonel Joseph Edwin Thackwell, Unattached.	Served the Eastern Campaign of 1854-5; at the Battles of the Alma and Inkermann, and Sortie of the 26th October 1854, and till August 1855 as a Brigade Major attached to the Second Division; subsequently as Assistant Adjutant-General to the Third Division.
15. Brevet Lieut.-Colonel Robert Lockhart Ross, Dépôt Battalion.	Served the Eastern Campaign of 1854-5 as a Captain with the 93rd Regiment at the Battles of Alma and Balacava, and subsequently on the Staff as an Assistant Adjutant-General at Balacava.
16. Brevet Lieut.-Colonel Lawrence Shadwell, Unattached.	Served the Eastern Campaign of 1854-5; at the Battles of Alma, Balacava, and Inkermann, and part of the Siege of Sebastopol as Aide-de-Camp to Lieut.-General Sir Colin Campbell, G.C.B., subsequently during the remainder of the service as an Assistant Adjutant-General.
17. Lieut.-Colonel Edward Bruce Hamley, Royal Artillery.	Served the Eastern Campaign of 1854-5, including the Battles of Alma and Balacava and Inkermann, sortie of 26th October 1854, and the Siege of Sebastopol.
18. Brevet Lieut.-Colonel Hon. Augustus Murray Cathcart, Unattached.	Served the Eastern Campaign of 1854-5; at the Battles of Alma and Inkermann as Aide-de-Camp to the late Major General the Hon. Sir George Cathcart, K.C.B.; during the Siege of Sebastopol as Deputy Assistant Quartermaster-General to the Light Division.
19. Brevet Lieut.-Colonel John Agmondisham Vesey Kirkland, Unattached.	Served the Eastern Campaign of 1854-5, including the Battles of Alma and Inkermann, and the Siege of Sebastopol up to August 1855, as Deputy Assistant Adjutant-General.
20. Brevet Major Vincent Wing, Dépôt Battalion (late 95th Regiment).	Served the Eastern Campaign of 1854-5; was severely wounded at the Battle of the Alma, when he was on the Staff of Major-General Sir John Lysaght Pennefather, K.C.B.; was afterwards with his Regiment during part of the Siege of Sebastopol.
21. Brevet Major Edward Fellowes, 11th Hussars.	Served the Eastern Campaign of 1854-5 as Deputy Assistant Quartermaster-General attached to the Cavalry Division; was present at the Battles of the Alma, Balacava, and Inkermann, and Siege of Sebastopol.
22. Brevet Major John Hackett, Unattached.	Served the Eastern Campaign of 1854-5 as Deputy Assistant Quartermaster General; was present at the Battles of Balacava and Inkermann, and the early part of the Siege of Sebastopol till ordered to proceed to Scutari, where the services of an Officer of the Quartermaster-General's Department were required.
23. Brevet Major Archibald Henry Plantagenet Stuart Wortley, Unattached.	Served the Eastern Campaign of 1854-5 as a Deputy Assistant Quartermaster General attached to the Third Division; was present at the Battles of the Alma and Inkermann and Siege of Sebastopol, including the Attack by Sir William Eyre's Column on the Cemetery on 18th June 1855.
24. Brevet Major Hon. Gilbert Elliot, Rifle Brigade.	Served the Eastern Campaign of 1854-5; at the Battles of the Alma and Balacava as Aide-de-Camp to the late Major General the Hon. Sir George Cathcart, K.C.B.; was compelled by ill health to be sent to England, but returned after a short absence, and served during the remainder of the Siege of Sebastopol and till the army broke up, as a Deputy Assistant Quartermaster General.
25. Brevet Major William Faussett, 44th Regiment.	Served the Eastern Campaign of 1854-5 as a Brigade Major attached to the Third Division; was present at the Battles of the Alma and Inkermann, and during the Siege of Sebastopol, including the Attack on the Cemetery by Major-General Sir Wm. Eyre's Column on 18th June 1855.
26. Brevet Major Archibald Campbell Snodgrass, 38th Regiment.	Served the Campaign of 1854-5; was present at the Battles of Alma and Inkermann, expedition to Kerteh, and Siege of Sebastopol, and was severely wounded at the Assault on the Redan on 18th June 1855, as Aide-de-Camp to the late Major-General Sir John Campbell, K.C.B. Rejoined the 38th Regiment on his recovery, and served with it till the conclusion of the War.

Rank, Name, and Regiment.	SERVICES.
<i>STAFF—continued.</i>	
27. Brevet Major Hon. William James Colville, Rifle Brigade.	Served the Eastern Campaign of 1854-5 with the Rifle Brigade at the Battle of the Alma, and subsequently as Aide-de-Camp to General Sir James Simpson, G.C.B., during the Siege of Sebastopol.
28. Brevet Major Algernon Robert Garrett, 46th Regiment.	Served as Brigade Major attached to the Fourth Division during the Siege of Sebastopol.
29. Brevet Major Frederick Augustus Thesiger, Grenadier Guards.	Served during a part of the Siege of Sebastopol with his Regiment, and as Aide-de-Camp to Major-General Markham till that Officer's return to England at the end of the Siege.
30. Major Andrew Pitcairn, 42d Regiment.	Served the Campaign of 1854-5; including the Battles of Alma and Balaclava, Expedition to Kertch, and Siege of Sebastopol.
31. Brevet Major Richard George Amherst Luard, 77th Regiment.	Served at the Siege of Sebastopol from March 1855 as a Deputy Assistant Adjutant-General.
32. Brevet Major Richard Lyons Otway Pearson, Grenadier Guards.	Served the Campaign of 1854-5 as Aide-de-Camp to Lieut.-General Sir George Brown, G.C.B., including the Battles of Alma and Inkermann, Expedition to Kertch, and Siege of Sebastopol.
33. Brevet Major Frederick Hammersley, 14th Regiment.	Served during the Siege of Sebastopol, in the early part with his regiment, and subsequently as a Deputy Assistant Quartermaster General.
34. Brevet Major Charles William St. Clair, 57th Regiment.	Served the Eastern Campaign of 1854-5, including the Battles of Alma and Inkermann and Siege of Sebastopol. Was severely wounded at the Attack on the Redan, 18th June, 1855.
35. Captain Arthur Edward Valette Ponsonby, Grenadier Guards.	Served as Aide-de-Camp to General Sir George Brown at the Expedition to Kertch, and subsequently at the Siege of Sebastopol, till Sir George Brown's return to England after 18th of June. After that, till the end of the War as Aide-de-Camp to Lieut.-General Sir W. Codrington, K.C.B.
36. Captain Henry Clarke Jervoise, Coldstream Guards.	Served the Campaign of 1854-5 with the 42nd Regiment at Alma and Balaklava, and as Aide-de-Camp to Major-General Sir Richard Airey, K.C.B., the Quartermaster General of the Army, during the Siege of Sebastopol.
37. Captain Hon. Charles James Keith, 4th Light Dragoons.	Served the Campaign of 1854-5 as Aide-de-Camp to Lieut.-General Sir Richard England, G.C.B.; was present at the Battle of Inkermann, and during the Siege of Sebastopol.
38. Captain Roger Swire, h. p. 17th Regiment.	Served at the Siege of Sebastopol from December 1854; was severely wounded at the Assault on the Redan on 8th September. Served subsequently as Aide-de-Camp to Major-General Windham, C.B.
39. Captain Charles Edward Mansfield, 33rd Regiment.	Served the Campaign of 1854-5 as Aide-de-Camp to Lieut.-General Sir Colin Campbell, G.C.B.; including the Battles of Alma and Balaclava, and Siege of Sebastopol.
40. Captain Richard George Ellison, 47th Regiment.	Served the Eastern Campaign of 1854-5, including the Battles of Alma and Inkermann, and Sortie on 26th October 1854; in the latter part of the Siege as Aide-de-Camp to Major-General Sir John Lysaght Pennefather, K.C.B.
41. Captain William Earle, late 49th Regiment.	Served the Eastern Campaign of 1854-5, including the Battles of Alma and Inkermann, Sortie on 26th October 1854, and Siege of Sebastopol; latterly as a Brigade Major attached to 2nd Division.
42. Captain Henry Hooper Day, 88th Regiment.	Served at the Battle of Inkermann and Siege of Sebastopol, including the Attack on the Quarries and Assaults on the Redan on 18th June and 8th September 1855; in the latter part of the Siege as Aide-de-Camp to Brigadier General Shirley.
43. Captain George Montague Stopford, R.E.	Was present at the Battles of the Alma, Balaklava, and Inkermann, and part of the Siege of Sebastopol as Aide-de-Camp to General Sir John Fox Burgoyne, Bart., G.C.B.
4TH DRAGOON GUARDS.	
44. Brevet Lieut.-Colonel William Charles Forrest.	Served the Campaign of 1854-5, including the Battles of Balaclava and Inkermann and Siege of Sebastopol.
45. Brevet Major Francis Rowland Forster.	Commanded the first squadron of the regiment at the Battle of Balaclava on 25th October 1854.

Rank, Name, and Regiment.	SERVICES.
4TH DRAGOON GUARDS—continued.	
46. No. 463. Troop Serjeant-Major John Evans.	Displayed gallant conduct at the Battle of Balacava, where he was wounded.
47. Lieut.-Colonel Thomas Westropp M'Mahon, C.B.	Served the Campaign of 1854-5, including the Battles of the Alma, Balacava, and Inkermann, and the Siege of Sebastopol. Served in 1854 as Assistant Quartermaster General of the Cavalry Division, and in 1855, as Lieut.-Colonel commanding 5th Dragoon Guards.
48. Assistant Surgeon William Cattell -	Was present during the whole of the Campaign in the Crimea, and showed the greatest zeal during the time of the Cholera, and during the action at Balacava, and wherever his services were required under fire.
49. No. 1005. Lance Serjeant James Gamble.	Was under fire a considerable portion of the day on the 25th October, as Orderly to Major-General the Hon. Sir James Yorke Scarlett, K.C.B.; had his horse shot through the thigh, but provided another and returned to his duty immediately.
6TH DRAGOON GUARDS.	
50. - - - - - }	(Two medals have been assigned to this Regiment, now on Foreign Service, but no answer has yet been received as to whether any men are eligible.)
51. - - - - - }	
1ST DRAGOONS.	
52. Colonel John Yorke, C.B. (late) -	Served in the Crimea until the Battle of Balacava, when he was so severely wounded in command of his Regiment, as to oblige him to retire from active service.
53. Captain George Campbell (late) -	Displayed gallant conduct under fire in the Cavalry Action at Balacava on the 25th October 1854, and continued in command of his troop, although <i>severely</i> wounded, until the regiment was out of fire.
54. No. 976. Serjeant John Hill -	Displayed coolness and intrepidity when on patrol and attacked by a party of Russians on the 10th of October 1854. And again on the 25th October 1854, when his horse was shot under him, on which occasion having captured one belonging to the enemy, he immediately rejoined his regiment, and did duty with it for the rest of the day.
2ND DRAGOONS.	
55. Colonel Henry Darby Griffith, C.B.	Served the Campaign of 1854-5; commanded his Regiment at the Battle of Balacava.
56. Captain George Buchanan - - -	This Officer's conduct in the Heavy Cavalry Charge at the Battle of Balacava was cool and gallant, and by his example great execution was done against the Enemy; he afterwards commanded a squadron under fire in support of the Light Brigade Charge.
57. No. 1052. Serjeant Major John Wilson.	This Serjeant was under arrest for a minor offence. On finding the Regiment was likely to be engaged, he made ready his horse, and coming up to the Adjutant, said, "I have broken my arrest, sir, as I could not see my Regiment going into action, and remain quiet in camp; I have come to report myself, and wish to join and do my duty." In the Heavy Cavalry Charge at Balacava he fought most gallantly, using his sword with great execution. He was afterwards wounded by a round shot when his Regiment went in support of the Light Brigade. He was promoted to Troop Serjeant Major for his gallant conduct.
4TH LIGHT DRAGOONS.	
58. Colonel Lord George Augustus Frederick Paget, C.B. (late)	Served the Campaign of 1854-5, including the Battles of the Alma, Balacava, and Inkermann, and Siege of Sebastopol, and the Battle of the Tchernaya. In 1854, was in command of the 4th Light Dragoons; in 1855, in command of a Brigade of Light Cavalry.
59. Brevet Lieut.-Colonel Alexander Lowe.	Served the Campaign of 1854-5, including the Battles of the Alma, Balacava, Inkermann, and the Tchernaya, and Siege of Sebastopol: in 1854, as Major of the 4th Light Dragoons; in 1855, in command of the Regiment.

Rank, Name, and Regiment.	SERVICES.
4TH LIGHT DRAGOONS—<i>continued.</i>	
60. Brevet Major Robert Portal -	Served the Eastern Campaign of 1854-5, Alma, Balacava Inkermann, and Siege of Sebastopol.
61. No. 1215. Troop Serjeant Major William Waterson.	Displayed very gallant conduct at the Battle of Balacava, in the Light Cavalry Charge, particularly in the retreat of the Regiment after they had sabred the Artillerymen at their guns.
6TH DRAGOONS.	
62. Captain Edmund D'Arcy Hunt -	Captain Hunt was Squadron Leader of the 2nd Squadron of the 6th Dragoons, which was detached under the command of Lieut.-Colonel Shute, during the Battle of Balacava, and led the Squadron with great steadiness and gallantry, particularly in a flank attack made by Lieut.-Colonel Shute on the Squadrons of the Enemy, which were threatening to surround that portion of the Regiment which was under the immediate command of Lieut.-Colonel White, C.B.
63. Trumpeter No. 602, John Hardy -	Acted as Field Trumpeter to Lieut.-Colonel White, C.B., during the Battle of Balacava, and was consequently more exposed during the whole of that day than any other man in the Regiment, more particularly during the Charge of the Heavy Brigade, on which occasion he behaved very gallantly.
8TH HUSSARS.	
64. Lieut.-Colonel Rodolph De Salis -	Served the Campaign of 1854-5, including the Battles of the Alma, Balacava, Inkermann, and Tchernaya, and Siege of Sebastopol; also commanded the Cavalry on the Expedition to Kertch: in 1854, as Major of 8th Hussars; in 1855, in command of the Regiment.
65. Brevet Major Edward Tomkinson (late).	Major Edward Tomkinson advanced with the Light Brigade at Balacava, and led the Squadron he commanded with courage and steadiness. He had his horse shot under him. He was subsequently present at the Battle of the Tchernaya.
66. No. 1204. Trumpeter William Wilson.	Trumpeter William Wilson charged with the Light Brigade at Balacava, and evinced great coolness and courage, being then only sixteen years of age. He was subsequently present at the Battle of the Tchernaya.
10TH HUSSARS.	
67. Colonel William Parlbby (late) -	Commanded a Brigade of Cavalry in the Campaign of 1855, before Sebastopol, and at the Battle of the Tchernaya.
11TH HUSSARS.	
68. Lieutenant and Adjutant John Yates	Was present in the Crimea from the commencement of the Campaign until August 1855; was present at the Alma, Balacava, and Inkermann, and behaved gallantly. Acted as Brigade Major to Major-General the Earl of Cardigan, K.C.B., at Balacava, and for a fortnight previously.
69. No. 1495. Serjeant Robert Davies	After having passed through the Battery in the Light Cavalry Charge, perceiving a Russian field piece limbered up to retreat, Serjeant Davies called Private John T. Bambrick, 11th Hussars, who was riding next him, to follow and endeavour to capture it; in going to perform this duty, he was attacked by two Russian Lancers, one of whom he cut down, the other shot his horse; when on the ground he received a lance wound on the right thigh; he then caught a loose horse and rejoined his Regiment.
12TH LANCERS.	
70. Major Thomas George Alexander Oakes.	Commanded a Squadron of the 12th Lancers, detached as the escort of General La Marmora, at the Battle of the Tchernaya.
13TH LIGHT DRAGOONS.	
71. Captain Percy Shawe Smith - -	Distinguished conduct in the Light Cavalry Charge at Balacava on the 25th October 1854.
72. No. 1405. Corporal William Gardiner	Distinguished conduct in the Light Cavalry Charge at Balacava on the 25th October 1854.

Rank, Name, and Regiment.	SERVICES.
17TH LANCERS.	
73. Colonel John Lawrenson (late) -	Commanded the 17th Lancers at the Alma, and a Brigade of Cavalry in the Campaign of 1855.
74. Cornet James Duncan -	Served the Eastern Campaign of 1854-5 to the end of the War, including the affair of the Bulganak, Battles of Alma, Balacava (horse killed), and Inkermann (horse killed), and Siege of Sebastopol. Was never absent from the Regiment.
75. No. 493. Serjeant A. Ranson -	Embarked with the Regiment for Foreign service. Was present at the Battles of Alma, where he distinguished himself; Balacava, where he again distinguished himself by engaging and cutting down a Russian officer; and Inkermann; Siege of Sebastopol. Was never absent from the Regiment.
GRENADIER GUARDS.	
76. Colonel Charles William Ridley, C.B.	Commanded the Grenadier Guards for the first six months of the Siege of Sebastopol in 1855, and subsequently a Brigade in the 1st Division during the remainder of the Siege and till the end of the year.
77. Lieut.-Colonel Lord Arthur Hay -	Served during the Siege of Sebastopol from the end of 1854 until the termination of the War; a great part of the time as Assistant Adjutant General to the 1st Division.
78. Captain Charles Napier Sturt -	Served during the Eastern Campaign, including the Battles of Alma, Balacava, and Inkermann; at the latter, was severely wounded; and Siege of Sebastopol.
79. Captain Henry William Verschoyle	Served through the whole of the Campaign, and carried the regimental colours at Inkermann, when surrounded by the enemy. His conduct on that occasion was highly praise-worthy; and he was an active and intelligent officer in the trenches.
80. Captain Robert William Hamilton -	Was wounded when carrying the colours at Alma, but continued with them throughout that day. Was with the colours again at Inkermann, when surrounded by the enemy. On both occasions, he showed gallantry and coolness.
81. No. 3593. Colour Serjeant Richard Minor.	Was with the colours, when surrounded by the enemy at Inkermann.
82. No. 4931. Private Thomas Sharpe -	Served with distinction both at Alma and Inkermann.
COLDSTREAM GUARDS.	
83. Lieut.-Colonel Clement William Strong.	Served the Eastern Campaign, including the Battles of Alma, Balacava, and Inkermann, and Siege of Sebastopol.
84. Lieut.-Colonel Lord Augustus Charles Lennox Fitz Roy (late).	Served at the Battles of Balacava and Inkermann, and at the latter was very severely wounded; Siege of Sebastopol.
85. Brevet-Major Philip Sambrook Crawley.	Was present at Alma, Balacava, and Inkermann, and the whole of the trench duty.
86. Brevet-Major Sir James Dunlop, Bart.	Was present at Alma, Balacava, Inkermann, and the whole of the trench duty.
87. Brevet Major John Augustus Conolly	Served during the Eastern Campaign of 1854, with the 49th Regiment, including the Battle of the Alma, and Siege of Sebastopol; was highly distinguished and severely wounded at the repulse of the Sortie made on the 2d Division on 26th October 1854. This officer has received the decoration of the Victoria Cross.
88. No. 3366. Serjeant G. Haynes -	Was present at Alma, Balacava, Inkermann, and the whole of the trench duty.
89. No. 3714. Lance Serjeant F. File -	Was present at Alma, Balacava, Inkermann, and the whole of the trench duty. After the Battle of Inkermann, he was sent with a party of four men to collect the wounded; having sent the party to camp with wounded men, he found, when alone, twenty-nine Russians (three of them severely wounded), in a quarry; he took them prisoners without resistance, and brought them to camp.
SCOTS FUSILIER GUARDS.	
90. Colonel Edward Walker Forestier Walker, C.B.	Commanded the Scots Fusilier Guards in the Crimea from 22d September to the end of the War. Was at the Battles of Balacava and Inkermann, (where he was severely wounded,) and the Siege of Sebastopol.

Rank, Name, and Regiment.	SERVICES.
SCOTS FUSILIER GUARDS—<i>cont.</i>	
91. Brevet-Major Hon. Wenman Clarence Walpole Coke.	Major Coke served with zeal at the Siege of Sebastopol, and distinguished himself by his coolness under fire in the trenches.
92. Brevet Major Hon. Alexander Edward Fraser.	Served during the Eastern Campaign of 1854 and part of 1855, including the Battles of Alma, Balacava, and Inkermann, and Siege of Sebastopol.
93. Captain Seymour John Blane (late), now of the 52d Regiment.	Served during the Eastern Campaign of 1854-55, including the Battles of Balacava and Inkermann, where he was severely wounded. Siege of Sebastopol.
94. Captain John Scott	Served the Crimean Campaign with distinction, especially at the Battle of the Alma; he was then in the 79th Regiment. He afterwards served before Sebastopol in the Scots Fusilier Guards with credit to himself, and benefit to the service.
95. No. 3483. Serjeant John M'Blain	Served throughout the whole Campaign, and was conspicuous for gallantry, energy, and zeal. He was present at Alma, Balacava, Inkermann, and Siege of Sebastopol.
96. No. 3215. Serjeant J. Stewart	Distinguished himself by his gallantry at the Battles of Alma, Balacava, and Inkermann, and Siege of Sebastopol.
1ST BATTALION, 1ST REGIMENT.	
97. Lieut.-Colonel Alexander Barry Montgomery, C.B.	Served during the Eastern Campaign in 1854, including the Battles of Alma and Inkermann, and Siege of Sebastopol, up to 23d August 1855.
98. Brevet Lieut.-Colonel Hon. Charles Dawson Plunkett.	Served during the Eastern Campaign of 1854-5, including the Battles of Alma and Inkermann, and Siege of Sebastopol.
99. Captain William Frederick John Rudd.	Faithful, zealous, and active in the discharge of his duties throughout the whole Campaign.
100. Captain William Spicer Cookworthy, h. p. (late).	Faithful, zealous, and active in the discharge of his duties throughout the whole Campaign.
101. Lieutenant Frederick Harry Hope	Served the Eastern Campaign of 1854-5, including the Battles of Alma and Inkermann, and Siege of Sebastopol.
102. No. 1847. Serjeant-Major R. Henshall.	Faithful, zealous, and active in the discharge of arduous duties throughout the whole Campaign.
103. No. 1589. Colour-Serjeant William M'Dowell.	Faithful, zealous, and active in the discharge of arduous duties throughout the whole Campaign.
2ND BATTALION, 1ST REGIMENT.	
104. Brevet Lieut.-Colonel Francis Gregor Urquhart	Was present at the Siege of Sebastopol from 22d April 1855.
105. Major William James Gillum (late)-	Rendered constant, zealous, and efficient service in the Trenches before Sebastopol, from the 22d April to the 8th September 1855, on which day during the Attack on the Redan he was severely wounded (lost a leg).
106. No. 2474. Private G. Woodhouse	Rendered constant, active, willing, and efficient service in the Trenches before Sebastopol, from the 22d April to the 8th September 1855. His claims to distinction were considered to entitle him to receive the French military war-medal had there been more distributed at the time.
3RD REGIMENT.	
107. Colonel Charles Thomas Van Straubenze, C.B. (late).	Served during the Siege of Sebastopol from April 1855, and commanded a Brigade of the Light Division at the Assault on the Redan on 8th September 1855.
108. Brevet Major George James Ambrose	Displayed conspicuous bravery when in command of a party (200) of the Buffs on the 7th June 1855, in repelling a Sortie of the Enemy in their endeavour to retake the Quarries, when he was dangerously wounded. Was also present at the Attack and Capture of the Quarries in the earlier part of the day. Promoted to be Brevet Major for his services on that occasion. Was mentioned in Despatch, 20th June 1855.

Rank, Name, and Regiment.	SERVICES.
3RD REGIMENT—continued.	
109. No. 2635. Private John Fahey -	On the night of the 14th August 1855, was one of a Picquet posted at the head of a ravine in front of a working party. The Picquet was in the open; a very heavy fire was commenced by the Enemy upon the working party; Private Fahey was the only one of the Picquet who stood his ground, which he did all night. Was generally remarked by his Officers for zeal, devotion, and alertness in the Trenches.
4TH REGIMENT.	
110. Lieut.-Colonel John Josiah Hort (late)	Served the Eastern Campaign, including the Battles of Alma and Inkermann, and Siege of Sebastopol.
111. Captain Francis Fisher Hamilton -	Served the Eastern Campaign, including the Battles of Alma (wounded) and Inkermann, and Siege of Sebastopol.
112. Captain Augustus Joseph Sykes (late)	Was present with the Head Quarters of his Regiment during the whole Eastern Campaign. Was cheerful and zealous in the performance of his duties during the period of the Siege operations.
113. Lieutenant John Howley -	Joined the Head Quarters of his Regiment in the Crimea on the 8th November 1854. Was remarkable for zeal and activity in the discharge of his duty on all occasions when under fire. Remained with his Regiment until the embarkation of the Army for England in 1856.
114. No. 2564. Serjeant J. M'Ardeil -	Served continuously with his Regiment throughout the Eastern Campaign. Was always most conspicuous for the active, cheerful, and zealous performance of his duty in the Trenches during the winter of 1854-5. Frequently volunteered and went on the Trenches night after night with readiness, when owing to excessive sickness, sufficient Non-commissioned Officers could not be found for duty. Was never absent a day from his duty during the whole Campaign from sickness or any cause.
115. No. 1358. Private Thomas Scannells	Served continuously with his Regiment during the whole of the Eastern Campaign. Was always conspicuous for zealous and cheerful performance of his duty. On the night of the 5th May 1855 this man was on sentry in front of the advanced Trench before Sebastopol, when a small party of the 4th Regiment, under command of the late Captain Arnold, was surprised by a large body of Russians, who fired upon them (mortally wounding and taking prisoner Captain Arnold), and compelled them to retire; when, consequent on the surprise and confusion which existed, some of the sentries on adjacent posts ran into the Trench. Private Scannells, however, remained firm on his post, and by his example encouraged the other sentries to stand fast.
7TH REGIMENT.	
116. Lieut.-Colonel Reginald Yonge Shipley (late).	Was present at the Battle of the Alma, where he was very severely wounded.
117. Brevet Lieut.-Colonel John Rowley Heyland (late).	Served in the Siege of Sebastopol in 1855. He was very severely wounded at the Attack on the Redan, 8th September 1855.
118. Brevet Major Hugh Robert Hibbert	Served Eastern Campaign of 1854-55, Alma (wounded), Inkermann, Siege of Sebastopol, assaults on the Redan on 18th June and 8th September. Was wounded in the Trenches, and very severely on 8th September 1855.
119. Lieutenant William Hope (late) -	At the great explosion of the French siege train, on the 15th November 1855, Lieutenant Hope was conspicuous for his coolness and activity, when in charge of a fatigue party, to cover the mill with wet blankets; the roof had been blown off, and 160 tons of gunpowder were exposed to the fire of burning materials, rockets, &c.; he mounted the mill, and by his courage and example saved the magazine, which was momentarily expected to explode, and preserved the lives of probably hundreds of the Light Division. His conduct received the marked encomiums of

Rank, Name, and Regiment.	SERVICES.
7TH REGIMENT—continued.	
120. No. 1478. Private William Barrack	the authorities. He had previously distinguished himself at the assault and taking of the Quarries. This Officer has received the decoration of the Victoria Cross. Volunteered for sharpshooting on the 17th October 1854, and continued with the Sharpshooters until the Battle of Inkermann, where he was severely wounded. On the 17th October 1854, he was taken prisoner while out with the Sharpshooters, and made his escape on the same day.
121. No. 2999. Private John M'Guire - (<i>Has deserted since he was recommended for the Medal.</i>)	On the 6th May 1855, Private John M'Guire, at the risk of his own life, brought in a wounded comrade who was lying in the Woronzow-road. To perform this meritorious act he was obliged to cross a considerable space of open ground, exposed to the fire of the Russian Sharpshooters. Private John M'Guire was also present at the Battles of Alma and Inkermann, the Storming of the Quarries, and both the Assaults on the Great Redan.
9TH REGIMENT.	
122. Lieut.-Colonel Frederick D. Lister (late).	Served during the Siege of Sebastopol, from 27th November 1854 till the capture of the place.
123. Captain William Nugent (late) -	Displayed gallant conduct in the Trenches on several occasions between the 27th November 1854 and 8th September 1855; also during the Attack on the Cemetery on the 18th June 1855.
124. No. 3035. Serjeant P. Donohue -	Displayed gallant conduct in the Trenches on many occasions during the Siege of Sebastopol; also on 18th June 1855, during the Attack on the Cemetery.
14TH REGIMENT.	
125. Colonel Maurice Barlow (late) -	Served in the Siege of Sebastopol from January 1855; was in command of a Brigade at the fall of the place.
126. Brevet Lieut.-Colonel Sir James Edward Alexander (late).	Served in the Siege of Sebastopol from January 1855.
127. Captain John Gittens Maycock -	Was present with the 47th Regiment at the Battles of Alma and Inkermann, and the Sortie on the 26th October 1854. Wounded at the Battle of Alma.
128. No. 2788. Serjeant W. Hopkins -	Particularly recommended by the Officers of the Regiment for zealous and exemplary conduct in the Trenches.
17TH REGIMENT.	
129. Brevet Major Alexander M'Kinstry	Displayed gallant conduct on the 18th June 1855 at the Assault on the Great Redan.
130. No. 1846. Color Serjeant H. Gibson	Displayed remarkable intelligence and general gallantry in the Trenches throughout the whole time the Regiment served at the Siege of Sebastopol.
18TH REGIMENT.	
131. Lieut.-Colonel John Clark Kennedy, C.B. (late).	Served in the Siege of Sebastopol from December 1854, including the Attack on the Cemetery on 18th June 1855.
132. Brevet Lieut.-Colonel George Frederick Stevenson Call.	Siege of Sebastopol in 1855.
133. Lieutenant Thomas Durand Baker -	Displayed great gallantry on the 18th June 1855 at the Assault of Sebastopol, and zeal in the Trenches.
134. No. 2659. Private J. Weir -	Displayed gallant conduct at the Assault of Sebastopol, 18th June 1855, specially, and on several previous occasions.
19TH REGIMENT.	
135. Lieut.-Colonel Robert Warden (late) unattached.	Served the Campaign of 1854 and 1855, including the Battles of the Alma and Inkermann, at both of which he was wounded; the whole of the Siege of Sebastopol; and was also engaged at the Attack on the Quarries, and on the Redan, 8th September 1855.
136. Captain Henry Turner Uniacke -	Served the Campaign of 1854 and 1855, including the Battle of the Alma and the whole of the Siege of Sebastopol, including the Attack on the Redan on 8th September 1855.

Rank, Name, and Regiment.	SERVICES.
19TH REGIMENT—continued.	
137. Captain George Alexander Warburton.	Landed in the Crimea on the 17th of January 1855; served during the Siege of Sebastopol, including the Assault on the Redan of the 8th September 1855; was never absent from his duty during this period from sickness or any other cause.
138. Lieutenant and Adjutant Thomas Thompson.	Landed with his Regiment in the Crimea. Was present at the Battles of Alma and Inkermann, and during the Siege of Sebastopol, until ordered to England on duty on the 14th February 1855. Was never absent from his duty during the period of his service with the Eastern Expedition.
139. No. 2242. Serjeant John Sherlock	Was present during the whole of the Campaign of 1854-55, during which period he was never absent from his duty from sickness or any other cause. Was present at Alma, Inkermann, the taking of the Quarries, and at two Assaults on the Redan of the 8th September 1855, when he was slightly wounded.
140. No. 1106. Private John Halloran -	Served during the whole of the Campaign 1854-5. Was present at Alma, Inkermann, and the Assault of the 8th September 1855. During the whole of this period he was never absent from his duty from sickness or any other cause.
20TH REGIMENT.	
141. Colonel Frederick Horn, C.B. (late)	Served the Campaign of 1854-55 including the Battles of Alma and Inkermann, at the last of which he was wounded. Commanded a Brigade during the Siege of Sebastopol.
142. Major William Pollexfen Radcliffe -	Served the Campaign of 1854-55 including the Battles of Alma and Inkermann, and the whole of the Siege of Sebastopol.
143. Captain Charles Edward Parkinson	Landed in the Crimea on the 14th September 1854; was present at the Battles of Alma, Balaclava, and Inkermann, and through the whole of the Siege (except twenty-one days' sick leave at Balaclava). This Officer discharged his duty at all times with zeal and activity.
144. Lieutenant Hector Barlow Vaughan	Landed in the Crimea on the 14th September 1854. Was present at the Battles of Alma and Inkermann, and throughout the whole of the Siege of Sebastopol (except ten days sick on the heights). He performed his duty at all times diligently and with much zeal.
145. No. 1603. Colour-Serj. J. Whybrow	Landed with the Expedition on the 14th September 1854. Was present at all the Actions (wounded at Inkermann) through the whole of the Siege operations, and performed his duty with zeal, and was a very active and zealous Non-commissioned Officer in the Trenches.
146. No. 3324. Private Peter Rowe -	Landed in the Crimea 14th September 1854. Was present at all the Actions, and brought himself prominently to the notice of Brevet Major Hay at the Battle of Inkermann, in a position against a considerable force of the Enemy, which he did in a very gallant manner, and was conspicuously in the front of the small party of which he was one. He was afterwards severely wounded in the Trenches.
21ST REGIMENT.	
147. Colonel Charles Richard Sackville, Lord West, C.B. (late).	Served the Campaign of 1854-55, including the Battles of Alma and Inkermann, and the whole of the Siege of Sebastopol.
148. Brevet Major George Neeld Boldero	Served the Campaign of 1854, including the Battles of Alma and Inkermann, at the last of which he was severely wounded, and Siege of Sebastopol.
149. Captain Henry King (late)	Landed with his Regiment at Old Fort on the 14th September 1854. Was present at the Battles of Alma, Balaclava, and Inkermann. Was dangerously wounded through the neck at the latter engagement. Did duty in the Trenches up to the 5th November 1854.
150. Captain Richard Stephens (late) -	Landed with the Regiment at Old Fort, 14th September 1854. Was present at the Battles of Alma and Inkermann. Was very severely wounded (arm amputated) when carrying the Queen's colours in the latter engagement. Did duty in the Trenches to 5th November 1854.

Rank, Name, and Regiment.	SERVICES.
21ST REGIMENT— <i>continued.</i>	
151. No. 2838. Serj.-Major W. Fowler -	Landed with his Regiment at Old Fort. Was present at the Battles of Alma, Balaclava, and Inkermann. Did duty in the Trenches, and was present with his Regiment throughout the War.
152. No. 2045. Colour-Serjeant R. Ellis	Landed with his Regiment at Old Fort, 14th September 1854. Was present at Alma and Inkermann (wounded in the arm at the latter engagement). <i>Did his duty</i> in the Trenches, and was present with his Regiment until ordered to join the Reserve Companies at Malta on the 11th May 1855.
23RD REGIMENT.	
153. Colonel Daniel Lysons, C.B. (late) -	Served the Campaign of 1854 and 1855, including the Battles of Alma and Inkermann, and the whole Siege of Sebastopol. Engaged in the Assaults on the Redan on the 18th of June and 8th September 1855. On the latter occasion he was severely wounded.
154. Major Francis Edward Drewe (late) unattached.	For going out to the front under a very heavy fire on the evening of the 8th September 1855, to assist in bringing in Lieutenant and Adjutant Dyneley, 23d Fusiliers, who was lying mortally wounded near the Redan, where he had fallen during the unsuccessful Assault that day. This voluntary duty Major Drewe performed with the assistance of Corporal Shields and a party of four other volunteers. Major Drewe further served with credit throughout the whole of the Siege, including the Battles of Alma and Inkermann; Capture of Egerton's Rifle Pits; Capture of the Quarries; Sortie 22d March; Assaults on the Redan, 18th June and 8th September 1855 (wounded on 8th September).
155. Captain Sydney Crohan Millett (late).	Served the Campaign of 1854 and 1855, the Battles of Alma and Inkermann, and the whole of the Siege of Sebastopol. Was severely wounded on 8th September 1855, at the Assault on the Redan.
156. Lieutenant Luke O'Connor -	Displayed gallant conduct during the Battle of Alma, when one of the centre Serjeants of the Regiment, in seizing and bearing to the front one of the colours, when the officer carrying it was killed. Serjeant O'Connor carried the colour until the end of the Action, although severely wounded. Praised by Lieut.-General Sir William Codrington on the field. He also behaved with great gallantry in the assault on the Redan, 8th September 1855, where he was severely wounded through both thighs. This officer has received the decoration of the Victoria Cross.
157. No. 2949. Corporal E. Luby -	During the Battle of the Alma Corporal Luby snatched up the Queen's colour of the Regiment when Lieutenant Anstruther was shot dead, and carried it till the close of the Action. He served throughout the Siege, and displayed great coolness and courage at the Assault on the Redan on the 8th September 1855, where he acted as Orderly to Lieut.-Colonel Bunbury, and made himself very useful while on the parapet and in the ditch of the Redan.
158. No. 3310. Corporal Thomas Symonds	For going out to the front of the Trenches, Right Attack, with another man (since dead), and bringing in a wounded Corporal of the 97th Regiment. Was mentioned for it by Lieut.-General Sir William Codrington, K.C.B., in Divisional Orders, 7th September 1855, as follows:—"The Lieut.-General has great pleasure in referring to the good conduct of two men of the 23d Regiment, named James Brown and Thomas Symonds, who brought in from the front a Corporal of the 97th Regiment, who had been severely wounded, and left in a very exposed position, to which they went out most gallantly and humanely at the risk of their own lives. The Commander of the Forces in wishing their names to be publicly noticed, desires they may receive a gratuity of 3 <i>l.</i> each."

Rank, Name, and Regiment.	SERVICES.
28TH REGIMENT.	
159. Colonel Frank Adams, C.B. - -	Served the Campaign of 1854-55, the Battles of Alma and Inkermann, the whole Siege of Sebastopol, and engaged in the Attack on the Cemetery on 18th June 1855.
160. Lieut.-Colonel Robert Julian Baumgartner, C.B. (late).	Served the Campaign of 1854-55, the Battles of Alma and Inkermann, the whole Siege of Sebastopol, and was engaged in the Attack on the Cemetery on 18th June 1855.
161. Brevet Lieut.-Colonel Edmund Gilling Hallewell (late) unattached.	Served the Campaign of 1854-55, the Battles of Alma and Inkermann, and the whole Siege of Sebastopol.
162. Major Thomas Maunsell - - -	Served with the 28th Regiment in Turkey; landed in the Crimea 14th September 1854; was present at the Battles of the Alma and Inkermann. Volunteered as Captain to command the Sharpshooters of 3d Division; was employed as such from the opening of the Siege before Sebastopol till he was severely wounded on the 30th December 1854.
163. Captain Sussex Lennox Aubrey Beauclerk Messiter.	Served the Campaign of 1854 and 1855, Battles of Alma and Balaklava, and the whole Siege of Sebastopol.
164. Captain Thomas Lynden Bell (late)	Served with the 28th Regiment in Turkey; landed in the Crimea, 14th September 1854; was present at the Battles of the Alma and Inkermann; served at the Siege before Sebastopol from the commencement of the operations till August 1855, when he was obliged to leave on account of sickness. Was at the Attack and Occupation of the Cemetery before Sebastopol on the 18th June 1855.
165. No. 3361 Corporal J. M'Loughlin -	Served with the Regiment in Turkey; landed in the Crimea on the 14th September 1854; was present at the Battles of Alma and Inkermann; and Fall of Sebastopol. During the whole Siege Corporal M'Loughlin was never sick or absent from his duty one day, and took his regular tour of the Trench duty. On the 18th June 1855, he was at the Attack and Occupation of the Cemetery before Sebastopol, and volunteered to carry a letter to the advanced party from Major-General Sir William Eyre, then commanding the attack. This duty was performed in a most gallant manner under a very heavy and galling fire from the Enemy.
166. No. 2958. Private W. Gleeson -	Served with the Regiment in Turkey; landed with the Corps on the 14th September 1854 in the Crimea; was present at the Battles of the Alma and Inkermann, and Fall of Sebastopol; was present at the Attack and Occupation of the Cemetery before Sebastopol, 18th June 1855; volunteered on that occasion for the advanced party as Sharpshooter, and distinguished himself by carrying to the rear from an advanced post a wounded comrade, under a very heavy and galling fire from the Enemy.
30TH REGIMENT.	
167. Lieut.-Colonel James Thomas Mauleverer, C.B.	Served the Campaign of 1854-5; Battles of the Alma and Inkermann (severely wounded); Sortie on 26th October; the whole Siege of Sebastopol; and was wounded at the Assault on the Redan, 8th September 1855.
168. Brevet Lieut.-Colonel Thomas Henry Pakenham.	Displayed especial gallant conduct in leading his Company to the Attack at the Battle of the Alma, where he was dangerously wounded. Was particularly noticed by Lieut.-Colonel Mauleverer.
169. Major Robert Dillon - - -	Rendered good and gallant service in the Trenches before Sebastopol and on Inkermann heights during the winter of 1854-5.
170. Lieutenant and Adjutant Gilbert Howard Sanders.	The Siege of Sebastopol; was twice wounded and lost a leg at the Assault on the Redan on 8th September 1855.
171. No. 2482. Serjeant T. Shaw - -	Displayed distinguished conduct in the field in making a Russian mounted Officer prisoner, for which service he was specially thanked in Orders, by the General, 13th November 1854. The above act of gallantry took place at the Sortie, 26th October 1854, Lieut.-Colonel Mauleverer being personally cognizant of it.
172. No. 3680. Private J. Andrews -	For distinguished conduct in the field in having aided Serjeant Shaw to capture a Russian mounted Officer, for which service he (in conjunction with the Serjeant) was specially thanked in Orders, by the General, 13th November 1854. The above occurred at the Sortie, 26th October.

Name, Rank, and Regiment.	SERVICES.
31ST REGIMENT.	
173. Colonel George Staunton - -	Served in the Siege of Sebastopol from May 1855 to the capture of the place.
33RD REGIMENT.	
174. Lieut.-Colonel George Valentine Edward Mundy, C.B. (late).	Served the Campaign of 1854-55, the Alma, Inkermann, and the whole Siege of Sebastopol; was engaged in the Attack on the Redan, 18th June 1855.
175. Brevet Lieut.-Col. John Elias Collings	Served the Campaign of 1854-55; Alma, Inkermann, and Siege of Sebastopol; was engaged in the Attack on the Redan, 18th June.
176. Captain Alexander Bruce Wallis -	Was present with his Company at the Battle of Alma, and was called upon during the Action to carry one of the Regimental Colours. While so employed, he was severely wounded through the right thigh, and although suffering much he remained with the colours until the close of the Action. He was obliged to return to England, in consequence of his wound.
177. Lieut. Hon. R. H. De Montmorency	On the 8th September 1855, Lieut. de Montmorency went most gallantly over the parapet of the Redan at the commencement of the Assault, cheering on the men; and on the same day, he volunteered to lead a party to occupy some Rifle Pits, in order to prevent their being taken by the Russians, which he held for some time after the attacking party had been withdrawn.
178. Assistant Surgeon Thomas Clark	Served the Campaign of 1854-55, Battles of Alma and Inkermann, and the whole Siege of Sebastopol.
179. No. 3413. Private P. Leary -	Was one of the first men to enter the Redan on the 8th September 1855, and after having been severely wounded in the head he volunteered to assist in taking some Rifle Pits to prevent their being occupied by the Russians. This man was recommended for the French war medal. He is a brave soldier.
180. No. 2540. Private James Bond -	Behaved very gallantly after the attack on the Redan on the 18th June 1855; by volunteering to go out between the advanced works and the Redan under a very heavy fire to bring in the Honourable Edward Fitzclarence, of the 7th Fusiliers, who was severely wounded. He is a brave soldier, and deserving of reward.
34TH REGIMENT.	
181. Brevet Lieut.-Colonel John Simpson	Served during the Siege of Sebastopol from 9th December 1854; was engaged at the Capture of the Quarries, and Assault on the Redan on 8th September 1855.
182. Brevet Major Joseph Jordan -	Served during the Siege of Sebastopol from 9th December 1854; was engaged in the Sortie on 22d March at the Capture of the Rifle Pits, 19th April, and Assault of the Redan on the 18th June 1855, when he was severely wounded.
183. Lieutenant Abel Woodroffe Boyce -	For having at the assault on the Redan on the 18th June 1855, after the troops had retired to the Trenches, gone out in front of the advanced Trench under a heavy fire of grape, and rendered great assistance in bringing in Lieutenant and Adjutant Hobson, 7th Fusiliers, who was lying outside, severely wounded.
184. Lieutenant Francis Peel - -	For cool and gallant conduct at the Assault on the Redan on the 18th June 1855, on which occasion he was wounded.
185. No. 2954. Colour Serjeant J. Pratt -	Displayed gallant conduct at the Assault on the Redan in encouraging the men and assisting to carry a scaling ladder to the abattis, on which occasion he was wounded.
186. No. 3102. Corporal D. Coughlan -	Displayed gallant conduct at the Assault on the Redan on 18th June 1855, in assisting to carry a scaling ladder to the abattis, when the rest of the bearers first employed were either killed or wounded. He also brought in a wounded comrade to the Trenches under a heavy fire.

Rank, Name, and Regiment.	SERVICES.
38TH REGIMENT.	
187. Lieut.-Colonel James Pattoun Sparks, C.B.	Eastern Campaign of 1854-55. The Alma and the whole Siege of Sebastopol. Engaged in the Attack on the Cemetery on 18th June 1855.
188. Brevet Lieut.-Col. William James Loftus.	Eastern Campaign of 1854-55. The Alma and the whole Siege of Sebastopol. Engaged in the Attack on the Cemetery on 18th June 1855.
189. Lieutenant Constantine William Septimus Gaynor.	Rendered good and zealous service in the Trenches before Sebastopol till he was wounded severely by a rifle ball on the 21st February 1855.
190. Lieutenant Arthur Johnson Allix Ewen.	Was in advance on the 18th June 1855, in the Attack and Capture of the Cemetery by the Second Brigade, Third Division.
191. No. 3510. Private P. M'Guire -	Was in advance on the 18th of June 1855 in the Attack and Capture of the Cemetery by the Second Brigade, Third Division. Was one of those who reached close under the Russian batteries. Though severely wounded in the left hand, he remained at his post during the whole day, firing on the Russian embrasures.
192. No. 3516. Private T. Reynolds -	Was in advance on the 18th of June 1855 in the Attack and Capture of the Cemetery by the 2d Brigade, 3d Division. Was one of those who reached close under the Russian batteries. Always behaved <i>well</i> in the Trenches during the Siege.
39TH REGIMENT.	
193. Major Thomas Wright Hudson -	Served throughout the Siege of Sebastopol from 19th December 1854.
194. Lieut. and Adjutant Thomas Westropp Bennett.	Displayed general zealous and good conduct in the Trenches before Sebastopol during the Bombardments, and was present at the Attacks of the 18th June and 8th September 1855.
195. No. 3355. Private J. M'Cluskey -	On the 18th June 1855, when a party of the 39th Regiment was stationed in the Trenches overlooking the Cemetery, which had that day been taken possession of by the Brigade under Sir William Eyre, cries and groans of a wounded man attracted attention. Lieut. Smyth, in command of the party, asked for volunteers to accompany him to ascertain the cause. This man and another (who has received the French war medal) came forward, and they brought in a wounded serjeant of the 38th Regiment, who had been lying there for several hours. This act was performed under a heavy fire, and very close to the Russian sentries.
41st REGIMENT.	
196. Lieut.-Colonel Robert Pratt (late) (now of the 23d Regiment).	Served throughout the Siege of Sebastopol, and was wounded at the Attack on the Redan on 18th September 1855.
197. Major George Skipwith (late) -	Campaign of 1854-5; Alma; Sortie on 26th October; and Inkermann; the whole Siege of Sebastopol.
198. Major Henry Stratton Bush -	For having gallantly led men of his Company to an advanced position which he succeeded in holding against a superior force, at the Battle of Inkermann (severely wounded).
199. Captain George Peddie -	For having commanded a working party under a heavy fire with zeal, determination and courage, on duty, to reverse the Enemy's Trenches, after the taking of the Quarries.
200. No. 2316. Corporal W. Crawford -	For having on the 26th October 1854 volunteered and been conspicuous in cutting off and taking Prisoners a Russian Officer and Fourteen Soldiers.
201. No. 2924. Private P. Collins -	For being conspicuous in going to the front to carry off the late Colonel Carpenter when mortally wounded, under a heavy fire, at the Battle of Inkermann, and for repeated zeal in the discharge of a similar arduous duty.
42nd REGIMENT.	
202. Colonel Duncan Alexander Cameron, C.B. (late).	Served the Eastern Campaign of 1854-5; commanded the 42nd Regiment at the Battle of the Alma, and the Highland Brigade at Balaklava, and during the remainder of the Siege of Sebastopol; served in the Expedition to Kertch.

Rank, Name, and Regiment.	SERVICES.
42D REGIMENT—<i>continued.</i>	
203. Lieut.-Colonel Alexander Cameron -	Served the Eastern Campaign of 1854-5, including the Battles of Alma and Balacava, and Siege of Sebastopol.
204. Captain Henry Montgomery (late) -	Served the whole Campaign in the Crimea; the greater part of the time on the Staff as Aide-de-Camp to Major-General Cameron, C.B. Was present at the Battles of Alma and Balacava, and throughout the Siege of Sebastopol. Had no opportunity of distinguishing himself on any particular occasion, but was always at his post, and was at all times zealous and active in the discharge of his duties under fire.
205. Captain Sir Peter Arthur Halkett, Bart. (late).	Served with the 42nd Regiment in the Crimea, to the 24th October 1855. Was present at the Battles of Alma, Balacava, and Siege of Sebastopol. Had no opportunity of distinguishing himself on any particular occasion, but was a great deal under fire, and was at all times zealous and active in the discharge of his duties in presence of the Enemy.
206. No. 1223. Colour Serjeant D. Dalgleish.	Served the whole Campaign in the Crimea. Was present at the Battles of Alma and Balacava, and Siege of Sebastopol; and was distinguished for his good behaviour and discipline at all times before the Enemy and under fire.
207. No. 1031. Private E. McMillan -	Served the whole Campaign in the Crimea. Was present at the Battles of Alma and Balacava, and Siege of Sebastopol; and was distinguished for his good behaviour and discipline at all times before the Enemy and under fire.
44TH REGIMENT.	
208. Colonel Hon. Augustus Almeric Spencer, C.B. (late).	Served the Eastern Campaign of 1854-55. Commanded the 44th Regiment at Alma and Inkermann, and Siege of Sebastopol, including the Attack on the Cemetery on 18th June 1855. Commanded the Troops on the Expedition to Kinburn.
209. Lieut.-Colonel Charles William Dunbar Staveley, C.B.	Served the Eastern Campaign of 1854-55, including Battles of Alma and Balacava, Siege of Sebastopol, Attack on Cemetery, 18th June 1855.
210. Brevet Lieut.-Colonel William McMahon.	Served the Eastern Campaign of 1854-5, including Battles of Alma and Inkerman, Siege of Sebastopol, and Attack on Cemetery.
211. Brevet Major William Fletcher -	Served the Eastern Campaign of 1854-5, including the Battles of Alma and Inkermann, Siege of Sebastopol, and Attack on Cemetery 18th June 1855.
212. Captain Robert Baillie -	Landed in the Crimea with the 44th Regiment. Served throughout the whole Campaign. Was most active in the Trenches during the bad winter of 1854; was only absent a few weeks from his duty in consequence of severe illness. Was present at the Capture of Kinburn.
213. Lieutenant William Arthur Wood -	Landed in the Crimea with the 44th Regiment. Served through the whole Campaign with it, until the Regiment returned to England. At the Siege of Sebastopol, never missed a trench, except whilst on the sick list from a contusion received 17th October 1854, the first day of the Bombardment. Was present and in advance at the affair of the Cemetery on the 18th June. Served as Adjutant to the Regiment from 20th January 1855 till the end of the Siege. Was most active on all occasions, but especially during the bad winter of 1854.
214. No. 3180. Private William Doole -	Served throughout the Campaign, except for four months, on account of wounds. Volunteered as a Sharpshooter at the commencement of the Siege, and was wounded October 1854; returned to duty March 1855 in the Trenches, where he was always ready. He again volunteered on the 18th June 1855 for the Advance Guard of Major General Sir William Eyre's Brigade, when he was again wounded, and particularly noticed.

Rank, Name, and Regiment.	Services.
44TH REGIMENT— <i>continued.</i>	
215. No. 3351. Private William Woodgate.	Served throughout the whole War in the Trenches. Was found active and vigilant, and always ready for anything. He was present at the Attack on the Cemetery, where his gallantry was particularly noticed. Always set a good example to his comrades by his readiness and cheerfulness under the most trying circumstances during the bad winter of 1854.
46TH REGIMENT.	
216. Colonel Sir Robert Garrett, K.C.B. K.H. (late).	The Siege of Sebastopol; in command of a Brigade in Fourth Division from 8th November 1854 till the end of the service.
217. Brevet Lieut.-Colonel Colin Frederick Campbell.	The Siege of Sebastopol; was wounded in the Trenches.
218. Captain Nicholas Dunscombe (late)	Landed with the Regiment in the Crimea on the 8th November 1854, and served uninterruptedly till the end of the Campaign.
219. Captain George Henry Knapp -	Was present at the Battles of Alma, Inkermann, and Balaklava, and served uninterruptedly till the end of the Campaign.
220. No. 2391. Color Serjeant P. Cullen	Landed with the Regiment in the Crimea on the 8th November 1854, and was particularly noticed for gallantry in the Trenches and attention to his duties during the Campaign.
221. No. 1748. Private P. Flinn -	This man never missed a duty in the Trenches from the 8th November 1854, and was remarkable on all occasions for gallantry and daring.
47TH REGIMENT.	
222. Lieut.-Colonel Richard Thomas Farren, C.B. (late) Depôt Battalion.	Served the Eastern Campaign of 1854-55, including the Battles of Alma and Inkermann, Sortie on 26th October 1854, and the whole of the Siege of Sebastopol.
223. Brevet Lieut.-Colonel James Villiers	Served the Eastern Campaign of 1854 and 1855, including Alma, Inkermann, Sortie 26th October 1854, the whole of the Siege of Sebastopol, and was engaged in the Attack and Capture of the Quarries, 7th June 1855.
224. Brevet Lieut.-Colonel John Henry Lowndes (late).	Served the Eastern Campaign of 1854 and 1855, including Alma, Inkermann, Sortie of 26th October 1854, the whole of the Siege of Sebastopol, and was engaged in the Attack and Capture of the Quarries, 7th June 1855.
225. Captain Hon. Bernard Mathew Ward (late) Depôt Battalion.	Distinguished himself on the morning of the 5th November 1854, in support of the Picquets, Second Brigade, Second Division. The conduct of this Officer was particularly noticed by Lieut.-Colonel Fordyce, C.B., late of the 47th Regiment.
226. Captain Henry James Buchanan, late Depôt Battalion.	Served the Eastern Campaign of 1854 and 1855, Alma, Inkermann, Sortie of 26th October 1854, and Siege of Sebastopol.
227. No. 2633. Serjeant W. Grant -	Distinguished himself on the night of the 7th June 1855 by his cool and gallant conduct in assisting to drive the Enemy from the Quarries and repulsing their Attacks.
228. No. 2469. Private Edward M'Mahon	Distinguished himself on the night of the 7th June 1855 by his cool and gallant conduct in assisting to drive the Enemy from the Quarries and repulsing their Attacks.
48TH REGIMENT.	
229. Captain William Henry Cairnes -	For steadiness and soldier-like conduct whilst in command of a party of his Regiment, sent to relieve and reinforce a party of the 4th Regiment, on the night of the 22d June 1855, in the Trenches before Sebastopol.
230. 1922. Serjeant Richard Batlin -	For volunteering to join the party above referred to, and accompanying his Captain.
49TH REGIMENT.	
231. Lieut.-Colonel John Thornton Grant, C.B.	Served the Eastern Campaign of 1854 and 1855, including Alma, Inkermann, Sortie of 26th October 1854, the whole Siege of Sebastopol, and rendered important service in command of strong working parties of the Second and Light Divisions at the Attack of the Quarries, 7th June 1855.

Rank, Name, and Regiment.	SERVICES.
49TH REGIMENT— <i>continued.</i>	
232. Lieut.-Colonel John Hynde King (late).	Served the Eastern Campaign of 1854 and 1855, including Alma, Inkermann, Sortie on 26th October 1854, the whole Siege of Sebastopol; was engaged in the Attack and Capture of the Quarries, 7th June 1855; was severely wounded at the Attack on the Redan, 8th September (arm amputated).
233. Captain George Kemp Chatfield (late)	Joined the Service Companies in the Crimea on the 14th November 1854, and was present during the whole of the Siege of Sebastopol; also at the Assault and Capture of the Quarries, 7th June 1855. Was mentioned in the Despatch of the late Field Marshal Lord Raglan, G.C.B., 18th June 1855, at the first Attack on the Redan. Was wounded in the Trenches, 7th September 1855.
234. Captain William Young (late)	Joined the Service Companies 14th November 1854, and was present in the Crimea during the whole Siege of Sebastopol; the Attack and Capture of the Quarries, 7th June 1855 (wounded); Attacks on the Redan, 18th June and 8th September 1855.
235. Surgeon John Davies (late)	Landed in the Crimea in medical charge of the 49th Regiment. Was present at the Battles of Alma and Inkermann, and Siege of Sebastopol, with the exception of the last Attack on the Redan. During the period the Army occupied Bulgaria, Surgeon Davies' unceasing solicitude and attention to the sick of the Regiment was attended with the most beneficial results, and during the whole of the Campaign in the Crimea up to the month of July 1855 he was scarcely ever out of his hospital tending the sick and wounded.
236. No. 2771. Serjeant Major R. Holden	Was present at the Battles of Alma and Inkermann, and repulse of Sortie, 26th October 1854. Was with his Regiment during the whole Siege of Sebastopol. A most gallant, intelligent, and active Non-commissioned Officer.
237. No. 2784. Private J. Gibbons	Greatly distinguished himself on the 26th October 1854 in personal encounter with the Russians. Was mentioned in Division Orders on the occasion by Lieutenant General Sir De Lacy Evans, G.C.B. Was present during the whole Campaign, including the Battles of Alma and Inkermann and Siege of Sebastopol.
50TH REGIMENT.	
238. Colonel Richard Waddy, C.B.	Served the Eastern Campaign of 1854 and 1855, including Alma, Inkermann, and the Siege of Sebastopol.
239. Lieut.-Colonel John Lucas Wilton, C.B. (late) now of the Military Train	Served the Eastern Campaign of 1854 and 1855, including Alma, Inkermann, and the Siege of Sebastopol.
240. Brevet Lieut.-Colonel Henry Edwin Weare.	Served the Eastern Campaign of 1854, as Deputy Assistant Adjutant General, and was severely wounded at the Alma; also was present at the latter part of the Siege of Sebastopol.
241. Major Edward George Hibbert	Served the Eastern Campaign of 1854 and 1855, including the Battles of Alma and Inkermann and Siege of Sebastopol.
242. Lieutenant Montague De Salis McKenzie Gordon Augustus Clarke.	This Officer was in command of a Company in the advanced Trench of the Left Attack before Sebastopol in December 1854, when the Russians made a sortie. He was engaged in a personal encounter with a Russian Officer, whom he cut down with his sword, but being wounded in two places he was overpowered and taken prisoner. His sword was found next day in front of the Trench, broken in two and covered with blood.
243. Lieutenant James Lamb	This Officer served throughout the Crimean Campaign, and his conduct was conspicuous on the occasion of a sortie made by the Russians on the advanced Trench of the Left Attack before Sebastopol in December 1854, when a few Companies of the 50th Regiment suffered severely in repelling the Attack.
244. No. 2823. Private A. O'Leary	This man (with another since dead) volunteered to go out to look for the body of the Captain of his Company, who was supposed to have been killed, in December 1854, when the Russians made a strong sortie on the advanced Trench of

Rank, Name, and Regiment.	SERVICES.
50TH REGIMENT—<i>continued.</i> 245 No. 2933. Private Thomas Reghan 55TH REGIMENT. 246. Colonel Charles Warren, C.B. (late) 247. Lieut.-Colonel Alfred Capel Cure (late) now of the Grenadier Guards. 248. Lieutenant William Byrne Johnson 249. Lieutenant James Scott (late) Depot Battalion. 250. No. 2648. Serjeant J. Meara 251. No. 2905. Lance-Serjeant J. O'Donnell. 57TH REGIMENT. 252. Lieut.-Colonel John Alfred Street, C.B. (late) Depot Battalion. 253. Brevet-Major Gerald John Forsyth 254. Lieutenant Alfred Frederick Adolphus Slade.	
	the Left Attack. The Russians were repelled, but (the night being very dark) it was some time before it was ascertained that the works were completely cleared of them. However, this man at once proposed to go out from the second parallel to look for his Captain; he was permitted to do so. His Captain had been taken prisoner. Served throughout the Crimean Campaign, and was remarkable for his coolness under fire when in the Trenches before Sebastopol, whether he was on guard or employed with a working party. Served the Eastern Campaign of 1854, including the Battles of the Alma and Inkermann (where he commanded a Brigade, and was severely wounded), and took part in the Sortie, 26th October 1854; was present during the latter part of the Siege of Sebastopol in 1855. The Siege of Sebastopol in 1855. Commanded the Regiment in the Assaults on 18th June and 8th September 1855. Served from 22d November 1854 to the end of the War, including the Siege of Sebastopol and the Trenches; was severely wounded at the final Assault on the Redan on the 8th September 1855, where he distinguished himself, as on several other occasions, by his forward gallantry. Landed in Turkey with the Regiment in May 1854; served at the Battles of Alma and Inkermann, Siege of Sebastopol, and in the Trenches, including the Repulse of the Sortie on Inkermann Heights, 26th October 1854, and the Attack on the Quarries, 7th June 1855; was wounded, and mentioned in the Despatches for his distinguished gallantry. Landed with the Regiment in Turkey in May 1854; served in the Crimea during the whole Campaign, including the Battles of Alma and Inkermann; took part in the Repulse of the Sortie at Inkermann, 26th October 1854, and served in the Trenches generally; distinguished himself particularly by his gallantry at the Storming of the Redan, 8th September 1855, where he was severely wounded. Landed with the Regiment in Turkey, May 1854; was present at the Battle of Alma (severely wounded), served in the Trenches, and distinguished himself at the Storming of the Redan, 8th September 1855, when he was again severely wounded. Served the Eastern Campaign of 1854 and 1855, including the Battles of Alma and Inkermann, the whole of the Siege of Sebastopol, and Expedition to Kinburn. This Officer's conduct on every occasion when under fire, from the 23d September 1854 to the end of the Siege on the 8th September 1855, was most conspicuous for gallantry and coolness. On the 18th June, when one of the assaulting party, he remained with three or four men of his company close under the abattis of the Redan, awaiting reinforcements. These men kept up a constant fire at the embrasures, and Major Forsyth himself remained with them until the whole of their ammunition was exhausted, when, finding no support come to their aid, he retired to the Trenches. This Officer volunteered to join the service Companies in the field on the 15th November 1854, and obtained permission to do so without joining the depot. His conduct was marked by conspicuous bravery during his service in the Trenches from the above date to the 18th June 1855, when he was severely wounded in front of the Redan. Although suffering from a severe wound in the shoulder, and directed to go back to the Trenches, he continued to encourage the men to advance under a very heavy fire from the Russian

Rank, Name, and Regiment.	SERVICES.
57TH REGIMENT—continued.	
	batteries, until he was struck again, and the attack having failed he retired with the remainder of the regiment. He was sent to Scutari in consequence of his wounds, but on recovery he again obtained permission to return to the Crimea instead of joining at Malta.
255. No. 983. Drummer M. Norton -	Landed with the Regiment at Katscka River, 23d September 1854, and was present at Inkermann, Balaclava, and during the Siege of Sebastopol; at the Assaults on the 18th June and 8th September 1855. The conduct of this Drummer was noticed by Lieut.-Colonel Warre on several occasions, and he is deserving of the honour for which he is recommended.
256. No. 2501. Private J. Healy -	This Soldier was recommended for the medal and gratuity for his very distinguished conduct throughout the whole period of his service in the Crimea, viz., from the 23d September 1854 to June 1856, and more particularly at the Assault of the Redan on 18th June 1855, when he remained in advance of the Trenches, with Major Forsyth and two or three other men, until the whole of his ammunition was expended. He did not receive the medal on that occasion, because the whole amount of gratuities allowed the Regiment were expended. His conduct on every occasion fully entitles him to this honour.
62ND REGIMENT.	
257. Colonel Charles Trollope, C.B. (late) -	Served the Siege of Sebastopol from 13th November 1854; was in command of a Brigade in the Second Division up to July, and afterwards as a Brigadier-General; also in command of one in the Third Division.
258. Lieut.-Colonel William Lennox Ingall C.B.	Served in the Siege of Sebastopol from 13th November 1854, and was severely wounded at the Storming of the Quarries on 7th June 1855.
259. Brevet Major Charles Cooch (late) -	For long service in the Trenches before Sebastopol. Was mentioned in the Despatches of General Sir James Simpson, G.C.B.
260. Captain George Hampden Wilkieson	For long service in the Trenches before Sebastopol.
261. No. 3302. Serjeant J. Warren -	For capturing a French soldier who was deserting to the Enemy from the advanced trenches on the 22d February 1855, he being at the time exposed to a heavy fire from the Enemy's advanced posts, and for which service he received the thanks of the Commander-in-Chief in the Crimea.
262. No. 2801. Private J. Farrell -	For capturing a French soldier who was deserting to the Enemy from the advanced Trenches on the 22d February 1855, he being at the time exposed to a heavy fire from the Enemy's advanced posts, and for which service he received the thanks of the Commander-in-Chief in the Crimea.
63RD REGIMENT.	
263. Lieut.-Colonel Hon. Robert Alexander George Dalzell, C.B. (late) Provisional Depôt Battalion.	Served Eastern Campaign of 1854, including the Battles of Alma and Inkermann, and the first part of the Siege of Sebastopol in 1855.
264. Lieut.-Colonel Charles Edward Fairtlough (late) Depôt Battalion.	Served Eastern Campaign of 1854; Alma and Inkermann; at the latter he was severely wounded.
265. Captain F. T. Logan Paterson -	Served Eastern Campaign of 1854 and 1855, including Battles of Alma, Balaklava, and Inkermann; Siege of Sebastopol; also in Expeditions to Kertch and Kinburn.
266. No. 3404. Private P. Ceaton -	Served the Eastern Campaign of 1854 and 1855, including the Battles of Alma, Balaklava, and Inkermann; Expedition to Kertch; Assault and Fall of Sebastopol; Capture of Kinburn. At the Battle of Inkermann, Private Ceaton attacked and stabbed two Russians. Was himself wounded, but refused to leave the field.

Rank, Name, and Regiment.	SERVICES.
68TH REGIMENT.	
267. Colonel Henry Smyth, C. B.	Served Eastern Campaign of 1854 and 1855, including the Battles of Alma and Inkermann, and the whole Siege of Sebastopol.
268. Lieut.-Colonel George Macbeath, C.B. (late) now retired from the service.	Served Eastern Campaign of 1854 and 1855, including the Battles of Alma and Inkermann, and Siege of Sebastopol.
269. Lieutenant Sheffield Grace	Under the command of a Captain in the 63d Regiment, Lieutenant Grace took post at the chevaux-de-frize, in front of the position in the Woronzoff-road, with only one man to support him, the remainder (of a party of 12) having fallen back in consequence of the heavy fire.
270. Lieutenant Francis De Luttrell Saunderson.	On the 11th May 1855 Lieutenant Saunderson was actively engaged in repelling a Sortie. The night was wet and stormy, and some of the Rifles were difficult to load, and this Officer particularly distinguished himself by assisting the men in loading.
271. No. 2697. Private Samuel Burrows	For having on the morning of the 22d November 1854, in broad daylight, under a heavy fire from the Enemy, proceeded from the Rifle Pits, in company with another man, to bring in a wounded Officer of the Rifle Brigade. This occurred in the Left Attack of the Siege of Sebastopol.
272. No. 1624. Private J. Magner	When on duty in the Trenches before Sebastopol on the 11th May 1855, during a Sortie, when volunteers were called for by Captain Hamilton to charge the Enemy, Private Magner was one of the first to leap on the parapet, and say, "Here is one, Sir." He afterwards volunteered to go out on patrol to see that the Enemy had all retired. On another occasion, when on duty in the fourth parallel, he was wounded in the hip, and though told by an Officer and Surgeon to go home, he refused, saying, "The Russians are coming out, and I would sooner stay with my Company."
71ST REGIMENT.	
273. Captain Frederick J. Colin Halkett	Rendered general good service in the trenches before Sebastopol, and at Kertch.
274. Captain John Otway Wemyss (late)	Rendered general good service in the trenches before Sebastopol, and at Kertch.
275. No. 3379. Private H. Gourley	Rendered general good service (slightly wounded).
276. No. 2399. Private J. Cathcart	Rendered general good service (slightly wounded).
77TH REGIMENT.	
277. Brevet Lieut.-Colonel George Harry Smith Willis (late).	Served Eastern Campaign of 1854 and 1855, including the Battles of Alma and Inkermann, and Siege of Sebastopol.
278. Captain Richard Butler Willington	Served Eastern Campaign of 1854 and 1855, including the Battles of Alma and Inkermann, and Siege of Sebastopol.
279. Assistant Surgeon Robert Graves Burton (late).	For distinguished courage in the Trenches during the whole Siege of Sebastopol, where he was exposed, under fire, and in presence of the Enemy, to as much danger as an executive officer, and where his humanity to the wounded was valuable and constant.
280. Assistant Surgeon Alexander Humfrey.	For distinguished courage in the Trenches during the whole Siege of Sebastopol, where he was exposed under fire, and in presence of the Enemy, to as much danger as an executive officer, and where his humanity to the wounded was valuable and constant.
281. No. 1685. Serjeant R. Bushell	For conspicuous courage under fire in presence of the Enemy, in every action, sortie, or attack during the whole War.
282. No. 2717. Lance Corporal G. Brown	For conspicuous courage under fire in presence of the Enemy, in every action, sortie, or attack during the whole War.
79TH REGIMENT.	
283. Lieutenant-Colonel John Douglas, C.B.	Served Eastern Campaign of 1854 and 1855, including the Battles of Alma and Balaclava, Siege of Sebastopol, and Expedition to Kertch.
284. Lieutenant-Colonel Richard Chamber Hays Taylor, C.B. (late) Depôt Battalion.	Served Eastern Campaign of 1854 and 1855, including the Battles of Alma and Balaclava, and Siege of Sebastopol.

Rank, Name, and Regiment.	SERVICES.
79TH REGIMENT—continued.	
285. Brevet-Lieut.-Colonel Robert Douglas Clephane.	Served Eastern campaign of 1854 and 1855, including Alma, Balaclava, Siege of Sebastopol, and Expedition to Kertch.
286. Captain Henry Holford Stevenson -	Was employed on important duty in the advanced trenches the night preceding the fall of Sebastopol, while on the staff of Lieutenant-General Sir Colin Campbell, G.C.B. Captain Stevenson was also present at the Battles of Alma and Balaclava.
287. Quartermaster R. Jameson (late) -	Was present at the Battle of Alma; acted as a volunteer subaltern at the Battle of Balaclava; rendered constant good and gallant service under fire in the Trenches before Sebastopol.
288. No. 1258. Serjeant J. Anderson -	Was present at the Battles of Alma and Balaclava, and rendered constant good and gallant service in the Trenches before Sebastopol.
289. Fo. 1185. Private W. Campbell -	Was present at the Battles of Alma and Balaclava, and rendered constant good and gallant service in the Trenches before Sebastopol.
88TH REGIMENT.	
290. Colonel Horatio Shirley, C.B. (late)	Served Eastern Campaign of 1854 and 1855; the Battles of Alma and Inkermann; Siege of Sebastopol; was General Officer in the Trenches at the Attack of the Quarries on 7th June 1855, and at the Attack on the Redan, 18th June; commanded a Brigade at the Assault on 8th September.
291. Lieutenant-Colonel George Vaughan Maxwell, C.B.	Served Eastern Campaign of 1854 and 1855, the Battles of Alma and Inkermann, and Siege of Sebastopol; the attack on the quarries on 7th June. Lieut.-Colonel Maxwell also commanded the 88th Regiment at the Assaults on the Redan on 18th June and 8th September 1855; at the last he was severely wounded.
292. Lieut.-Colonel Edward John Vesey Brown (late) Dépôt Battalion.	Served Eastern Campaign of 1854 and 1855; Alma, Inkermann, and Siege of Sebastopol.
293. Brevet-Major Edmund Gilling Maynard.	For leading the men under his orders into the Russian works called the Quarries in a most gallant manner on the night of the 7th June 1855.
294. Brevet-Major Thomas Gore -	Served Eastern Campaign of 1854 and 1855; was at Alma, Inkermann, and Siege of Sebastopol.
295. Captain John Edward Riley -	For gallant conduct at Inkermann. He was most active in rallying his men when retreating, also was most active during the action as Adjutant. He also behaved himself exceedingly well on Picquet in the Middle Ravine in the beginning of October 1854, when the Enemy advanced upon him on a certain occasion.
296. Lieutenant George Priestley -	Was very conspicuous in the Attack on the Redan, leading the Grenadier Company in a dashing manner.
297. No. 3129. Private J. Sullivan -	Displayed general activity and gallantry during the night of 7th June 1855, in the Attack on the Quarries.
298. No. 911. Private W. Durwoode -	This man, with only one other, answered to the call of Lieutenant-Colonel Maxwell, to rally round a gun when the Regiment was repulsed at the beginning of the Battle of Inkermann. He served throughout the whole campaign, and was always conspicuous for his soldierlike conduct. He was at last wounded in the Attack on the Redan.
89TH REGIMENT.	
299. Lieut.-Colonel Caledon Richard Egerton (late) Dépôt Battalion.	Served the Siege of Sebastopol from the 17th December 1854 till the end of the service.
300. Major Robert B. Hawley (late) Dépôt Battalion.	Served the Siege of Sebastopol from 31st January 1855 till the end of the service.
301. Major Leslie Skynner -	Landed in the Crimea 15th December 1854, and performed good service in the Trenches during the whole Campaign.
302. No. 3914. Corporal P. Scott -	Landed with the Regiment in the Crimea on the 15th December 1854. Never missed a tour of duty in the Trenches until after the 5th September 1855, when he was wounded severely by a piece of a shell in the right knee.

Rank, Name, and Regiment.	SERVICES.
90TH REGIMENT.	
303. Brevet Lieut.-Colonel Thomas Smith	Served the Siege of Sebastopol from 5th December 1854 till the end of the service.
304. Brevet Major James Perrin -	Rendered uninterrupted service with his Regiment from its arrival in the Crimea until its embarkation for England in June 1856. Never missed a tour of duty in the Trenches. In reserve during Attack on Quarries 7th June 1855. Assault of Redan, 8th September.
305. Captain James Herne Wade -	Landed in Crimea with Regiment. Was always present, except during a short period when laid up with fever at Scutari. Was at the Assault of the Redan 8th September 1855, where he was severely wounded.
306. Serjeant Major A. Kirkland -	Displayed gallant conduct at the Assault of the Redan on 8th September 1855, he being one of the first soldiers who entered that battery. Went to the assistance of Serjeant-Major Moynihan (now Ensign) and Major Rowlands, 41st Regiment, when attacked by five or six of the Enemy, and shot three Russians dead as fast as he could load and fire. Also went to the assistance of the late Lieutenant Swift, 90th Regiment. Was wounded in the Redan and left behind there after the troops had retired, but subsequently fought his way out. His conduct before the Enemy was always gallant.
307. No. 2922. Private W. Smith -	Accompanied his Regiment to the Crimea, and served uninterruptedly until the Fall of Sebastopol. Never missed a tour of duty in the Trenches. Was present at the Capture of the Rifle Pits on 19th April 1855, and at the Attack on the Redan, 8th September 1855, where he was wounded. His conduct before the Enemy was always gallant.
93RD REGIMENT.	
308. Lieut.-Colonel William Bernard Ainslie, C.B. (late), unattached.	Served the Eastern Campaign of 1854 and part of 1855; Alma, Balaclava, and latter part of Siege of Sebastopol.
309. Brevet-Lieut.-Colonel John Alexander Ewart.	Served Eastern Campaign of 1854 and 1855; Alma, Balaclava, and entire Siege of Sebastopol, except while employed with the Expedition to Kertch.
310. Captain James Dalzell -	Served without interruption throughout the Campaign, and showed on all occasions conspicuous zeal and gallantry.
311. Lieutenant Richard Augustus Cooper	Served without interruption throughout the Campaign, and showed on all occasions conspicuous zeal and gallantry.
312. No. 1018. Colour Serjeant C. Allan	Served without interruption throughout the Campaign, and showed on all occasions conspicuous zeal and gallantry.
313. No. 1949. Lance Corporal J. Robertson.	Served throughout the whole Campaign, and was conspicuous as a volunteer upon two occasions, once in repairing damages in an advanced trench under a heavy fire, and once in accompanying his Captain by night to reconnoitre a trench near the Redan believed to be occupied by the Enemy.
95th REGIMENT.	
314. Lieut.-Colonel Alfred Thomas Heyland, C.B. (late), Depôt Battalion.	Served in the Eastern Campaign of 1854 and 1855; the Alma, where he was severely wounded, and arm amputated; Siege of Sebastopol.
315. Brevet Major Julius Augustus Robert Ruines.	Served with zeal and distinction from the opening of the Crimean Campaign. Was engaged at the Battle of the Alma; was present at the repulse of a Sortie on the 26th October 1854, and Battle of Inkermann, as an Assistant Engineer, and in the Trenches; also at the Battle of the Tchernaya.
316. Brevet Major Alexander James John Macdonald.	Ordered Private James Murphy, who had volunteered to protect him, when wounded, to retire and leave him, when overpowered by numbers of the Enemy, by whom he was afterwards wounded in eighteen different parts of the body, on the 5th of November 1854.
317. Captain Basil Charles Boothby (late)	Served the Campaign of 1854. Severely wounded at the Battle of the Alma (Foot amputated).

Rank, Name, and Regiment.	SERVICES.
95TH REGIMENT—continued.	
318. No. 2,892. Colour Serjeant F. Anney	Discovered and dug-out of the ground a number of fougasses laid by the Enemy, and by the explosion of some of which several men were wounded on the 9th day of June 1855.
319. No. 1,062. Private James Keenan -	Seized the Queen's colour, and planted it in a Russian Battery, the Officer who had previously carried it having been wounded, on the 20th day of September 1854.
97th REGIMENT.	
320. Major Fowler Burton -	Served in the Siege of Sebastopol, from 20th November 1854. For having highly distinguished himself (when Lieutenant in the 97th Regiment) on the night of 30th August 1855, having been ordered out with a party under Captain Brinkley to retake a sap and bring in the wounded who were lying under the Enemy's Rifle Pits, which duty he was performing in a gallant manner, when he received a severe wound which obliged him to retire. This Officer did duty in the Trenches from 28th November 1854 to 30th August 1855, under trying circumstances, in a most unflinching manner.
321. Captain George Henry Hibbert Ware (late), now of the 51st Regiment.	
322. Lieutenant Charles Henry Browne -	Distinguished himself at the Assault on the Redan, 8th September 1855, having entered that work, where he was wounded (slightly). He did duty in the Trenches from the 4th May 1855 to the end of the Siege, and was remarkable for the soldierlike manner in which he always did his duty, although a young Officer, with but little experience.
323. No. 1502. Serjeant M. Kemmy -	For having highly distinguished himself on the 8th September 1855 at the Assault on the Redan, having been severely wounded inside that work; and was mentioned in General Sir James Simpson's Dispatch for his general gallantry on that occasion. He likewise did duty in the Trenches from November 1854 to the end of the Siege, and was distinguished on several other occasions.
324. No. 1,369. Serjeant W. Moore -	For having highly distinguished himself at the Assault on the Redan, having been severely wounded, and taken prisoner inside that work. He likewise did duty in the Trenches from November 1854 to the end of the Siege, and was remarkable for the unflinching manner in which he did his duty under very trying circumstances.
1st BATTALION RIFLE BRIGADE.	
325. Colonel William Sherbrook Ramsay Norcott, C.B. (late), Dépôt Battalion.	Served in the Eastern Campaign of 1854 and 1855, including the Alma, and the entire Siege of Sebastopol.
326. Lieut.-Colonel Alfred Hastings Horsford, C.B. (now 3rd Battalion).	Served in the Eastern Campaign of 1854, including Alma and Inkermann, and first part of the Siege of Sebastopol.
327. Lieut.-Colonel Alexander Macdonell, C.B. (now 2nd Battalion).	Served in the Eastern Campaign of 1854 and 1855, the Battles of Alma and Inkermann, and Siege of Sebastopol.
328. Brevet Lieut.-Colonel Charles John Woodford (now 2nd Battalion).	Served in the Eastern Campaign of 1854 and 1855, the Battles of Alma and Inkermann, and Siege of Sebastopol.
329. Brevet Lieut.-Colonel Lord Alexander George Russell.	Served in the Siege of Sebastopol in 1855.
330. Brevet Major Hon. James Stuart -	This Officer was present with the Army during the whole War, having embarked with the Second Battalion for Varna, and was afterwards promoted into the First Battalion. He was present at Alma as Aide-de-Camp to Colonel Norcott, in command of the left wing of the Second Battalion. Served during the Siege in the First Battalion, and commanded the Storming Party on the 18th of June, for which he received his Brevet rank. Medal and two clasps.
331. Lieutenant George Robert Saunders	This Officer joined the Battalion in December 1854 before Sebastopol, performed his duties without interruption to the end of the War, and was present under Major Stuart with the covering party on the 18th of June 1855. Medal and one clasp.

Rank, Name, and Regiment.	SERVICES.
1ST BATTALION RIFLE BRIGADE— <i>cont.</i>	
332. No. 2862. Corporal J. Rudling -	This Soldier was present at Alma, Inkermann, Balaclava, Sortie on the Woronzoff-road, the storming party on the 18th of June, and when the advanced party in the Graveyard was attacked; also accompanied Major-General Windham on a reconnoitring party at the commencement of the Siege. Was present at the front with the Battalion from the landing in the Crimea until the retirement of the Army. Medal and four clasps.
333. No. 3535. Corporal J. Tarrant -	This Soldier volunteered on the 17th of October to lie out in front of the works to keep down the enemy's fire. He was present at Sorties on the 13th August 1855, and served through the whole of the Campaign without leaving the front. Medal and four clasps.
2ND BATTALION RIFLE BRIGADE.	
334. Lieutenant FitzRoy William Fremantle.	Lieutenant Fremantle joined in the Crimea on the 1st December 1854, and did duty in the Trenches from that date until the 18th June 1855. Was present at the last Sortie made on the Quarries on the 8th June. Commanded the woosack party of the right column of assault on the 18th June 1855, on which occasion he was severely wounded, from the effects of which he still suffers.
335. Lieutenant John Croft Moore -	Lieutenant Moore joined in the Crimea on the 10th June 1855, and served in the Trenches until the Fall of Sebastopol. On the attack of the 8th September he commanded an advanced party of about thirty men, which was pushed forward for the purpose of keeping down the fire of some embrasures on the proper right of the Redan, which enfiladed the Attack. He was mentioned in Sir James Simpson's Despatch.
336. No. 2,426. Serjeant J. Cherry -	Two men employed as Sharpshooters having ventured down to the gardens near the Woronzoff-road in July 1855, one of them was wounded and disabled. Serjeant Cherry went to his assistance under a heavy fire, and returned to report that it was impossible to remove him during daylight. When it was sufficiently dark he headed a party, and brought in the wounded man. Volunteered for secret service on the 6th September 1855, and was employed in covering a working party throwing up the new sap. Was wounded in four places. Served during the whole Campaign.
337. No. 3,727 Private E. Tarvish -	Served with great gallantry during the whole Campaign in the Crimea, especially in the Assault of the 8th September 1855, on which occasion he entered the Redan and was taken prisoner.
ROYAL ARTILLERY.	
338. Major Francis Beckford Ward -	Served at Siege and Fall of Sebastopol. Commanded Royal Artillery at Battle of the Tebernaya.
339. Brevet Lieut.-Colonel John Charles William Fortescue.	Served at the Battles of Alma, Balaclava, and Inkermann, and was present during the whole of the Siege of Sebastopol.
340. Brevet Lieut.-Colonel Charles Henry Morris, C.B.	Joined the Army in October 1854, and remained with it until the termination of the War. Was present at Inkermann and the Sortie of the 20th of October, and in the Trenches with Marshal Bosquet at the Assault of the Mamelon and Malakhoff.
341. Brevet Lieut.-Colonel Samuel Endersby Gordon.	Served at the Battles of Alma, Balaclava, and Inkermann, and was present during the whole of the Siege of Sebastopol.
342. Brevet Lieut.-Colonel Hon. Edward Thomas Gage.	Served at the Battles of Alma, Balaclava, and Inkermann, and was present during the whole of the Siege of Sebastopol.
343. Brevet Lieut.-Colonel Charles Stuart Henry.	The Siege of Sebastopol; was severely wounded (with Siege Train).
344. Brevet Lieut.-Colonel Henry John Thomas.	The Siege of Sebastopol.
345. Brevet Major Philip Gosset Pipon -	The Campaign of 1854-55; Battles of Alma and Balaclava; Siege of Sebastopol.

Rank, Name, and Regiment.	SERVICES.
ROYAL ARTILLERY— <i>continued.</i>	
346. Brevet Major Gaspard Le Marchant Tupper.	The Campaign of 1854–55; Balaklava and Inkermann, where he was wounded; Sortie on 26th October 1854, and Siege of Sebastopol.
347. Brevet Major Charles Henry Ingilby	The Campaign of 1854–55; Balaklava and Inkermann, where he was wounded; Sortie on 26th October 1854, and Siege of Sebastopol.
348. Brevet Major Henry Peel Yates -	The Campaign of 1854–55; Battles of Alma and Inkermann; Sortie on 26th October 1854, and Siege of Sebastopol.
349. Brevet Major James Farrell Penny-cuick.	The Campaign of 1854–55; Battle of Inkermann, and Siege of Sebastopol.
350. Brevet Major Alexander Cæsar Hawkins.	Served in the Trenches from March 1855 to the Fall of Sebastopol.
351. Brevet Major George Shaw -	Served in the Trenches from January 1855 to the Fall of Sebastopol.
352. Brevet Major Edward Moubray, h. p.	Eastern Campaign of 1854–55; Battle of Inkermann; Siege of Sebastopol. Commanded a Battery at the Tchernaya.
353. Brevet Major William Wigram Barry	Eastern Campaign of 1854–55; Battles of Alma, Balaklava, and Inkermann, and Siege of Sebastopol.
354. Brevet Major John Edward Michell	Eastern Campaign of 1854–55; Alma, Balaklava, and Siege of Sebastopol.
355. Brevet Major George Cecil Henry -	Eastern Campaign of 1854–55; Inkermann, and Siege of Sebastopol.
356. Brevet Major James Sinclair -	Eastern Campaign of 1854–55; Inkermann, and Siege of Sebastopol. Was very severely wounded during the Siege.
357. Brevet Major Lewis William Penn -	Eastern Campaign of 1854–55; Inkermann, and Siege of Sebastopol (with Siege Train)
358. Brevet Major Edward Taddy -	Eastern Campaign of 1854–55; Alma, Balaklava, and Inkermann; Siege of Sebastopol.
359. Brevet Major Paget Walter L'Estrange.	Eastern Campaign of 1854–55; the Siege of Sebastopol (with Siege Train).
360. Brevet Major Reginald Henry Champion.	The Campaign of 1854–55; Battle of Inkermann; Siege of Sebastopol (with Siege Train).
361. Brevet Major William Gilly Andrews	The Campaign of 1854–55; Inkermann; Siege of Sebastopol.
362. Brevet Major William George Le Mesurier.	Alma; Balaklava; Siege of Sebastopol.
363. Lieut. Benjamin Geale Humfrey -	Served in the Trenches from March 1855 to the Fall of Sebastopol.
364. Lieut. Sir John William Campbell, Bart.	Served in the Trenches from March 1855 to the Fall of Sebastopol.
365. Lieut. Edward John Ward - -	Served in the Trenches from May 1855 to the Fall of Sebastopol.
366. Lieut. Frederick Augustus Anley -	Served in the Trenches from March 1855 to the Fall of Sebastopol.
367. Lieut. Charles Orde Browne -	Served in the Trenches from April 1855 to the Fall of Sebastopol.
368. Lieut. Henry Barlow Maule -	Served in the Trenches from May 1855 to the Fall of Sebastopol.
369. Lieut. Charles Fyshe Roberts -	Served in the Trenches from March 1855 to the Fall of Sebastopol.
370. Staff Surgeon William Perry -	Served at the Battle of Alma; the Repulse of the Sortie on 26th of October 1854; and the Battle of Inkermann. Was also present throughout the whole of the Siege of Sebastopol.
371. Assistant Surgeon Essex Bowen -	Served at the Battle of Inkermann; was also present throughout the whole of the Siege of Sebastopol; served in the Trenches from October 1854 (the First Bombardment) to May 1855.
372. A. Troop.—Troop Serjeant Major J. Beardsley.	Was present during the whole of the Campaign, and served at the Battles of Alma and Balaklava with great zeal and gallantry.
373. 8th Comp. 11th Batt. — Company Serjeant Major J. Hamilton.	Recommended for his bravery and distinguished conduct in the Trenches; was also remarkable for the example of coolness and intrepidity he offered to others. Is in possession of the medal for distinguished conduct in the field.
374. 1st Comp. 5th Batt.—Serjeant John Hamilton.	Served in the Trenches without intermission from December 1854 to the Fall of Sebastopol, with great zeal and distinction.

Rank, Name, and Regiment.	SERVICES.
ROYAL ARTILLERY— <i>continued.</i>	
375. 7th Comp. 11th Batt. — Serjeant Samuel Ewing.	Served in First, Second, Third, and Fourth Bombardments against Sebastopol. Was reported to the Commanding Officer of the Siege Train for great bravery and energy when in command of a gun in the Bombardment between 6th and 10th of June 1855, exposing himself freely in the embrasures, and encouraging the men, and setting a gallant example. Was a volunteer for the spiking party which left the Trenches to assail the Redan on the 18th June 1855, on which occasion he lost his leg. He repeatedly attracted the notice of his Officers.
376. 5th Comp. 11th Batt. — Serjeant Daniel Dowling (late), now Lieutenant, Military Train.	Served throughout the whole of the Crimean Campaign. Was present at the Battles of Alma, Balacava, and Inkermann, and Sortie of 26th October 1854. Served as a volunteer in the Second and Third Bombardments against Sebastopol. Was wounded on the 7th June 1855. Was noticed for his gallant conduct on two occasions.
377. 6th Comp. 11th Batt. — Serjeant George Symons (late).	Served with great gallantry with the eighteen-pounders at the Battle of Inkermann, and distinguished himself repeatedly in the Trenches during the Siege by his great zeal, gallantry, and good conduct. Was severely wounded in June 1855.
378. 6th Comp. 2d Batt.—Serjeant Moses Hunter.	Served in the Trenches throughout the whole of the Siege of Sebastopol. Was distinguished for his good conduct and bravery in the Trenches.
379. 8th Comp. 11th Batt.—Bombardier Daniel Cambridge.	Served in the Trenches throughout the whole of the Siege of Sebastopol. Formed one of the spiking party on 8th September 1855, on which occasion he was severely wounded. Was noticed for his cool and intrepid conduct when under fire. This non-commissioned officer has received the Victoria Cross.
380. 1st Comp. 12th Batt.—Bombardier W. Ramsey.	Served with zeal and distinction in the Trenches throughout the whole Siege of Sebastopol; particularly distinguished himself in the June Bombardment in the advanced batteries of the Left Attack, where he took charge of the gun on which the heaviest fire was directed, and performed the duties required of him in a most gallant and able manner.
381. 4th Comp. 12th Batt.—Acting Bombardier H. Collier.	Was present at the Battles of Alma, Balacava, and Inkermann. Was present during the whole of the Siege of Sebastopol, and as driver was constantly engaged in taking ammunition to the Trenches. He also accompanied the expedition to Kinburn.
382. 5th Comp. 9th Batt.—Gunner and Driver Edward O'Brien.	Served in the Trenches in five Bombardments against Sebastopol, as also with the spiking party (as volunteer) upon two different occasions; viz., 18th of June and 8th September 1855.
383. 1st Comp. 11th Batt.—Gunner and Driver Jacob McGarry.	Served at the Battle of Alma, and was detached with the Turks in one of the advanced redoubts in front of Balacava on 25th October 1854. On the Turks retiring from the redoubts on the advance of the Russians, he remained to spike the guns in his charge, for which conduct he received the approval of Her Majesty, conveyed through the Secretary of State for War.
384. 1st Comp. 5th Batt. — Gunner and Driver Thomas Arthur.	Was present at five Bombardments against Sebastopol, and formed one of the spiking party of Artillery on the 18th June 1855 as a volunteer, on which occasion he was severely wounded.
385. 7th Comp. 11th Batt.—Gunner and Driver John Death.	Served in the Trenches throughout the whole of the Siege of Sebastopol, and was present with one of the two eighteen-pounders at the Battle of Inkermann. Was distinguished for his steadiness and gallantry on all occasions.
386. 1st Comp. 11th Batt.—Gunner and Driver John Barrett.	Served at the Battle of Alma, and was detached with the Turks in one of the advanced redoubts in front of Balacava on the 25th October 1854. On the Turks retiring from the redoubts on the advance of the Russians, he remained to spike the guns in his charge, for which conduct he received the approval of Her Majesty, conveyed through the Secretary of State for War.

Rank, Name, and Regiment.	SERVICES.
ROYAL ENGINEERS.	
387. Colonel John William Gordon, C.B.	The Eastern Campaign of 1854-55, the Battle of the Alma, and the Siege of Sebastopol. Was second in command of the Royal Engineers. Was severely wounded on the night of the 22d March 1855.
388. Colonel Frederick Edward Chapman, C.B.	The Eastern Campaign of 1854 and 1855, Battles of the Alma and Inkermann, and the whole Siege of Sebastopol.
389. Lieut.-Colonel Edward Stanton, C.B.	The Eastern Campaign of 1854-55, Battles of the Alma and Inkermann, and the whole Siege of Sebastopol.

BREAKWATERS, &c.

RETURN to an ORDER of the Honourable The House of Commons,
dated 7 July 1857;—for,

A STATEMENT “of the Names of Places on the Coast of *Great Britain* and *Ireland* which have been Surveyed or Reported on by Order of the Admiralty, with a view to the Formation of BREAKWATERS, PIERS, or HARBOURS of REFUGE, the Works of which have not been commenced, and where the Recommendations have not been adopted :”

“And of the Nature of the Works Recommended, the Period required for Completion, the Estimate of Total Cost, and the Outlay Recommended per Annum.”

Admiralty, }
24th July 1857.}

ROBT. S. EVANS,
pro Chief Clerk.

ENGLAND.

HARTLEPOOL.—Report and design by the late Mr. Rendel, C.E., on the 16th March 1855. Two Piers recommended, one on the north, and the other on the south side of the bay, to enclose an area of 470 acres, having a depth of 12 feet and upwards, and 325 acres having a depth of 18 feet and upwards, at time of low water of spring tides. Period required for completion, six years. Estimate of total cost 800,000*l.*

Also reported on by Mr. E. K. Calver, R.N., on the 31st March 1855.

TEESMOUTH.—Report and design by the late Mr. Rendel, C.E., on the 4th April 1855. Two Piers recommended, one on the north, and another on the south side of the mouth of the River Tees. Estimate of total cost 275,000*l.*

Also reported on by Mr. E. K. Calver, R.N., on 31 May 1855.

REDCAR.—Report and design by Mr. W. A. Brooks, C.E., in the year 1832, and again in 1851, consisting of two piers and other works. The piers to enclose an area of about 195 acres, with a depth of 12 feet and upwards, and about 130 acres, with a depth of 18 feet and upwards, at low water of spring tides. Estimate of total cost 340,000 *l.*

The above design was reported on to the Admiralty by Mr. David Stevenson, C.E., on 15 February 1851, and the site was surveyed by Mr. E. K. Calver, R.N., and plan sent to the Admiralty in April 1851.

Further reports by Mr. W. A. Brooks, C.E., dated 21 October, 26 December 1856, and 20 February 1857, with extended designs shown by plans.

The original plan of 1832 was reported on by Sir William Cubitt, C.E., in 1835.

BRIDLINGTON.—A detached rubble stone Breakwater proposed on the seaward side of the bay, to be placed on the Smithwick Sand; probable length, 5,000 feet; approximate estimate, 350,000*l.*; to be completed in 10 years.

ENGLAND—*continued*.

ALDBOROUGH.—Designed by Mr. Peter Bruff, c.e., in 1851. Promoted by private individuals, who came to Parliament for a Private Bill, and the Admiralty, under the powers given them by the Preliminary Inquiries Act, directed Mr. Nathaniel Beardmore, c.e., to report on the Bill, which he did, on 9 March 1852. Works proposed consisted of new entrance to the River Alde, with entrance piers: period required for completion 10 years. Estimate of total cost 60,000 *l*.

NEWHAVEN.—Design for works by Mr. James Walker, c.e., viz. an addition of 1,000 feet to the West Pier, leaving a portion of it open; to move the East Pier 60 feet to the eastward, and to lengthen it 100 feet; to excavate the Harbour and Approaches to a depth of 7 feet, a width of 250 feet, and a length of 2,000 feet. Estimate 150,000 *l*.

ST. IVES.—Report and design by Captain Vetch, on 31 July 1847. A Breakwater recommended, on the north side, to shelter an area of 80 acres, having 12 feet, and 56 acres, having 18 feet and upwards, at time of low water. Period required for completion, seven years. Estimate of total cost 174,400 *l*. Outlay recommended per annum, 25,000 *l*.

NEW QUAY, BRISTOL CHANNEL.—Report and design by the late Mr. William Bald, c. e., in November 1848. A Breakwater recommended on the north side of bay, to give shelter to an area of about 515 acres, having a depth of 12 feet, and 425 acres having a depth of 18 feet and upwards, at time of low water of ordinary spring tides. Estimate of total cost 711,744 *l*.

SCOTLAND.

WICK.—Report and design by Captain Vetch, r. e., on the 10th February 1857. Two Breakwaters recommended, one from the north shore of Wick Bay, and the other from the south shore, sheltering an area of 60 acres, having a depth of 12 feet and upwards, and of 42 acres with a depth of 18 feet and upwards, at time of low water of spring tides. Period required for completion seven years. Estimate of total cost, by Mr. John Coode, c. e., 175,175 *l*.

PETERHEAD.—Report and design by Mr. David Stevenson, c. e., on 25 January 1847. Formation of a Harbour proposed in the South Bay, having an area of six acres with a depth of 12 feet and upwards at low water of spring tides. Estimate of total cost 227,905 *l*.

ELIE, FIRTH OF FORTH.—The design consists in two Breakwaters, one from the east, the other from the west side of the bay; sheltering an area of 60 acres, of 12 feet depth and upwards, and of 20 acres of 18 feet and upwards, at low water of spring tides. Approximate estimate 200,000 *l*.

DUNBAR.—The design by Captain Vetch, r. e., consists of a Breakwater connecting the outlying rocks, and sheltering an area of 70 acres of 12 feet depth and upwards, and of 60 acres of 18 feet and upwards, at low water of spring tides. Approximate estimate 150,000 *l*.

IRELAND.

ARDGLASS.—Report and design by the late Mr. Rendel, c. e., on the 17th May 1852. Two Breakwaters recommended, one on the east and the other on the west side of the entrance of the harbour, to shelter an area of 40 acres, having a depth of 12 feet, and 35 acres having a depth of 18 feet and

IRELAND—*continued.*

and upwards, at time of low water of spring tides. Period required for the completion of the work, five years. Estimated total cost 240,000 *l.* Outlay recommended per annum, 48,000 *l.*

Also reported on by Captain Denham on the 1st December 1851.

CARLINGFORD BAY.—Reported on by Captain Washington, R.N., on 26 July 1853. Proposed to dredge a channel, 800 yards long by 200 yards wide, and 20 feet deep at low water of spring tides; also to remove several detached rocks, as those called Helly Hunter, Morgan's Pladdy, &c. Period required for completion of work three years; estimate of total cost 20,000 *l.*

Proposed by Mr. Ramsay, C.E., and reported on, with estimate, in January 1854, to remove the Bar, by dredging. Period for completion of work not given. Estimate of total cost 23,046 *l.*

WATERFORD.—Surveyed and reported on by Mr. Robert Lecky, on 28 January 1854. Proposed work consisted of a cut, by dredging, 2,000 yards in length and 400 yards wide. Period required for the completion of the work 10 years; estimated total cost 16,000 *l.*

Reported on by Captain Washington, in June 1857, to dredge channel through Duncannon Bar or Flat, one nautic mile in length, 300 yards wide, and 20 feet deep at low water of spring tides. Period for completion of work two years. Estimate of total cost 20,000 *l.*

ISLE OF MAN.—IRISH SEA.

DOUGLAS.—Designed and reported on by Capt. Vetch, R.E., on the 25th November 1856.

A Pier or Breakwater recommended on the south-east side of the bay, sheltering an area of 27 acres, having a depth of 12 feet; and 16 acres, having a depth of 18 feet and upwards, at low water of spring tides. Estimated sum in aid, 30,000 *l.*

PORT ERIN.—Designed and reported on by Captain Vetch, R.E., on 25th November 1856. Proposed work consists of a breakwater on the south side of the Bay, 600 feet in length. Estimated total cost 15,000 *l.*

BREAKWATERS, &c.

27 June 1857.

John Washington, Hydrographer.

* The charts thus marked are the surveys made between Macao and Hong Kong.

† The Island of Hong Kong was ceded by Treaty of 29 August 1842.

‡ Scale, m = 3'0 inches, implies that a nautic inch is represented by 3 inches on the chart.

§ In those cases where the date of publication appears prior to the date of receipt of the original survey, it will be understood that the earlier chart has been corrected from the later survey.

CHINA SURVEYS.

RETURN of the respective Dates of Transmission to the Admiralty of any OFFICIAL SURVEYS that may have been made in the CHINESE WATERS, between *Macao* and *Hong Kong*, since the Cession of that Island to Her Majesty; also of OFFICIAL SURVEYS of all other Portions of the CHINESE COAST."

(*Mr. Moffatt.*)

Ordered, by The House of Commons, to be Printed,
1 July 1857.

COAST GUARD.

S. R. Prowse, Chief Clerk,
for the Cashier (on leave).

Geo. Deane, Chief Clerk,
for the Clerk of the Cheque (on leave).

By Order of the Commissioners of Greenwich Hospital,

Jno. W. Nicholls, Secretary.

22 July 1857.

FREIGHT MONEY (GREENWICH HOSPITAL).

RETURN of the several Sums of FREIGHT MONEY received by the Treasurer of GREENWICH HOSPITAL, since 1th May 1855; with the Date of such Payments, and whether on Public or Private Account; and of the Name of the Ship or Vessel in which the Treasure was conveyed, and of the Captain or Officer commanding the same (in continuation of Parliamentary Paper, No. 238, of Session 1855).

(*Sir George Brooke Pechell.*)

*Ordered, by The House of Commons, to be Printed,
30 July 1857.*

GRANT'S APPARATUS FOR SHIPS AND VESSELS.

RETURN to an Order of the Honourable The House of Commons,
dated 24 July 1857 ;—for,

A RETURN “showing the Names of Her Majesty’s SHIPS and VESSELS
which have been Fitted with GRANT’S APPARATUS for obtaining Fresh Water
Distilled from the Sea:”

And, “COPIES of any REPORTS made on the same.”

Admiralty, }
6 August 1857. }

C. H. PENNELL,
Chief Clerk.

REPORT from Captain *R. B. Yates*, of H.M.S. "Illustrious," dated
9 November 1848.

(Extract.)

THE constant supply of fresh water, both hot and cold, and that of the purest quality, during the whole time the fire may be lighted, alone would prove sufficient to recommend its universal introduction on board Her Majesty's ships generally, more particularly on board those employed on the coast of Africa, and other stations, where the crews are frequently on short allowance of water, and that of the worst quality.

REPORT from Dr. *Rees*, Surgeon, H. M. S. "Arrogant;" Journal ending
31 March 1850.

(Extract.)

It can produce, by distillation, 300 gallons of water per day. The water distilled from the salt element must be unexceptionable in a sanitary point of view; never is insipid to the taste, when sufficient time has been allowed for the absorption of common air.

REPORT from Commander *Nolloth*, H. M. S. "Plumper," dated Halifax,
26 June 1850.

(Extract.)

It has amply repaid us, giving us always drinking and washing water without stint, and occasionally enabling us to start away again on arriving at a port, without the delay of watering.

REPORT from Mr. *T. Outtram*, Chief Engineer, H.M.S. "Reynard," dated
Shanghai, 27 June 1850.

(Extract.)

WE never make less than 100 gallons per day, but much oftener 120. At the present time we have not a single case of illness on board, a circumstance unprecedented in China, which is entirely owing to the excellence of the water made by the apparatus, and such is the opinion of every one on board. The brigs on the station are continually invaliding men, the badness of the water being the sole cause, which clearly shows the immense importance of the distilling apparatus; in fact, when we get any water from the shore, it is mostly reserved for washing, so that the water we drink is exclusively from the galley.

REPORT from Commander *P. Cracroft*, H.M.S. "Reynard," dated Shan ghae,
20 October 1850.

(Extract.)

AMONG the many contrivances of the age for ameliorating the sailor's condition, this will yield precedence to none in the importance of its results. On this station its advantages are doubly manifest; health, as well as comfort, may be said to be secured for the ship's company that is fortunate enough to be on board a ship with one. To it I attribute much of our immunity from sickness during the past unhealthy season at Hong Kong; for while the "Serpent" lay alongside of us, with upwards of 70 of her people knocked down by the prevailing epidemics, and the "Amazon" was very sickly also, our sick list averaged 2·46 per cent.

RETURNS RELATING TO GRANT'S

REPORT from Commander *L. G. Heath*, H. M. S. "Niger," dated, West Coast of Africa, 31 December 1850.

(Extract.)

THE victuals are cooked by steam, which is raised from salt water, the steam having passed all round the vessels containing the provisions, is led on to a condenser, and turned into excellent drinking water.

There is a clear gain of 70 or 80 gallons of water per day by using the new apparatus, and no accompanying disadvantage.

REPORT from Commander *P. Cracroft*, H.M.S. "Reynard," dated Hong Kong, 31 December 1850.

(Extract.)

INVALUABLE on this coast, where it is acknowledged that the water frequently produces disease, and especially severe diarrhœa and dysentery. The quantity of fresh water distilled averages 100 gallons per diem.

REPORT from Mr. *J. C. Barlow*, Master commanding H.M.S. "Megæra," dated Sheerness, 9 July 1852.

(Extract.)

THE average quantity of distilled water produced daily in the tanks, and good for all purposes, was about 560 gallons; and a further quantity was produced, termed "jacket-water," amounting to about 90 gallons, making a total of 650 gallons per day.

I consider the apparatus a most excellent thing, and admirably adapted to troop, and every other ship carrying convicts, emigrants, &c.; and where economy of room is great advantage. I have found it answer fully the purpose it was intended.

REPORT from Commander the Honourable *G. H. Douglas*, H.M.S. "Cruizer," dated Spithead, 7 May 1853.

(Extract.)

GRANT'S Distilling Apparatus has been in operation on board since January last, and has, up to the present time, worked satisfactorily; distilling, on an average, 120 gallons of water per diem.

REPORT from Captain *E. P. Halsted*, H.M.S. "Dauntless," dated Portsmouth, 7 May 1853.

IN obedience to their Lordships' directions, I have the honour to report that the working of Grant's Apparatus has always been most satisfactory, and the water supplied by it (sometimes to the amount of 450 gallons per day) of superior quality to any otherwise procured at any place visited by the ship.

REPORT from Commander *E. P. B. Von Donop*, H.M.S. "Vulcan," dated Portsmouth, 9 May 1853.

(Extract.)

THIS ship was commissioned in January 1851, since which period it has been in constant use, working most satisfactorily, producing daily, during the cooking hours, about 150 gallons of good pure water. Should the steam be kept up during the entire day it would produce about 300 gallons daily.

REPORT from Captain *J. Moore*, H. M. S. "Highflyer," dated Spithead,
15 May 1853.

IN reply to your memorandum of the 5th instant, directing me to report on Grant's Distilling Apparatus, I have the honour to inform you that its working has been in every respect satisfactory.

REPORT from Captain *J. Kingcome*, H.M.S. "Simoom," dated Portsmouth,
24 May 1853.

I BEG to state that in different voyages it has distilled from 500 to 600 gallons of water, from three o'clock in the morning to five in the afternoon, and on one occasion, when it was worked 24 hours, it distilled 1,000 gallons. It has proved most satisfactory both for cooking and distilling, and I should be sorry to be without it. Whilst at sea it was never a day out of repair.

REPORT from Captain *S. C. Dacres*, C B., H.M.S. "Sans Pareil," Spithead.
(not dated.)

(Extract.)

THE condenser never heats to speak of, and we make 500 gallons of good water a day.

REPORT from Captain Sir *Thomas Maitland*, C. B., H.M.S. "Agamemnon,"
dated Portsmouth, 30 June 1853.

(Extract.)

VERY useful in ships which cannot carry much water.

REPORT from Commander the Honourable *G. H. Douglas*, H.M.S. "Cruizer,"
dated Lisbon, 30 June 1853.

(Extract.)

As a means of cooking provisions, has no advantage over the common galley, and consumes about one-third more fuel. It distils from 140 to 200 gallons of pure fresh water from salt daily, and has hitherto kept in good working order. I consider it of great importance, and highly preferable to the non-distilling galley on board a ship of war.

REPORT from Captain *H. B. Martin*, C. B., H.M.S. "Duke of Wellington,"
dated Spithead, 26 July 1853.

THE distilling apparatus belonging to Grant's Galley, which was left in the ship when the galley itself was removed, has more than answered our expectations. After the accident of yesterday, by merely burning cinders, 22 tuns of fresh water were produced in 12 hours.

REPORT from Captain *R. B. Watson*, C.B., H.M.S. "Imperieuse," dated
Spithead, 26 July 1853.

(Extract.)

WHEN the small size of the condensers is considered, the result is satisfactory; proving that fresh water can always be procured by the waste steam escaping from the boilers, and when the steam is not up, by lighting the fires in one boiler and generating steam at a very low pressure; with a small expenditure of fuel the same result may be obtained.

REPORT from Captain *H. B. Martin*, c.b., H.M.S. "Duke of Wellington,"
dated Queenstown, 23 September 1853.

IN reply to your memorandum of this day's date, desiring me to report to you, for the information of the Lords Commissioners of the Admiralty, the quality of the water distilled on board the "Duke of Wellington," and its fitness for all purposes of consumption;

I have the honour to state that the water is rather flat for drinking until it has been distilled two days; and then it is excellent.

For cooking and all other purposes it is very good the moment it is distilled.

REPORT from Dr. *T. P. Dunn*, Naval Hospital, Haulbowline, dated
28 September 1853.

I HAVE this day, in compliance with your order of the 26th instant, analysed three bottles of distilled water sent here last night from the "Duke of Wellington," and have employed some of the usual tests. I do not find that it contains any impurities in solution.

I have also used the distilled water for common drink, cooking, washing, &c., this morning, and it appears to me to answer very well for all ordinary domestic purposes.

REPORT from Captain *H. Smith*, H.M.S. "Simoom," dated Spithead,
9 January 1854.

(Extract.)

Your apparatus for distilling water has answered admirably. The men have not been put on an allowance, and I have at present 30 tuns on board, having completed to 120 tuns at St. Helena.

REPORT from Mr. *J. Ward*, Inspector of Machinery, Baltic Fleet, to Surveyor of the Navy, dated off Gotska Sands, 17 May 1854.

(Extract.)

I FURTHER beg to inform you, having been ordered by Commodore Seymour to examine into Grant's Galley and Condensers, fitted on board the various ships in the Baltic fleet for the purpose of ascertaining the quantity of fresh water distilled by them in 24 hours. With the exception of the "Duke of Wellington," none of the ships generated more than from 13 to 15 tons of water per 24 hours. This, with a pressure of steam from 2 to 4 lbs. on the boiler. By increasing the pressure of steam 4 lbs., and fitting an extra pipe direct from the top of the boiler to the condenser, the result obtained was 45 tons of water per 24 hours, or $9\frac{1}{2}$ to $10\frac{1}{2}$ lbs. of water per lb. of coal, not taking the galley into consideration.

These important results were of the highest advantage in watering the fleet at Kioge Bay, when the very unfavourable state of the weather and other difficulties would otherwise have retarded the departure of the fleet for the Gulf of Fidland.

REPORT from Commander the Honourable *G. H. Douglas*, H.M.S. "Cruizer,"
dated from the Baltic, 30th June 1854, in precisely the same terms as one dated 30th June 1853.

REPORT from Mr. *S. Derry*, Senior Engineer, H.M.S. "Cruizer," to Mr. *Ward*, Inspector of Machinery, dated off Nargen, 25 September 1854.

IN pursuance of your directions I beg to submit to you the following report of the capabilities of Grant's Galley and Condenser fitted in this ship.

The galley alone produced from 100 to 150 gallons of water per day by the ordinary cooking fire, but since the communication with the boilers has been made, and steam admitted to the condenser from the boilers, 14 tuns of water per day is produced, the boilers and galley acting together; the proportions of the condenser limiting the quantity to this amount, which is the maximum.

REPORT from Vice-Admiral Sir *C. Napier*, K.C.B., Commander-in-Chief of H.M. Ships in the Baltic, dated H.M.S. "Duke of Wellington," Spithead, 17th December 1854.

THE great importance of all ships being fitted with Grant's Distiller has been well proved in the Baltic fleet.

From the time of our arrival in Kioge Bay, in the month of April last, this apparatus has been of the greatest service, indeed it is impossible to speak too highly of so useful an invention, and which must hereafter be regarded an indispensable auxiliary to a fleet, particularly in time of war. If unprovided with the means of watering itself, its movements must necessarily in many cases be greatly retarded.

I annex a table of the quantity of water distilled in three months by the ships named. The expenditure of coal for the purpose is also given.

Their Lordships are aware that the block-ships cannot distil, which was a great inconvenience, and involved the necessity of their supply of water being kept up by the ships fitted with Grant's Distiller, which was constantly required to be done from their stowing so little water.

STATEMENT of Mr *J. Ward*, Inspector of Machinery, Baltic Fleet, dated 2d October 1854.

SHIPS' NAMES.	Coals Consumed.	Quantity of Water Distilled.	Quantity of Water can distil in 24 Hours.	REMARKS.
From 1 July to 22 September 1854.	<i>Tons.</i>	<i>Tuns.</i>	<i>Tuns.</i>	
Duke of Wellington - -	102½	849½	45 to 50	These results have been obtained chiefly from north country coal. Had Welsh coal been used, a much greater quantity of water would have been produced for the same amount of fuel.
St. Jean d'Acre - -	80	920	45 to 50	
Princess Royal - -	83	637	45 to 50	
Cæsar - -	33	272	45 to 50	
Royal George - -	80	395	45 to 50	
Nile - -	14	80	45 to 50	This statement may be taken as a mean of what can be produced by H. M. ships in the Baltic.
Euryalus - -	20	205	40	
Majestic - -	45	431	45 to 50	
Cruzier - -	10	80	14	
James Watt - -	63	619	45 to 50	
Cressy - -	30	214	45 to 50	
TOTAL - -	560½	4,702½ tuns.		

REPORT from H.M.S. "Agamemnon," dated Mediterranean, 31 December 1854.

(Extract.)

Distils 250 gallons of water per day.

EXTRACT from a Letter from Mr. *G. Johnson*, Master Commanding the "Apollo" Troop Ship, dated Kazatch Bay, 16 February 1855.

HAD it not been for this admirable contrivance it would have been next to impossible for the fleet to have wintered here, as there is not any fresh water near the shore, and what there is at some distance inland is very brackish; neither could the ship have watered throughout the seaboard between Kazatch and Eupatoria, on account of the heavy surf and the Cossacks. The heights near the Katska and Alma are again partially fortified by the Russians. All the English sailing ships here are now watered by the screw-liners, independent of a sufficient quantity reserved for their own use, and when all the navy is fitted with auxiliary power, that tedious and unhealthy work of watering ship, to say nothing of its laboriousness, will be at an end. A few tuns kept in the hold for the crew in case of accident to the boilers, or deficiency of fuel, will be all that is required.

REPORT from Lieutenant *J. B. Ballard*, H.M.S. "Wye," dated Kazatch Bay, 10 January 1856.

(Extract.)

THE machinery is working most satisfactorily. We have already condensed 25,120 gallons, and delivered 7,542, at the expenditure of 10 per cent. of fuel. As the vessel has been moving about very much, it is difficult to arrive at the expenditure with much exactness, but I find 10 per cent. to be the nearest approximation.

REPORT from Mr. *J. H. Blackford*, Second Master Commanding H.M.S. "Wye," dated Kazatch Bay, 11 January 1856.

(Extract.)

I BEG to inform you that this vessel is safely arrived, and moored in Kazatch Bay; and directly she was moored commenced supplying the ships and vessels lying here with water by an order from the senior officer here.

When the "Wye" arrived there was about 10 tuns of fresh water in the Bay.

The "Wye" can make 12 tuns of water with an expenditure of only one ton of coals.

The following are the ships we are now supplying:—H.M.S. "Furious," H.M.S. "Cyclops," H.M.S. "Moslem;" steam transports "Chanticleer," "Brande," and "Gertrude," six mortar boats, the magazine guard, the hospital and guard, and the lighthouse guard on shore.

I am pleased to be able to inform you that every part of the apparatus is in good condition, and that there has not been the least failure since we have been condensing.

REPORT from Mr. *S. Jerome*, Engineer, H.M.S. "Wye," dated Kazatch Bay, 31 January 1856.

(Extract.)

I HAVE the honour to enclose you a copy of the log of the condensing apparatus for the month of January.

I frequently test the water, and have always found it pure; and it has been
tested

tested at Malta, Constantinople, and Kazatch Bay by medical men, and in every instance met with their approbation.

No. of gallons condensed.	No. of gallons supplied.
84,067.	35,688.

REPORT from Mr. *J. H. Blackford*, Second Master Commanding H.M.S. "Wye," of quantity of Water condensed and supplied during the month of February, dated Kazatch Bay, 1 March 1856.

No. of gallons condensed.	No. of gallons supplied.
22,614.	34,349.

REPORT from Mr. *J. H. Blackford*, Second Master Commanding H.M.S. "Wye," dated Kazatch Bay, 21 March, 1856.

(Extract).

We made on Monday and Tuesday 20,900 gallons with 10 tons of coals, including banking and getting the steam up.

REPORT from Mr. *J. H. Blackford*, Second Master Commanding H.M.S. "Wye," of quantity of Water condensed and supplied during March, dated Kazatch Bay, 10 April 1856.

No. of gallons condensed.	No. of gallons supplied.
32,289.	28,609.

REPORT from Mr. *J. H. Blackford*, Second Master Commanding H.M.S. "Wye," dated Kazatch Bay, 30 April 1856, showing quantity of Water condensed and supplied during that month.

No. of gallons condensed.	No. of gallons supplied.
87,085.	90,739.

REPORT from Mr. *P. C. D. Beane*, Master Commanding H.M.S. "Wye," dated Kazatch Bay, 4 June 1856, showing the quantity of Water condensed and supplied during the month of May.

No. of gallons condensed.	No. of gallons supplied.
76,857.	59,266.

REPORT from Mr. *G. Moore*, Master Commanding H.M.S. "Wye," dated Kazatch Bay, 30 June 1856.

I HAVE the honour to enclose the log of the condensing apparatus for the month of June, including the amount of water supplied to Her Majesty's ships, transports, dockyards, and hospital establishments, for the information of the Lords Commissioners of the Admiralty.

No. of gallons condensed.	No. of gallons supplied.
85,262.	77,550.

REPORT from *Mr. G. Moore*, Master Commanding H.M.S. "Wye," dated Gibraltar, 5 August 1856, showing the quantity of Water condensed and supplied during July.

No. of gallons condensed.	No. of gallons supplied.
<u>24,528.</u>	<u>35,366.</u>

REPORT from *Mr. G. Moore*, Master Commanding H.M.S. "Wye," dated Gibraltar, 2 September 1856.

I HAVE the honour to enclose the log of the condensing apparatus in this vessel for the month of August, including the amount of water supplied to the naval tank on shore, and the dock-yard tank vessels (for Her Majesty's ships and transports), for the information of the Lords Commissioners of the Admiralty.

No. of gallons condensed.	No. of gallons supplied
<u>439,706.</u>	<u>435,461.</u>

REPORT from *Mr. G. Moore*, Master Commanding H.M.S. "Wye," dated Malta, 30 September 1856, showing total quantity of Water condensed and supplied during September.

No. of gallons condensed.	No. of gallons supplied.
<u>32,640.</u>	<u>21,895.</u>

REPORT from *Mr. G. Moore*, Master Commanding H.M.S. "Wye," dated Malta, 2 December 1856.

(Extract.)

IN compliance with your request relative to the quantity of coals consumed, distilling 439,706 gallons of water, mentioned in my report for the month of August last, I beg to acquaint you that it was 238 tons, 12 cwt., averaging about 9 tuns of water to the ton of coals, a considerable quantity of which was patent fuel; I may also state, that the water distilled was fit almost for immediate use, as the temperature seldom exceeds 80 degrees, although the atmosphere at the time was seldom less.

GRANT'S APPARATUS FOR SHIPS AND
VESSELS.

RETURN showing the NAMES of Her Majesty's
SHIPS and VESSELS which have been Fitted with
GRANT'S APPARATUS for obtaining Fresh Water
Distilled from the Sea; and, Copies of any
REPORTS made on the same.

(Admiral Duncombe.)

*Ordered, by The House of Commons, to be Printed,

RETURN of HER MAJESTY'S SHIPS and
VESSELS employed on the Coast of *Cuba*
for the SUPPRESSION of the SLAVE TRADE,
from the 1st day of January 1854; &c.

(*Sir George Brooke Pechell*).

Ordered, by The House of Commons, to be Printed,
9 June 1857.

ORDNANCE.

1855-56.

AN ACCOUNT

OF THE

ORDNANCE RECEIPT AND EXPENDITURE,

For the Year ended 31st March 1856.

(Pursuant to Act 9 & 10 Vict. c. 92, s. 2.)

*Ordered, by The House of Commons, to be Printed,
15 August 1857.*

ORDNANCE RECEIPT AND EXPENDITURE,

1855-56.

(No. 475.)

My Lords,

Audit Office, 10 August 1857.

WE beg leave to lay before your Lordships the accompanying copy of an Account of the Receipt and Expenditure for Ordnance Services for the year ended 31st March 1856. This account transmitted to us in pursuance of the 2d section of the Act 9 & 10 Vict. c. 92, was received on the 17th ultimo, and has been duly examined by officers under our direction.

The amount granted by the Acts 18 & 19 Vict. c. 129, s. 15, and 19 & 20 Vict. c. 105, s. 16, for Ordnance Services, was 9,990,165*l.*; and the total Expenditure, as shown by the Account now laid before your Lordships, is 11,993,784*l.* 3*s.* 4*d.*, leaving a deficiency of 2,003,619*l.* 3*s.* 4*d.*

The differences between the sums voted and those expended are as follows:—

Vote.		EXPENDED					
		Less than Voted.			More than Voted.		
		£.	s.	d.	£.	s.	d.
1	Pay of Military Corps - - - - -	-	-	-	329,386	2	3
2	Commissariat and Barrack Supplies - - - - -	-	-	-	651,180	13	6
3	Ordnance Office - - - - -	-	-	-	5,053	3	4
4	Establishments at Home and Abroad - - - - -	-	-	-	64,589	5	3
5	Wages at Home and Abroad - - - - -	-	-	-	28,222	10	4
6	Ordnance Stores - - - - -	-	-	-	707,266	17	3
7	Works, Buildings, and Repairs - - - - -	-	-	-	231,650	16	7
8	Scientific Branch - - - - -	6,253	11	7	—		
9	Non-Effective Services - - - - -	9,164	17	2	—		
	Balances irrecoverable - - - - -	-	-	-	1,688	3	7
	£.	15,418	8	9	2,019,037	12	1

The above deficiency of 2,019,037 *l.* 12 *s.* 1 *d.* having been reduced to 2,003,619 *l.* 3 *s.* 4 *d.* by the application in aid of the surplus of 15,418 *l.* 8 *s.* 9 *d.*, under the authority of your Lordships' Warrant signifying Her Majesty's pleasure to that effect, the net deficiency of 2,003,619 *l.* 3 *s.* 4 *d.* has been met by the transfer of a like sum by your Lordships' directions from the Special Votes of 3,000,000 *l.* each, appropriated by the Acts 17 & 18 Vict. c. 121, s. 15, and 18 & 19 Vict. c. 129, s. 17, to provide for any additional expense arising out of the War with Russia, as shown on the debit side of the account.

We have ascertained that the amount of Extra Receipt Moneys, as shown in the Memorandum attached to the Account, has been paid into the Exchequer, as follows:

								£.	s.	d.
August 1855	-	-	-	-	-	-	-	56,955	17	-
October 1855	-	-	-	-	-	-	-	28,219	9	1
February 1856	-	-	-	-	-	-	-	73,342	14	2
May 1856	-	-	-	-	-	-	-	59,070	17	6
							£.	217,588	17	9

In conformity with the 6th section of the 9 & 10 Vict. c. 92, we have, as usual, "given under each head the explanations with which we have been furnished of the causes of the (several) excesses;" but, inasmuch as our power under that clause is—so far as such excesses are concerned—limited to "recapitulating the several heads of the account under which the sums expended shall have exceeded the sums voted," and to "certifying that such excesses have been sanctioned," &c., we abstain from expressing any opinion as to the sufficiency or otherwise of the explanations in question.

We have on former occasions expressed our opinion of the efficiency of the system of recording Expenditure in the Books of the Ordnance, which system is similar to that adopted at the Admiralty, and is not open to the observations contained in our Report on the Army Accounts, to which we beg leave to refer.

We have, &c.

(signed) *Edward Romilly.*
Charles Ross.
W. L. Maberly.
R. Vaughan Davis.

The Lords Commissioners of
Her Majesty's Treasury,
&c. &c. &c.

COPY of an ACCOUNT of the ORDNANCE RECEIPT and EXPENDITURE for the Year ended 31st March 1856;
9 & 10 Vict.

THE Amount of 340,196 *l.* 6 *s.* 6 *d.*, the unappropriated Balance of the Grants for 1854-55, as shown on the Account of Ordnance Receipt and Expenditure for the Financial Year ended the 31st March 1855, has been withdrawn by the Lords of the Treasury from the Army Votes at the Exchequer for the Year 1856-57, as signified by Sir Chas. Trevelyan's Letter of 30th March 1857, an attested copy of which is annexed.

To AMOUNT GRANTED for ORDNANCE SERVICES for the Year 1855-56, per Act 18 & 19 Vict. c. 129, s. 15.		£.	s.	d.

W. L. Maberly.

EXPLANATORY NOTES referred to in the preceding Account.

VOTE No. 1.—Pay Allowances and Contingencies, Ordnance Military Corps, £.329,386. 2*s.* 3*d.*

This excess arises from an addition of 6,000 Men to the Royal Artillery and Engineers, the extra expense occasioned by the introduction of the Tunic pattern, the same being at least 6*s.* per man dearer than the Coatee, and the gratuitous issue of an extra suit of clothing to each man, in the winter of 1855-56.

VOTE No. 2.—Commissariat and Barrack Supplies, £.651,180. 13*s.* 6*d.*

The excess on this Vote is occasioned by the supplies of Barrack Stores and Hospital Bedding for the Crimea and Scutari, having been issued upon a much larger scale than was contemplated when the Estimates were prepared.

VOTE No. 3.—Ordnance Office, £.5,053. 3*s.* 4*d.*

This excess is caused by the appointment of Captain Caffin as Naval Director of Artillery, at a salary of 900*l.* per annum, subsequent to the preparation of the Estimate, an augmentation to the establishment in consequence of the War, and an increased Expenditure on account of Law Charges.

VOTE No. 4.—Establishments at Home and Abroad, £.64,589. 5*s.* 3*d.*

This excess arises from the entirely new, or greatly augmented establishments at Balaklava, the Bosphorus, Malta, &c., and an increased expenditure under various items of Barrack Expenditure consequent upon the War.

VOTE No. 5.—Wages of Artificers and Labourers at Home and Abroad, £.28,222. 10*s.* 4*d.*

The excess on this Vote arises from the necessity of increasing the numbers of Artificers and Labourers at the Seat of War and stations contiguous to it, as well as the Manufacturing Departments at Woolwich, to meet the pressing demands for warlike stores of all descriptions.

Explanatory Notes—*continued.*

VOTE No. 6.—Ordnance Stores for Land and Sea Service, £. 707,266. 17 *s.* 3 *d.*

This excess is occasioned by the vastly increased demands for Iron Ordnance, Shot, Shells, &c., Waggons, Harness, &c. for the Land Transport Corps, Huts for the Crimea, and Stores of various descriptions required in the prosecution of the War.

VOTE No. 7.—Works, Buildings, and Repairs, £. 231,650. 16 *s.* 7 *d.*

This excess is solely attributable to the extensive Engineer Works carried on at the Seat of War under the direction of the Commander of the Forces, the nature and extent of which were not known when the Estimates were framed.

BALANCES due by the following Accountants, which have been written off as irrecoverable, £. 1,688. 3 *s.* 7 *d.*

SURVEY OF GREAT BRITAIN.

RETURN to an Order of the Honourable The House of Commons,
dated 2 July 1857;—for,

A COPY “of recent CORRESPONDENCE between the War Department and the Treasury in respect of the SCALE on which the SURVEY of *Great Britain* is to be drawn in future.”

(7602—60.)

Sir,

War Office, Pall Mall, 27 June 1857.

I AM commanded by Lord Panmure to request that you will call the attention of the Lords Commissioners of Her Majesty's Treasury to the position in which the operations of the Ordnance Survey will be placed by the recent Vote of the House of Commons, requiring that the result of the survey shall not be published on a scale larger than six inches to the mile, and that you will obtain their Lordships' directions on the subject.

Lord Panmure had hoped that, after the repeated changes of plan which had seriously impeded the progress and increased the expense of the survey, a course of proceeding had been determined upon for the remaining counties of England and Scotland which might be maintained with much public advantage, until the question was finally set at rest by a full experience of actual results.

As the subject was one which could not be satisfactorily pronounced upon without practical knowledge, and a close attention to details, all the individuals and public bodies indicated as being likely to be able to form a good opinion upon it were consulted, to the number of about 300, and the arrangement adopted was that which was recommended by a very decided majority of them, as shown in the “Correspondence respecting the Scale for the Ordnance Survey, and upon Contouring and Hill Delineation,” presented to both Houses of Parliament in the year 1854.

The alteration which has now been made in this arrangement demands the most anxious consideration.

A map on the scale of one inch to the mile is sufficient for geographical purposes. A map, or as it should rather be regarded, a series of plans, on the scale of 25 inches to the mile, is required to comprehend all the purposes to which a detailed survey is applicable, including an improved system of local assessment, and more simple and economical arrangements for the transfer of real property. A map on the scale of six inches to the mile, to which the publication of the Survey has been restricted by the recent decision of the House of Commons, is too large for the first and too small for the last class of objects.

With a few limited exceptions, the only part of the country in which it can answer the purposes of a detailed survey is the Highlands of Scotland, and it formed part of the arrangement that the survey of that district should not be published on a scale larger than six inches.

And in order to frame a map on the scale of six inches to the mile, the field survey must be conducted in nearly as much detail as if the results were drawn on paper on the scale of 25 inches to the mile. The difference of expense is calculated to be only 1½*d.* an acre, or 50,000*l.* for the remaining portion of Scotland, in addition to the cost of publication by one of the cheap processes for multiplying copies, which would be recovered by the sale of 30 copies of the plans. It is therefore totally inconsistent with any reasonable economical view to incur the expense required to lay down the results of the survey on the scale of six inches to the mile, and not also to take the further steps required to supply copies of those results on the scale of 25 inches to the mile, wherever an effectual demand exists for them.

The plans for the following counties have been drawn, and have been in part actually published, and in all other cases are nearly ready for publication, viz. :

					Published.
Durham	-	-	-	-	One-half.
Renfrew	-	-	-	-	One-sixth.
Ayr	-	-	-	-	One-half.
Dumfries	-	-	-	-	One-third.
Peebles	-	-	-	-	One-half.
Berwick	-	-	-	-	One-fourth.

Lord Panmure cannot believe that after the country has been put to the expense of making these plans, the public will be deprived of the benefit of them.

The survey of the following counties is now in progress on the 25-inch scale, and the plans have been in part drawn on that scale, viz. :

Northumberland.	Roxburghshire.
Westmorland.	Selkirkshire.
Lanarkshire.	Forfarshire.

Lord Panmure recommends that the survey of these counties should be completed on the scale on which it has been begun, and that the scale upon which the survey should afterwards be conducted should be determined by the actual experience which will by that time have been acquired of the comparative public advantage of the different scales.

I have, &c.
(signed) *B. Hawes.*

(10,499—2/7.)

Sir,

Treasury Chambers, 2 July 1857.

IN reply to your letter of the 27th ultimo, I am commanded by the Lords Commissioners of Her Majesty Treasury to acquaint you, for the information of Lord Panmure, that in accordance with the recent decision of the House of Commons, it appears to my Lords that the only course which the Ordnance Department can take, will be to finish the works of the Ordnance Survey at present actually in progress on the 25-inch scale, and to adopt the scale of six inches upon all new works.

I am, &c.
(signed) *James Wilson.*

ORDNANCE SURVEY.

R E P O R T

ON THE

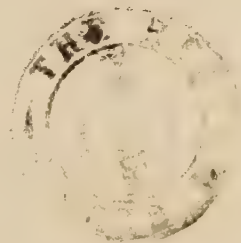

O R D N A N C E S U R V E Y

OF THE

UNITED KINGDOM,

FOR

1855-56.

LIEUTENANT-COLONEL JAMES to the Inspector-General of Fortifications, submitting Statements of the Progress of the Ordnance Surveys of the United Kingdom, and of the Amounts required to be inserted in the Estimates for the year 1857-58, and other information connected with the Surveys.

Ordnance Map Office, Southampton,
13 December 1856.

Sir,

IN obedience to the orders of the Right Honourable Lord Panmure, K. C. B., Secretary of State for War, dated 13th, 25th, and 27th November last, ²⁴⁴⁻¹/₁₄₁, I beg to submit the following Report of the progress of the Ordnance Survey of the United Kingdom up to the present time, and during the past year, with the other reports and returns called for in those orders, to which I have added some remarks upon the different branches of the work, and the methods of conducting the operations of the survey, in the desire of giving the fullest information upon every point.

I have, &c.

(signed) *Henry James,*

Lieutenant-Colonel Royal Engineers.

The Inspector-General of Fortifications.

REPORT on the ORDNANCE SURVEY of the United Kingdom for 1855-56.

P R E F A C E.

As this is the first detailed Report on the Survey which has been presented to Parliament, it will conduce to a more perfect knowledge of the subject if a sketch of the general arrangements for conducting this great work is given by way of preface.

The head quarters of the Survey of the United Kingdom is at Southampton, and from thence all orders connected with the administration and conduct of the survey are issued, and all the plans and maps of Great Britain are there engraved and printed: the plans and maps of Ireland are engraved and published at the Survey Office, in the Phoenix Park, Dublin. But it is in contemplation to remove the head quarters of the survey to London, still keeping at Southampton the engraving and publication in the same way as is now done in Dublin.

The number of persons employed on the survey on the 31st March last was: 1 Lieutenant-colonel superintending, 16 Captains, 2 Lieutenants, 1 Quartermaster, and 480 non-commissioned officers and sappers of the corps of Royal Engineers, 960 civil assistants, and 609 labourers, making a total of 2,069 persons; but, in consequence of the reduction in the amount of the grants for the survey, this number is now reduced to 1,282.

The Superintendent resides at Southampton, and three other officers are also resident there, viz.:

One Captain in charge of the correspondence, the accounts, the engraving, and the publication of the plans.

One Captain in charge of the trigonometrical operations and the levelling.

One Lieutenant to examine the MS. plans as they are sent up from the country, to see that they are in accordance with the instructions, and ready for publication, and also to reduce the plans from the large scales to the smaller scales, previous to their being engraved.

One Captain resides in Dublin, and makes the reductions from the plans on the scale of six inches to a mile to the 1-inch scale, and superintends the engraving of the plans of Ireland.

Of the remaining officers, two are employed in England on the detailed survey, five in Scotland, and two in Ireland. These officers are supplied, from the office at Southampton, with the trigonometrical distances, and the positions of the trigonometrical stations on the plans; and they have under them numerous parties of surveyors, draftsmen, and computers, acting under the direction of non-commissioned officers: by this arrangement the whole force is systematically and effectively regulated.

The division officers personally examine the plans on the ground, and certify to their accuracy before the plans are forwarded for publication; one officer is in charge of the hill sketching in the north of England, and one in Scotland, and I purpose employing an officer on the special service in Ireland; but the hill sketching in Ireland is so far advanced already that this is not immediately required.

The names and stations of the officers are given at page 16.

Each officer makes up the accounts of his division, which, after being examined at the head-quarter office, and certified by the superintendent, are forwarded to the Accountant-general.

The rates of pay of the non-commissioned officers to 4 s. per diem, and of the

sappers to 3 *s.* per diem, is regulated by the superintendent, on his receiving a detailed report of the qualifications, conduct, and progress made by each individual. The rates of pay of the civil assistants is regulated in the same manner to the extent of 15 *s.* per diem for engravers, and of 10 *s.* for the others; for any rate above these sums, the superintendent requires the sanction of the Secretary of State for War.

The rates of pay under similar regulations are reduced either for insufficient progress, or for inaccurate or imperfect work.

The rates now paid are given at page 18.

The series of Ordnance Plans now produced consist of—

1. *Plans of Towns* of above 4,000 inhabitants, on the scale of $\frac{1}{500}$ or 10·56 feet to a mile, or 41 feet 8 inches to an inch.
2. *Plans of Parishes*, with tables of areas, in the cultivated districts, on the $\frac{1}{2500}$ scale, or the scale of one square inch to one acre.
3. *Plans of Counties*, on the scale of six inches to one mile, the plans of the towns and of the parishes being reduced from the larger scales to this scale by photography, and at a trifling cost. The plans of the uncultivated districts are on the 6-inch scale only; but the entire counties are on one uniform scale.
4. *Plan of the Kingdom*, on the scale of one inch to one mile, the plans on the 6-inch scale being reduced by photography for engraving.—
See illustrations at the end of the Report, and a set of full sheets in the Libraries of the Houses of Lords and Commons.

7 July 1857.

H. J.

No. 1.

BRIEF HISTORY and REVIEW of the ORDERS relative to the SURVEY up to present Time.

As the Secretary of State for War has directed that an Annual Report, containing the information now called for, is to be drawn up, and forwarded with the estimates for each year, I think it right to give a brief history and review of the orders which have been given relative to the survey for some time before, and since I took charge of the department (in August 1854), up to the present time, so as to present a clear view of the instructions under which the survey is now conducted, and of the progress which has been made in conformity with them.

In 1824, the survey of England and Scotland, which had been proceeding for the completion of the engraved map of Great Britain, on the scale of one inch to a mile, was almost entirely suspended, that the survey of Ireland, on the scale of six inches to a mile, might be proceeded with, principally for the purpose of the general valuation of that country.

The survey of Ireland having been finished, and every county engraved on the 6-inch scale, the surveys of England and Scotland were resumed; but the maps of Ireland, on the scale of six inches to a mile, having proved to be of such great value to the public for numerous important purposes not originally contemplated, the six northern counties of England and the whole of Scotland was ordered to be surveyed for, and drawn, and engraved on the 6-inch scale. In conformity with these instructions, the following counties were drawn and engraved on that scale; but the work which had been previously done for the 1-inch scale in those districts was entirely lost.

England—Yorkshire and Lancashire.

Scotland—Wigtownshire; Kirkcudbrightshire; Edinburghshire; and the Isle of Lewis.

The principal towns, and those towns in the above counties which contained upwards of 4,000 inhabitants, were also drawn and engraved on the scale of 60 inches to a mile, and the plans on the 6-inch scale were ordered to be reduced to

to the 1-inch scale, for the completion of the general map of the kingdom on that scale.*

The survey of Great Britain having so far proceeded, a Select Committee of the House of Commons was appointed in 1851, of which the Honourable Mr. Charteris, now Lord Elcho, was chairman, to report upon the survey of Scotland (and I may here state, that the minutes and orders which have been issued relative to the survey of Scotland have since 1840 been made to apply equally to the six northern counties of England). This Committee recommended, "that the 6-inch scale should be abandoned, and that the survey for the 1-inch map only should be proceeded with."

Vide Report, ordered to be printed, 10 July 1851, No. 519.

Orders in conformity with this recommendation were accordingly issued, and parts of three counties, Haddingtonshire, Berwickshire, and Lanarkshire were surveyed for the 1-inch scale; but, in consequence of the numerous memorials which were received from all parts of Scotland, protesting against the change, the Government over which Lord Derby presided ordered that the 6-inch scale should be again resumed, and, as a natural consequence, all the work that had been done for the 1-inch scale, which did not contain the details and the minute accuracy which is necessary for making plans on a large scale, had to be laid aside as useless.

Hon. Board's Order, 2 Feb. 1852, T-36.

See Treasury Letter, 28 Aug. 1852.

In consequence of the orders issued by Lord Derby's Government, the counties of Haddington, Fife, and Kinross were surveyed, drawn, and published on the 6-inch scale; but the plans on this scale not being approved of by many influential people in Scotland, a circular Treasury letter was forwarded to numerous officials and scientific gentlemen throughout Scotland, requesting their opinion as to what should be the scale for the manuscript and the engraved plans of the urban and rural districts; at the same time an order was issued to the survey department to carry on the survey of Ayrshire and Dumfriesshire, "with that degree of accuracy which would admit of the plans of the cultivated districts being hereafter drawn on the scale of 24 inches to a mile, if desired."

Treasury Circular, 16 April 1853.

Treasury Minute, 15 April 1853.

The replies to the circular letter having been found to be in favour of a much larger scale than the 6-inch, and for a scale of 24 or 26 $\frac{3}{4}$ inches to a mile for the manuscript plans, and for the scale of half the manuscript plan for the engraved plans of the rural district, and for the scale of 120 inches to a mile for the manuscript plans of the towns, and half that scale for the engraved plans, a second Treasury circular letter was issued, to know whether the 24 inches to a mile, or the 26 $\frac{3}{4}$ inches to a mile, that is, three chains to an inch, or the scale of $\frac{1}{2500}$ ths of the linear measure of the ground, equal to 25.344 inches to a mile (subsequently found to be equal to one square inch to one acre †) would be preferable for the rural districts, and whether the scale of $\frac{1}{500}$ ths of the linear measure (equal to 10 ft. 6 $\frac{3}{4}$ inches) to a mile would be preferable for the towns.

16 January 1854, page 225, correspondence.

The replies to this circular being in favour of the $\frac{1}{2500}$ th scale for the rural districts, and for the $\frac{1}{500}$ th scale for the plans of the towns, a Treasury Minute, of the 15th July 1854 was issued, directing that the surveys of Ayrshire and Dumfriesshire should be drawn on the scale of $\frac{1}{2500}$ th, and that the course which has been authorised in reference to those two counties should be applied to the survey of other districts.

See Report, p. 343, Correspondence on the scales for the survey.

Treasury Minute, 15 July 1854.

I received this order on the 11th August 1854, the day on which I was appointed superintendent of the survey, and on the day following I issued detailed instructions to the division officers for carrying their Lordships' orders into effect.

But these orders contained no instructions as to the scale for the plans of towns; I therefore, in a letter dated 26th August, requested instructions upon this head, and recommended the scale of $\frac{1}{500}$ th; and on the 7th May 1855 I addressed a letter to the Lords of the Treasury on the scale for the uncultivated districts, recommending that the scale of six inches to a mile should be adopted for the Highlands and other uncultivated districts, and that the plans on the

See No. 8; papers relating to the Ordnance Survey, printed with Treasury Minute, 18 May 1855, 0.52.

* Three-fourths of the plans of Ireland have been reduced to the 1-inch scale.

† The square of 1.0018 inch is equal to one acre.

See No. 6 of the
above papers.

the $\frac{1}{2500}$ th scale should be reduced to the 6-inch scale, so as to make the plans of every county perfect on that scale.

Parliamentary
Paper, 0.52.

The Treasury Minute of the 18th May 1855 directs that the uncultivated districts are to be drawn on the scale of six inches to a mile, whilst the plans of the cultivated districts are to be drawn on the 25·344-inch scale, and that the scale for the plans of the towns is to be the $\frac{1}{500}$ or 126·72 inches to a mile, and that the 1-inch map should be proceeded with as rapidly as possible.

See Report,
6 May 1856.

In the debate in the House of Commons on the 12th March 1855, when the estimates for the Survey were under discussion, Lord Seymour, now Duke of Somerset, moved a reduction of the vote, and opposed the introduction of the $\frac{1}{2500}$ scale, Lord Palmerston stated, that nothing should be done on this scale, excepting in Ayrshire and Dumfriesshire, as an experiment, and that a Select Committee should be appointed to report upon the subject. A Select Committee was accordingly appointed on the 3d March 1856, of which Viscount Duncan was Chairman; this Committee approved of the $\frac{1}{2500}$ th or 25-inch scale for the cultivated districts, of the 6-inch scale for the uncultivated districts, and of the $\frac{1}{500}$ th scale for the towns, and recommended that the $\frac{1}{2500}$ plans should be reduced to the 6-inch scale, and engraved so as to make every county perfect on one uniform scale.

On the 19th June 1856 a further discussion on the Survey was brought on in the House of Commons, in consequence of a motion by the Right honourable E. Ellice for a reduction in the amount to be voted for the Survey, on the ground of his objecting to the 25-inch scale; after a lengthened discussion the House rejected the motion by a majority of 91, and adopted the report of the Committee.

25 Nov. 1856.

A Treasury Minute has consequently been issued, directing that the 25-inch plans should be reduced to the 6-inch scale, and published as recommended by the Committee.

The instructions under which the survey of Great Britain is now proceeding are consequently strictly in accordance with the recommendations of Lord Duncan's Committee.*

No. 2.

Progress.

STATEMENT of the Progress of the Ordnance Surveys.

It will conduce to a clearer understanding of the subject if I give the progress of the survey up to the present time, as well as the progress which has been made in the last 12 months.

I have referred to the fact that twice during the survey of Great Britain large districts were surveyed for the 1-inch scale, and that these same districts had to be resurveyed for plans on a larger scale. It will also be observed that between the issue of the Treasury Minute of the 15th April 1853 and that of the 15th July 1854, that is for a period of 15 months, no orders were issued as to the scale upon which the plans were to be drawn; the consequence of this was, that there was an accumulation of no less than 867,000 acres surveyed, not one of which was drawn when I took charge of the survey.

I am happy to say that we have been able not only to bring up this great arrear of work, but that, in conformity with the instructions I have issued, the work is now plotted as soon as the field measurements are taken; and that, in consequence of this arrangement, the rate of the publication of the maps is rapidly increasing; and if the progress of the survey is not again arrested, I make no doubt but that it will be satisfactory to the country, and that the survey will be completed at a cost not exceeding that which I have stated in the estimates which were laid before Parliament.†

* On the 18th June 1857, another debate took place in the House of Commons, on the motion of Sir D. Norreys, to stop the drawing of the plans of the cultivated districts of Great Britain on the 25-inch scale, and for making the plans on the 6-inch and 1-inch scales, like those of Ireland; and the House decided in favour of the motion by a majority of 10.

† I now know that the cost will be under the amount stated, as I informed Lord Duncan's Committee I anticipated it would be.

* The plan of this town was originally drawn for the Board of Health. The plans of the towns of Linlithgow, Berwick, Ayr, Cupar, Dunfermline, and Kirkcaldy have been published during the present year.

† The survey of Glasgow was long delayed in consequence of a correspondence with the Government as to the propriety of calling upon the inhabitants to pay a portion of the cost of the survey. See Papers relating to the Ordnance Survey, 0.52, published with the Treasury Minute of the 18th May 1855. The 6th paragraph of that Minute directs, "that local contributions in aid of the expense of the survey should not be required, except in the case of special surveys made in districts in which the general survey is not in progress."

‡ The surveys of Glasgow and Paisley are now finished, and in course of publication.

I R E L A N D.

Ireland.

THE Area of Ireland is 32,813 Square Miles.

Index, No. 4.

THE plans of every county in Ireland have been engraved and published on Counties. the scale of six inches to a mile.

There are 2,470 parishes and 60,760 townlands in Ireland, the boundaries of which, and the areas of which, have been given; and inasmuch as the townland boundaries are in almost all instances conterminous with the areas of private estates, the Ordnance Survey on the 6-inch scale has been found to be of far greater value to the people of that country, than the plans on the same scale could possibly be in Scotland, where there are only 919 parishes which are not subdivided, or in England, where we have 10,780 parishes, some of which are subdivided into townships, but the townships are very rarely conterminous with properties; and hence it is, that the survey on the 6-inch scale may have been sufficient for Ireland, though the same scale is insufficient for Great Britain, where the boundaries of the civil divisions of the country are not conterminous with those of private properties. These observations of course have reference to the great question of facilitating the transfer of property by the aid of authentic Government maps, and the valuation of properties for local assessments.

The instructions under which the survey of Ireland commenced, may be understood, from the recommendations of the Select Committee "on the Survey and Valuation of Ireland," of which the Right Honourable T. Spring Rice (now Lord Monteagle, was Chairman)—see Parliamentary Report, 1824, No. 445: "It is obvious, that if a baronial or even a parochial subdivision were alone to be effected, sufficient data would not be furnished for the apportionment of the local taxes; and if, on the other hand, a survey by fields were to be undertaken, as in France and Bavaria, the expense of such a work would be augmented, and its completion postponed. A survey by townlands appears to your Committee to be the rational medium between these two extremes, sufficiently close for practical purposes, without aiming at any extreme minuteness of detail."

Revision of the northern counties.

It is extremely to be regretted that the examples of France and Bavaria had not been followed; the neglect of so doing has led to that very augmentation of expense and postponement of the completion of the work, which was feared if the survey had been made in complete detail as in those countries, in the first instance.

In was in consequence of the instructions which were issued, in conformity with the above recommendation, that the northern counties of Ireland, which were first surveyed, were made without that detail, which has subsequently been found to be essentially necessary for the local valuation and assessments, and hence it is that we are now revising those northern counties at a great additional expense.

In the greater part of Ireland there are at least 50 enclosures for one in Scotland, and the cost of inserting these enclosures only in Ireland, almost amounts to the cost of an original perfect survey in Scotland.

The following counties have been revised:

Donegal.
Londonderry.
Antrim.
Tyrone.
Fermanagh.
Down (part of).
Monaghan (part of).

593 square miles have been revised in the counties of Fermanagh, Down, and Monaghan during the last year.

Dr. Griffiths states, that Armagh is the only other county which for the purposes of the valuation requires revision.

Ireland.

The southern half of Ireland was made complete in full detail, but there are several other counties besides the one mentioned, which require a partial revision to render them perfect like the rest.

These towns have not been drawn with that degree of minute accuracy which the towns in Great Britain have been, with the exception of Belfast Lurgan, and Portadown, which have been surveyed during the last year.

Fourteen thousand five hundred and ten square miles have been reduced from the 6-inch plans to the 1-inch scale, and 9,784 square miles have been engraved in outline, of which 4,283 square miles have been engraved during the last year.

One inch map.

The engraving of the outline map of Ireland, on the scale of one inch to a mile, will be finished by the 31st March 1859.

Ireland.

The hill sketching of one-fourth of Ireland is ready for the engraver, provided we are not to wait for the contouring, and strongly advocating as I do, the system of recording levels by means of contours, I cannot advocate the super-adding contours to a map, on every square mile, of which we have already got from three to four miles of levelled lines.

Hill sketching.

The engraving of the hill features of the northern counties, in which we have got both the contours and the hills sketched, is now proceeding, in obedience to orders received on the 18th August 1855.

The following counties have been contoured :

Contours.

Contoured on the 6-inch map	-	-	-	Donegal.
				Londonderry.
				Tyrone.
				Antrim (part of).
				Louth.
				Kilkenny.
				Dublin.

MEMORANDUM on the Contouring and One-inch Map of Ireland, drawn up by order of the Clerk of the Ordnance, 23d June 1856.

In 1843 a memorial was forwarded by the British Association for the Advancement of Science to Government, requesting that the whole of Ireland should be contoured in the same manner that part of Kilkenny had been, and a Treasury minute, of the 23d July 1844, directed the whole to be contoured on the 6-inch maps.

Reports of Committees and orders relative to the one-inch map.

In 1846 a Committee of the House of Commons, of which Sir Denham Norreys was chairman, reported on the works which were required for the completion of the survey of Ireland, and stated that the completion of a general map of Ireland, shaded similarly to that of England, was part of the original design; but the Report states, "A question has arisen as to whether it be requisite to wait for the completion of the contour lines before the general map be commenced. Colonel Colby, Captain Yolland, and Captain Larcom recommended the previous completion of the contours, whilst Captain Dawson and Sir H. De la Beche were of opinion that, considering the number of altitudes which are engraved on the 6-inch maps, and the minute detail of the 6-inch survey, a shaded general map of Ireland may be produced by hill sketching alone, which shall excel in accuracy the 1-inch map of England."

In 1853 a Committee of the House of Commons, of which Mr. John Ball was chairman, reported upon the details of the reduced map of Ireland, and they state, "that, in order to render the general map of Ireland, reduced to the scale of one inch to the mile, as extensively useful as possible, both to the public and to scientific men, and at the same time worthy of the great survey on which it is based, the delineation of the hills and valleys should be grounded upon contour lines, ascertained from actual survey; and they consider it highly desirable that such a number of those lines as may be found suitable to the scale on which the map is based, should be actually exhibited thereon."

In 1854 a committee of eminent persons, of which Lord Ellesmere was chairman, was appointed to consider, with reference to the survey of Scotland—

1st. Whether the advantages to the public to be derived from the exhibition of contour lines on the Ordnance maps are commensurate to the cost of their production; and,

2d. Whether the advantages which are derivable from this system may or may not be attained to a sufficient extent, and at a considerably less cost, by the adoption of any other process.

This Committee, after stating that they recommend that the levels should be marked upon permanent objects, as churches, bridges, &c., state, "That the

levels, as above described, having been provided, contour lines to a certain extent would be an useful addition to a map on the 6-inch scale;”* and “that contour lines, selected from those obtained for the large surveys (if of a different colour), would be an useful addition to the 1-inch map.” The committee further urge “the extreme importance of expediting, in the greatest possible degree, the completion of the general 1-inch map;” and conclude by saying, “We trust, therefore, that no question of contouring will be allowed to delay that work of first-rate importance; the contour lines that have been already completed, may be introduced in a different colour on the maps of that scale, but the publication of a first impression of the remainder should not be deferred for a similar addition; and we would submit that the completion of the 1-inch map within the shortest practicable period is well worth the moderate additional expenses that it would entail upon the survey, and that a sufficient additional annual grant should therefore be obtained for this particular purpose, and generally for carrying out the views which we have ventured to suggest.”—P. 364, Correspondence on the Survey.

On the 28th January 1852 (E-118) the 1-inch map in outline was ordered to be proceeded with. On the 18th August 1855 (E-1744) the perfect map with the hill features was ordered to be commenced.

Present state of the one inch map of Ireland in outline and writing.

The projection of the general map of Ireland, on the scale of one inch to a mile, has been made on strictly geometrical principles.

The map will be engraved on 59 sheets; each sheet is three feet wide by two feet deep; but each sheet is divided into quarter sheets, 18 inches wide by 12 inches deep; of these quarter sheets the work will be contained in—

Total number of quarter sheets	-	-	-	-	200
Of these we have in whole or in part engraved	-	-	-	-	56
So that we now have to engrave	-	-	-	-	144

to complete the whole of Ireland in outline. As we have the whole of Ireland engraved on the 6-inch scale, and there is no difficulty in reducing and engraving the whole in outline on the 1-inch scale, I have made arrangements for finishing this portion of the work by the 31st March 1859, as stated in my letter of the 10th August 1855, but we may possibly finish it a few months earlier.

No. 25 is a specimen of the outline map.
One-inch map contoured and hill sketched.

The number of quarter sheets in the whole map is	-	-	-	200
Of these the number hill-sketched is	-	-	-	75
So that we have yet to hill-sketch	-	-	-	125
But of this number we have contoured	-	-	-	7

and if the hill-drawing is to be based on the contours, the first and most important thing to do is to bring up the contouring to the hill sketching. I therefore transferred, in October last, 16 contouring parties, in all about 50 men, from the Survey of England, to aid in accomplishing this object; and I have also taken measures for increasing the number of hill sketchers, so as to expedite the work as much as possible.

No. 28 is a specimen of the hill engraving.
Recommendation.

The opinion expressed by the committee of eminent persons, over which Lord Ellesmere presided, appears to be that which is generally entertained; viz. “the extreme importance of expediting, in the greatest possible degree, the completion of the 1-inch map;” and, concurring as I do in the opinion, “that, considering the number of altitudes which are engraved on the 6-inch maps, and the minute detail of the 6-inch survey, a shaded general map of Ireland may be produced by hill sketching alone, which shall excel in accuracy the 1-inch map of England.”

I am clearly of opinion that we ought not to wait for the contouring, before proceeding with the hill sketching and engraving.

The sides of the small triangulation in Ireland are about one mile long; each of these sides is levelled, and in many cases there are cross lines in these triangles, which are also levelled, and consequently, upon an average, there will be not less than from three to four miles of levelling (each line of levels giving a perfect section of the country), on each square mile on the general map, and furnishing invaluable data to guide the hill sketcher.

I have

* The quantity of contouring is now greatly reduced in Great Britain, and it is not intended to insert them in the Highlands, or in extensive districts of uncultivated ground. The altitudes are marked on the churches, bridges, &c., as recommended.

I have always advocated the system of recording levels by means of contours as far preferable to the system of recording them in the way they have been in Ireland, or in other ways which have been suggested; and I have recommended that we should adopt the system of contouring in Scotland and the north of England, the surveys of which are in progress.

But the whole of Ireland has been surveyed and levelled, and the maps are published, with the levels engraved on them; and we know by experience, that, instead of costing 30,000 £., as originally estimated, we cannot complete the contours of Ireland at a less cost than 96,000 £.

Advocating then, as I do, the system of contouring, as preferable to the system adopted in Ireland, I feel that I should not be justified in recommending the continuance of the system of contouring in that country beyond those counties which are to be thoroughly revised, and which, in addition to the counties now in progress, includes only the county of Armagh. The county of Dublin has been in part contoured; and I therefore recommend that we should complete that county also. But, as regards the remainder of Ireland, I recommend that no further contouring, except for special purposes, should be allowed, and that the hill sketching should proceed in those counties which are not to be contoured.*

No. 3.

ACCOUNT OF EXPENDITURE during the last Year.

The accounts have been made up to the end of September quarter last: these accounts contain the vouchers for the expenditure of every shilling.

The amounts of the votes and expenditure for the year from the 1st October 1855 to the 30th September 1856 are as follows:

		Expended between 1st October 1855 and 30th September 1856.
ENGLAND:		
Half the Vote for 1855-56	£. 23,000	£.
Ditto - - - 1856-57	19,500	
TOTAL - - - £.	42,500	42,006
SCOTLAND:		
Half the Vote for 1855-56	£. 26,500	
Ditto - - - 1856-57	25,000	
TOTAL - - - £.	51,500	51,560
IRELAND:		
Half the Vote for 1855-56	£. 11,500	
Ditto - - - 1856-57	10,000	
TOTAL - - - £.	21,500	23,278

During

* The Lords of the Treasury have since ordered the discontinuance of contouring in Ireland, and the appropriation of the entire sum voted by Parliament to the completion of the revision of the plans on the 6-inch scale, and the 1-inch map.

During the last twelve months a considerable expenditure has been incurred in the purchase of lithographic printing presses and other apparatus, including that for reducing the plans by photography, which will not again have to be incurred.

Five thousand pounds of the grant for 1855-56 was unexpended.

No. 4.

DISTRIBUTION of the Officers and Men, and the Districts proposed to be Surveyed next Year, to which the Sums which may be voted will be applied.

THE distribution of the several officers and divisions of the survey will indicate the general arrangements I have made, and the districts which will be surveyed next year.

Captain Cameron is the executive officer in charge of the general correspondence, and the publication of the maps of Great Britain, at Southampton.

Captain Leach has charge of the publication of the maps of Ireland, and of the office in the Phoenix Park.

Captain Clarke has charge of the trigonometrical branch of the work, and of the initial levelling, and of the publication of the "Account of the Trigonometrical Operations of the Survey."

* Captain Elphinstone has charge of the examination of the manuscript plans, and of their reduction to the 6-inch and 1-inch scales.

OFFICERS in charge of Divisions, and the Districts upon which they will be employed.

<i>Scotland</i> :—				}	Lanarkshire.
Captain Bayly	-	-	-		
Lieutenant Pratt	-	-	-	}	Selkirkshire. Stirlingshire.
† Captain Kerr	-	-	-		
Captain Burnaby	-	-	-	}	Roxburghshire.
Captain Stotherd	-	-	-		
Major Cooke	-	-	-	}	Forfarshire and part of Perthshire.
Lieutenant Scott	-	-	-		
				}	Harris and Western Isles.

The survey of the Western Isles is proceeding at present in connexion with the hydrographical survey, by which the cost of that survey will be reduced according to the testimony of the hydrographer to the Admiralty, "in some cases to one-half, but in all cases to two-fifths." ‡

<i>England</i> :—				}	Cumberland and Westmorland. Northumberland.
† Captain Barlow	-	-	-		
Captain Heygate	-	-	-		
Lieutenant O'Grady	-	-	-		

I have directed the south-eastern portion of Northumberland, including the coal district, to be surveyed first, as this is by far the most important district in that county.

<i>Ireland</i> :—				}	Downshire. Monaghan.
Captain Wilkinson	-	-	-		
Captain Parsons	-	-	-		

Revision.

I have given instructions by which I hope very much to expedite the revision of the Irish Maps.

Hill drawing, levelling, and contouring.

In England—The hill drawing, levelling, and contouring is carried on under Captain Farrell, who is stationed at Carlisle.

In

* Captain Elphinstone has since been relieved by Lieutenant Scott.

† These officers have since left the survey.

‡ The reduction in the amount of the grant has obliged me to suspend the survey of the Western Isles.

In Scotland—The same duties are in charge of Lieutenant Bailey, who is stationed in Edinburgh.

In Ireland—Captain Leach directs the contouring parties round Dublin, and Captain Wilkinson those in Antrim. Captain Leach also superintends the reduction of the 1-inch map, and the engraving of the hill features.

I have transferred from England and Scotland a number of contourers, and some of the best hill sketchers and draftsmen, and I purpose to increase the hill sketchers still further, and to appoint an officer to take charge of this special duty.

No. 5.

It will be seen by reference to the sums which will be required to be provided next year, that I have asked for an increase of 2,000 *l.* to the vote of last year for the survey of England, to enable us to proceed more rapidly with the survey of the northern counties, and to meet the demands for special surveys in other parts of the kingdom, for the War and other departments.

The sum required for the completion of the publication of the triangulation is reduced by 1,000 *l.*, the great labour of the computations required for this work being nearly completed.

The addition of 6,000 *l.* for the survey of Scotland, and 4,000 *l.* for the 1-inch map of Ireland, is necessary in order to expedite the completion of these services, so urgently pressed for on all sides.

STATEMENT of the AMOUNTS which will require to be provided in the Estimates for 1857-58 (exclusive of the Regimental Expenses of the Four Companies of Royal Engineers employed on the Surveys) for the ORDNANCE SURVEYS of the UNITED KINGDOM.

	ESTIMATE 1857-58.		ESTIMATE 1856-57.

On account of the survey of counties and the trigonometrical survey carrying on in England, Ireland, and Scotland, viz.:				
	£.			
England - - - -	38,000			
Scotland - - - -	56,000			
Ireland - - - -	18,000			
	112,000	- -	104,000	
Towards the completion and publication of the Grand Trigonometrical Survey of Great Britain and Ireland - - - -	1,000	- -	2,000	
Towards the hill sketching and engraving of a map of Ireland, on the scale of one inch to a mile - - - -	6,000	- -	2,000	
Estimated amount of cost at Southampton for supplying the public with maps - - -	1,000	- -	1,000	
(This is no actual expense to the public, being covered by the sale of maps, which amounted during the past year to * 3,818 <i>l.</i> 14 <i>s.</i> 7 <i>d.</i> , exclusive of those supplied to public departments, of which the net value amounted to 781 <i>l.</i> 3 <i>s.</i> 9 <i>d.</i>)				
TOTAL - - - £.		120,000		+ 109,000

The total amount expended upon the survey of the United Kingdom, up to 31st March 1857, has been 2,351,963 *l.*, of which 1,027,240 *l.* has been expended upon England, 985,445 *l.* upon Ireland, and 339,278 *l.* upon Scotland.

* The sale of the maps has now greatly increased. See page 20.

† The amounts inserted in the estimates were reduced to the extent of 27,000 *l.* in the aggregate, in consequence of which, I have been compelled to discharge 850 surveyors and draftsmen; and as the strength of the four companies of Royal Engineers employed on the survey has been reduced from 120 men per company to 100, the strength of the survey will be 930 men less this year than last. I have been obliged to break up the divisions which were under the direction of Captain Kerr at Edinburgh, and Captain Barlow at Carlisle. Captain Elphinstone is now employed in editing the History of the Siege of Sebastopol, so that there are now three officers less on the survey than when I made this report.

AGENTS for the SALE of the MAPS.

I SUBJOIN a list of the agents who have been appointed for the sale of the maps; they are allowed 25 per cent. on the amount of their sales.

The accounts pertaining to the sale of the maps are kept by the executive officers at Southampton and Mountjoy, and a quarterly return of the sales is forwarded to the Accountant-general, through whom the payments are made by the agents.

Agents for the Sale of the Ordnance Maps in Great Britain and Ireland:

No. 11.

REDUCTION of PLANS to smaller SCALES by the Aid of PHOTOGRAPHY.

HER Majesty's Government having decided that the manuscript plans of the cultivated districts of Great Britain should be drawn on the $\frac{1}{2500}$ scale, or the scale of 25·344 inches to a mile, and that these plans, as well as the plans of the large towns, should be reduced to the scale of six inches to a mile, upon which the uncultivated districts are drawn, so as to make the maps of every county complete on one uniform scale, and again reduced to the 1-inch scale for the general map, it became a matter of the highest importance to introduce the most expeditious and inexpensive mode of reducing the plans from the larger to the smaller scales.

I therefore had experiments made last year, whilst I was in Paris, to test the practicability of accurately reducing plans by photography, and having satisfied myself that it was perfectly practicable to do so, I had two of the sappers who were with me instructed in the art of photography, and we have since so perfectly succeeded in making all the reductions by this process, that we now seldom use any other method.

The advantages derived from the introduction of this method will be readily understood by those who are at all conversant with the tedious methods of reducing plans of towns by the pentagraph or the eidograph, or by proportional compasses, or squares, or any of the methods formerly employed; and it is no exaggeration to say that the reduction of a plan of a large town on the $\frac{1}{350}$ scale, may be and is now made by photography, first to the $\frac{1}{2500}$ scale, and from this to the 6-inch scale, at one hundredth of the cost at which we were previously able to do this work; and, what is scarcely less important, the reductions are made and copies printed so rapidly by this process, that no delay takes place in the publication of the same district on the different scales ordered—a most important consideration, when it is borne in mind that the survey is now proceeding at a rate of about 1,500,000 acres per annum, and that in the conduct of so large a work, the rapid closing up and the final disposal of the work as it is produced is essentially necessary to success in the conduct of it.

As proof of the facilities which photography gives us in making the reductions, I may mention, that during the last week one man, with the assistance of a printer and a labourer, reduced 32,000 acres from the 25-inch to the 6-inch scale, and that he produced three copies of 45 sheets, or 135 impressions in six days, besides some other work. One hundred draughtsmen could not have produced so much work. It must not be understood that we give the photographed reduced drawings to the public; one copy is handed to the engravers, another to the officer who has to insert the contours, and so on, and by this arrangement everything connected with publication proceeds *pari passu*.

I made experiments to ascertain the relative power of the different colours for producing photographs, and I found the following scale of colours produced a scale of shades from nearly perfect white to jet black: blue, purple, red, orange, yellow. I have, therefore, had all the houses on the MS. plans coloured yellow.

I send herewith an engraved sheet of the plan of the town of South Shields, in Durham (No. 5), on the 10-foot scale, reduced to the 25-inch scale (No. 6), and to the 6-inch scale (No. 6); part of a zincograph impression of a sheet of the parish of Dalton-le-Dale, in Durham (No. 7), on the 1-2500th, or 25-inch scale, reduced to the scale of 6 inches to a mile (No. 8); and a sheet of the county of York (No. 9), on the 6-inch scale, reduced to the scale of 1 inch to a mile (No. 10). An examination of these sheets will suffice to show what a great saving in time and money is effected by making the reductions by photography on a work of the vast magnitude of a survey of a kingdom; and an examination of the plans of the village of Dalton-le-Dale, on the two scales, will show how necessary it is to have the plans on the 25-inch scale for the valuation and transfer of property.

No. 12.

PRINTING DEPARTMENT.

Copper Plate.

THE present number of engravers is 92, and we have five presses, all of which at times are at full work ; but for the supply of the current demands for the engraved maps, two presses are sufficient.

Electrotyped Plates.

Those who may have examined the impressions from the plates which have been long in use, must be struck with the manner in which the engraving, especially of the hill features, is obliterated in parts ; this has led to a constant necessity for "repairing" or re-engraving the plates, and to a constant expense. To prevent this, we now invariably, in the first instance, take an electrotype copy of the plate, from which we print, preserving the original in its perfect state, from which, when required, another electrotype copy can be taken, or rather from the "matrix" of the original. We are also by this means able and do make a duplicate set of plates, on which the lines of the geological survey are engraved, and, what is also of great importance, if any alteration has been made, and the plans corrected, we are able to remove from the matrix such objects as have been removed from the ground, and engrave on the electrotype copy the new railroads, &c., which may have since been made ; and thus, whilst we have the original plate preserved in its integrity, we can readily introduce any subsequent changes which may have been made.

See plan of Arthur's
Seat, Nos. 11 and
12.

I believe it is generally admitted that we have brought this art as near as possible to perfection. The most minute examination fails to detect the slightest difference between the copies from the original and those from the duplicate plates. See the impressions from the original and the duplicate plate containing Arthur's Seat. But we are still engaged in endeavours to produce the duplicates in a shorter time, and at a less cost, and in this we have already made considerable progress ; I am in the position to say that, if it were necessary, we could produce the matrix and duplicate plate ready for printing in from 24 to 36 hours.

Another important advantage is obtained from this art. We require indexes for the 6-inch county plans, and the engraving of these indexes would entail a great expense ; but, by joining together the matrixes of those portions of the rectangular sheets of the 1-inch map, which include a county, we produce, on a single plate, a perfect county map on that scale, on which the lines indicating the positions of the 6-inch sheets, are afterwards engraved. The saving thus effected is very great. The indexes to the counties of Edinburgh and Haddington, and other counties, were produced in this way.

Anastatic Printing.

The peculiar advantage of this process consists in the means which it affords for reproducing, from an old impression, a new plate, or any number of new plates of zinc, from which any number of new impressions can be taken.

This gives this process a great advantage over any other for producing copies of the published plans on the $\frac{1}{2500}$ scale, and a knowledge of the power which this process gives us was one of the reasons which led me to recommend that we should publish the $\frac{1}{2500}$ plans on that scale, instead of reducing the plans, and engraving them on the 12-inch scale.

The public now have the plans at an extremely cheap rate, and on the scale of one inch to one acre ; and it must be obvious that the Government has thus conferred a great benefit on the community at large, and made the survey subservient to every practical purpose connected with property, the scale being sufficiently large to identify and put a reference number on the smallest holdings.

But the anastatic process possesses no advantage over lithography or zincography in producing the first copy, as, for either of these three processes, a tracing from the original manuscript plan must be made.

Lithography.

Lithography.

The art of lithography has been long practised in this department, but principally for the purpose of printing the forms of returns, circular orders, and other documents. I therefore in the first instance printed the copies of the $\frac{1}{2500}$ plans by lithography; but the great size and weight of the stones, and their expense, with their liability to breaking under the press, led me to adopt zinc plates, instead of stones.

Zincography.

The first impressions of the plans are now generally taken by zincography; and we find not only that the plates are cheaper than the stones, and not liable to break, but that the impressions are darker and clearer; and as we can at all times resort to new tracings or to the anastatic process for producing any additional copies that may be required, the same plates, after being cleared of the impressions, are again and again used for taking the impressions of other maps.

I send herewith three impressions taken by the anastatic process, by lithography, and by zincography, from tracings, together with copies of the above reproduced from impressions by the anastatic process.

Nos. 13. 15. 17.

Nos. 14. 16. 18.

I also enclose a copy of a printed letter by the anastatic process.

No. 20.

Coloured Maps.

All large maps are greatly improved by colours, to clearly distinguish the houses from the courts or gardens attached to them, and for clearly defining the extent of water, and the direction of the roads. I have therefore had a number of boys, from 13 to 14 years of age, taught to colour these large maps; they are paid from 6 *d.* to 1 *s.* a day, and we find that the average cost of colouring a sheet is 1 $\frac{1}{4}$ *d.* We charge 6 *d.* extra to the public for the coloured impressions. I enclose a portion of a coloured sheet.

No. 19.

Cost of publishing the Large Plans on the $\frac{1}{2500}$ Scale.

In my evidence before Lord Duncan's Committee on the Survey, I stated that, if we sold the sheets at 2 *s.* each, the sale of 33 impressions would cover the cost of 50 impressions; we have since considerably reduced the cost of producing copies, and we can now produce 50 copies for 50 *s.*; but it must not be inferred that we can produce 25 copies for 25 *s.*; the price, therefore, which is still charged for each copy of a sheet, is 2 *s.* if plain, or 2 *s.* 6 *d.* if coloured; so that the entire cost of publishing these large plans will ultimately, and very soon, be paid by those who purchase them.

No. 13.

ECONOMY of LABOUR.

THE system of piece-work has, in obedience to the Treasury Order of the 15th July 1854, been introduced by me into almost every branch of the work, and with great advantage. Piece work.

The work is more expeditiously and more economically performed, and without any falling off in its quality.

We have five classes of work, viz., very open, open, medium, close, very close, and thus we have five prices for each branch of the work, as for surveying, plotting, drawing, &c.; the tracings for the transfer to zinc or stone are in like manner paid for at certain prices per square mile; and the printing is paid for at so much per copy.

The men are paid weekly on pay-lists at different rates per diem, and the balance which may be due to the men are paid at the end of the quarter; or if they have not earned their wages, it is deducted from their last week's pay. The accounts are thus made up quarterly, and forwarded to the Accountant-general for examination. Payments.

I have already referred to the manner in which the reductions of the plans by the aid of photography is performed more expeditiously and economically than by the old methods, and to the advantages we derive from electrotyping Mechanical appliances.

Punches for
engraving.

the copper plates ; but the labour of producing the original plates is greatly reduced by the aid of punches for the trees, the figures for the levels, &c.

See Nos. 21 and 22.

All the trees, woods, &c., and that portion of the engraving which comes under the head of "ornament," was, on the 6-inch maps of Ireland, done by skilled engravers at a high rate of pay, whilst at present the work is entirely done with punches and by boys at a low rate of pay, so that this branch of the work is also much more expeditiously and economically performed.

Punches for the
MS. plans.

By subdividing the labour of making the manuscript plans, and the copies for the transfer to zinc, we are able to get the outline penned in by, comparatively speaking, inferior draftsmen, whilst, by the aid of stamps for the trees, figures, and stencil plates for the writing on the plans, this branch of the work is also very much reduced in cost, and is more expeditiously done ; and what is of great importance, although so many hands are employed upon the work, a nearly perfect uniformity in the style and finish of the plans is preserved, and thus any of the sheets, although drawn by different people and at different times, may be put together to form the connected plan of any district, uniform in its character throughout, instead of presenting the piebald appearance the plan would otherwise have.

Some of the Members of Lord Duncan's Committee seeing this result, were under the impression that the large plans which were exhibited in the Committee room, were engraved, instead of being, as they were in reality, taken from transfers to zinc made in the way I have described.

Ruling machine.

Wherever tints are required on the impressions from copper, as for the sand along the coasts or in estuaries, or for shading the houses in the large plans of towns, or for marking the extent of the parks and grounds surrounding gentlemen's seats, the shades or tints are made by means of a ruling-machine, which carries roulettes, and draws fine dotted lines across the spaces where the shade is required : by making the distances between the points of the roulette equal to the distance between the parallel lines along which the roulette is drawn, the effect of a uniform shade is produced, and this at a very trifling cost, especially if the cost of producing the work in this way is compared with the cost of doing it, as it formerly was, by hand.

No. 14.

RETURN of the PUBLICATIONS of the ORDNANCE SURVEY, and of those which have been published during the last Year.

AN Account of the Operations carried on for accomplishing a Trigonometrical Survey of England and Wales (3 volumes), from the Year 1784 to 1809.

Memoir of Londonderry. 1835.

Astronomical Observations made with Ramsden's Zenith Sector. 1842.

Geological Report on Londonderry, and Parts of Tyrone and Fermanagh. 1843.

Account of the Measurement of the Lough Foyle Base in Ireland. 1847.

Astronomical Observations made with Airy's Zenith Sector. 1852.

Meteorological Observations taken at the Foreign Stations of the Royal Engineers. 1854.

Levelling taken in Ireland. 1855.

Meteorological Observations taken at Mountjoy Barracks, Phoenix Park, Dublin. 1855.

The two last have been published during the last 12 months, as well as an account of the observations taken at Arthur's Seat, Edinburgh, for the determination of the mean density of the earth ; and also a paper on the figure, dimensions, and mean density of the earth, which was communicated to the Royal Society, and published in its Transactions. I enclose a copy of this paper.

An account of the grand triangulation of the United Kingdom is now in the press, and will shortly be published : 456 pages of this work are in type.

I now propose to publish the levelling which has been taken in Great Britain, for which there is a very frequent demand.

No. 15.

PROSPECTIVE SCIENTIFIC LABOURS of the SURVEY.

THE destruction of the Parliamentary standards in the fire which destroyed the Houses themselves, and the construction of a new standard of length, which by estimation is as nearly as possible equal to the original standard, but the exact length of which is not given, as compared with any of the measures with which the Ordnance 10-foot standard has been compared, has led to the necessity of making a comparison between the Ordnance 10-foot standard and the new standard.

Comparison of standards.

From the manner in which the Ordnance standard is constructed, it is impossible to set off the three-and-a-third lengths of the new standard yard on it, and therefore I have had two new iron standards made upon which this can be done, and, through the instrumentality of this intermediate standard, obtain the length of the Ordnance 10-foot standard in terms of the present standard yard. The importance and necessity of undertaking the tedious and delicate operation of making this comparison must be obvious, when it is considered how small a quantity in the length of 10 feet would affect measurements applied to 10 degrees of latitude, and to the measure of the earth itself.

I therefore purpose making this comparison during the ensuing year.

The longitudes of the trigonometrical stations have been determined geometrically from their observed latitudes and their reciprocal azimuthal bearings, and the computed distances between them, and chronometrically by the transmission of chronometers and transit observations.

Determination of longitudes.

The general introduction of the electric telegraph has afforded the means of determining the difference of longitude between any two stations with a far greater degree of precision than by any other means, and the American scientific men were not slow to avail themselves of it.

This method essentially depends upon the power we now possess of instantly transmitting the times of the transits of stars from one station to another. The exact interval of time between the transits of the stars at the two stations, it is said, may be thus measured to the one hundredth part of a second.

By this method, the difference of longitude between the Observatories of Greenwich, Brussels, and Paris, has been determined by the distinguished astronomers Airy, Quetelet, and Le Verrier, who so ably superintend their respective observatories.

M. Le Verrier, and Colonel Blondel (the Superintendent of the Survey of France), have since determined the difference of longitude between Paris and Bruges by this new method, and found a considerable error in it, as compared with that which was previously determined. Mr. Airy has suggested to me the importance of testing the accuracy of the longitudes of the stations in Great Britain and Ireland, and being fully sensible of the importance of so doing, I have placed myself in communication with M. Le Verrier for the purpose of procuring a galvanic apparatus, with the improvements which his experience has led him to introduce, so as to be in a position to be able to commence this work in the spring.*

No. 16.

BUILDINGS (State of).

THE main buildings of the establishment (B, C, D, on plan) are in good repair, but were found to afford very insufficient accommodation for the number of people who are employed here, and we were consequently obliged to hire two houses in the town to afford the extra accommodation required, in addition to which, I have been obliged to fit up two places in a temporary way.

Plan I.

Main buildings.

The

* M. Le Verrier has not yet finished the apparatus.

New building.

The new building A, for which the sum of 8,000 *l.* was granted last year, is far advanced towards completion, and I hope to occupy it by the end of June, and to give up the houses which we now hire.

Fire-proof.

This new building is built as a fire-proof building, with brick arches, iron pillars and girders to support the floors, and with iron doors and window sashes. All the plates and manuscript plans will be kept in a part of this building.*

Astronomical observatory.

This building (G on plan) was erected last year, and is highly useful and beneficial to the survey.

The instruments which are set up in position for use are a transit instrument, Airy's zenith sector, and occasionally the great theodolite, used as an altitude and azimuth instrument in the dome. We also keep in this building the standard measures, Colby's compensation bars, and a variety of other instruments.

This observatory, therefore, is not only used as such for the training of the officers and men in taking observations, and is especially valuable in cases when we have to send parties abroad (as we have recently done to Ceylon), who require previous training in taking astronomical observations, but it is also a store in which all our valuable instruments are safely kept.

Equatorial.

I am very desirous of having an equatorial for the observatory for the use of the officers and men; the cost of such a one as we require would be from 150 *l.* to 200 *l.*, and although this instrument is one that is not absolutely required for the duties of the survey, the power of being able to study all the heavenly bodies by its aid would make the study of astronomy more attractive, and we should indirectly derive great benefit from it.

Meteorological observatory.

This building (F on plan) is so constructed as to admit the air to freely enter it on all sides, whilst at the same time it protects the instruments placed in it.

Meteorological observations are regularly taken here, as they now are also at all the division offices we have in England, Scotland, and Ireland. The observations are published weekly in the local papers, and also with the observations taken at the foreign stations of the Royal Engineers.—See "Abstract of the Observations taken at the Stations of the Royal Engineers," which I have edited.

Photographic workshop.

At present the reductions by photography are made in an open court, under great disadvantages, and with great discomfort in bad weather to the men engaged on this duty.

I therefore propose to erect a small building (at H on plan), the upper part of which will be entirely of glass, with dark rooms underneath.

With this addition, I think the establishment here will be very perfect for carrying on the duties of the survey.†

No. 17.

CONCLUSION.

THE survey, as it is now proceeding, is admirably suited to meet the wants of the community at large. The plans of the towns are on a sufficiently large scale to admit of admeasurements in feet, and the insertion of every detail, the plans of the cultivated districts, with the areas of every inclosure given, and on the scale of one square inch to one acre, is remarkably well suited for every public or private purpose connected with land; whilst the 6-inch map of counties and the 1-inch map of the kingdom are equally well suited for the engineer, the hydrographer, and the geologist.

These plans will enable the Government to carry into effect measures for facilitating the transfer of landed property, for the valuation of property, and many

* We have since given up the hired houses, and now occupy the new building, which was finished for the sum of 7,883 *l.*

The engraved copper plates, for which previously there was no separate or safe store, are now all placed in one of the fire-proof rooms; there are upwards of 3,000 plates, and the value of the copper alone is 10,000 *l.*; but the value of them as engravings is about 135,000 *l.*

† This addition has now been built.

many other important measures for which an accurate detailed survey is the necessary basis.

I have asked for additions to the grants for the survey, to expedite it as much as possible. We already have a very large number of people (2,173)* employed; but there will be no difficulty in gradually augmenting the number in proportion to the extent to which Parliament may be pleased to augment the grants; and it will be the truest economy in the end to complete the survey as soon as possible.

The great drawback to the survey has been the frequent change of orders relative to it. I believe those under which we are now acting are most judicious; and after the full discussions upon this subject which have taken place by correspondence, in Committees, and in Parliament, I trust that this great work (which will certainly be the most perfect of its kind ever executed) will now be pushed on steadily and rapidly, and without any further material changes.†

Henry James,
Lieutenant-Colonel Royal Engineers,
Superintendent of the Ordnance Survey.

Southampton,
10 December 1856.

* Now reduced to 1,282.

† The decision of the House of Commons, on the 18th instant, has rendered nugatory all the arrangements we have made for making the plans on the 25-inch scale, and the reductions from them; and, after a seven years' discussion, we revert to precisely the same position we were in when the Treasury Minute of the 1st October 1840 was issued.—*H. J.*

Note.—The number of plates required for the 1,500 copies of this report is 45,000, of which 7,500 are photographs, and as these have all been prepared in a few days at Southampton, and during very cloudy, wet weather, the photographs are not so perfect as I could have wished.

No. 6.

*Lieut. Colonel Jones, R.E., Superintendent of the Ordnance Survey, to the
Lords of the Treasury.*

*Ordnance Map Office, Southampton,
May 7, 1855.*

IN compliance with your Lordships' request that I should state my views as to the scales which under existing circumstances it would be most advisable to adopt for the survey of Scotland, I beg to say, that if the survey is required, as I presume it is, for property purposes, I am clearly of opinion that the scale of 6 inches to a mile is the least which should be adopted, and this as well for the uncultivated as for the cultivated districts; but I am also of opinion that the plans on the scale of $\frac{1}{2500}$ or 25·344 inches to a mile for the cultivated districts will be found of the highest value, and essentially necessary if the survey is intended to subserve such measures as the registration and valuation of property.

It has been stated by some, that the scale of 1 inch to a mile is sufficient for the uncultivated districts. On this scale we have 640 acres to 1 square inch (we might draw the plan of an estate of 500 acres on the proprietor's thumb nail), and I am utterly at a loss to know how plans on such a scale can be made available for property purposes; but, in fact, we know that neither in England nor in Wales, the plans of which on that scale have long been published, have they or can they be used for property purposes, whilst on the contrary, we know that the plans on the scale of 6 inches to a mile have been found of the greatest use both in Ireland and England, and that the Ordnance Plans on that scale are almost always referred to in the sales of land.

The 6-inch plans of Ireland have, however, conferred a benefit upon that country which cannot be derived from the plans only on the same scale in Scotland. In Ireland the parishes are all subdivided into townlands, which are almost always co-extensive with private estates; and consequently, in representing the boundaries and giving the acreage of such a whole, we have also represented in the great majority of instances the boundaries and given the acreage of private property, and hence the Ordnance Plans in Ireland have afforded very great facilities for the transfer of land and property.

There are no such subdivisions of parishes in Scotland; and hence it follows that, to give even the same advantages to Scotland that the survey has given to Ireland, it is desirable that the cultivated districts should be drawn on the 25·344 inch scale, as this scale is sufficient, and no more than sufficient to enable us to represent every property, however small it may be, to put a reference number to it on the plan, and give its area, and therefore the means by which the registration and valuation of property can be made and its transfer greatly facilitated.

But as two-thirds of Scotland is said to be uncultivated (we have assumed one-half only in our calculations), and for this large portion of the country the 6-inch scale is sufficient, and as we have already engraved six counties in the Lowlands on that scale, I strongly recommend that the plans which already have been or may be drawn on the 25-inch scale should be also reduced to and engraved on the 6-inch scale, and thus we should have plans of every county on the 6-in scale, to which the plans on the larger scale will be auxiliary or supplementary.

This would make the survey of Scotland perfect for every purpose, but it would add a sum not exceeding £100,000 to the estimated cost of the 6-inch survey as it was first ordered under the recommendation of the Duke of Wellington. This expenditure would be spread over ten or twelve years, depending on the amounts granted for the survey, and I am convinced that it would be a most judicious outlay of the public money, and that great public benefit would be derived from it.

That the plans on the 25-inch scale, or as they will most probably be called, the "inch to an acre" plans, will be very generally used by landlords

and tenants, as well in towns as in the rural districts. I have no doubt, and they will probably even write their leases and deeds of sale on the backs of the plans, and although these* are not the purposes for which a national survey should be undertaken, they will prove that the most judicious course to follow is to adopt a scale for the plans which are first laid down, sufficiently large for any purpose, and then by mechanical processes to reduce the original plans to such other scales as may be required.

By this course you will confer the greatest benefit on the greatest number; the National Survey will become the standard of reference, and the basis upon which all the transactions affecting landed property will be founded, a general system of registration may then be established, and the local taxation equally adjusted.

The statistics of property and population can then be readily and accurately collected; and all engineering works, such as the laying out of roads or canals, the drainage of districts, the reclamation of waste land, the improvements in the navigation of rivers, &c., will have safe data to proceed upon, and be more economically and more expeditiously executed.

I have made a plan of Aldershott Heath, on the 25-inch, the 6-inch, and the 1-inch scales, and I have represented on them the different properties which have recently been purchased by the Government, and I feel convinced that no one can examine these plans without arriving at the same conclusion that I have, provided it is understood that the survey is intended to subserve any purposes connected with landed property.

No. 7.

Memorandum on the Cost of the Survey of Scotland, and on the Time required for its Completion, if made according to the Instructions contained in the Treasury Minute dated the 18th instant.

ESTIMATE.

	£
1. For the plans of the populous and mineral districts on the scale of $\frac{1}{2500}$, or 25,344 inches to a mile (assumed to be one-half of Scotland)	480,000
2. For plans of the remainder of Scotland, on the scale of 6 inches to a mile	280,000
3. For the general map of Scotland, on the scale of 1 inch to a mile, reduced from the above plans	67,000
	827,000
Deduct for work already done	150,000
Total required to complete Scotland	677,000

The time required for making the survey will depend principally upon the amount of the annual grants; with £70,000 a year it can be finished within ten years.

(Signed)

HENRY JAMES,

Lieutenant-Colonel, Royal Engineers.

May 8, 1855.

* As the relations of landlord and tenant apply to every part both of town and country, to give certainty and facility to their transactions is an important item in that aggregate of public utility which constitutes the justification of the $\frac{1}{2500}$ scale.—C. E. F.

ORDNANCE SURVEY.

RETURN to an Order of the Honourable The House of Commons,
dated 14 July 1857;—for,

A DETAILED REPORT “ of the State of the SURVEY on the 13th day of June 1857,
showing,—

1. The Names of the Parishes, either in *England* or *Scotland*, of which the Maps were completed on the 25-inch Scale, and were then ready for Reduction, or Publication by Engraving, or any other copying process.

2. The Names of Parishes, the Maps of which were so far advanced that the Primary and Secondary Triangulation had been laid down, and the filling-in of detail was in progress, on the day named.

(If the Maps of portions only of Parishes were completed, or were in the state referred to in No. 2, the Number of Sheets so completed, or so far in progress, is to be stated.)”

War Office, }
10 August 1857.

JOHN WILLIAM RAMSDEN.

(*Sir Denham Norreys.*)

Ordered, by The House of Commons, to be Printed,
11 August 1857.

DETAILED REPORT of the state of the ORDNANCE SURVEY on the 30th day of
June 1857,* showing—

1.—THE Names of the PARISHES either in *England* or *Scotland*, of which the MAPS were completed on the 25-inch Scale, and were then ready for Reduction, or Publication by Engraving, or any other copying process, viz. :—

The progress made in the completion and publication of the maps, on the scale of six inches

(a) The Vote for the Survey of Scotland has been reduced from 50,000 £ to 36,000 £ in the present year.

(b) This sum comprises the whole expenditure on the Ordnance surveys in Scotland, from 1819 down to the present cost of the one-inch survey, which has been twice adopted and twice abandoned; first, in Wigtonshire and Ayrshire, Lanarkshire, begun in 1852 (January), and abandoned in September of the same year: all of which surveys have been money was lost by the delay of 16 months in 1853-4, whilst the subject of the scales for the survey was under and became, to some extent, disorganised. All these circumstances have contributed to increase the expenditure, and at the rates specified by me in the Estimates which I laid before the Committee of the House of Commons on the

[illegible]

The expense incurred in the survey of each county cannot be given, not having been kept separate in the accounts.

to a mile, has been 2,225,280 acres, and 407,013 acres on the scale of 25 inches to a mile.

time, and includes the cost of the principal triangulation and levelling of the whole of Scotland; it also includes the commenced in 1819, and discontinued in 1828; and afterwards in parts of Haddingtonshire, Berwickshire, and rendered useless by the adoption of larger scales subsequently. Lastly, it must be borne in mind that a large sum of discussion, and no drawing could be proceeded with, during which period the force was employed to great disadvantage, to delay the progress of the Survey Department, which has now, however, recovered its full efficiency, and is working Ordnance Survey in 1856.

(signed) *Henry James*, Lieut.-Colonel Royal Engineers,
Superintendent of the Survey.

ORDNANCE SURVEY (SCOTLAND).

R E T U R N

RELATIVE TO THE

ORDNANCE SURVEY (SCOTLAND).
